TABLE MAINTENANCE AND CARE

Table Top –

- We recommend that you keep the table covered when not in use. This will prevent the build up of dust and will prolong the life of the table.
- In the event that your table does get dusty, we recommend using a clean soft cloth to wipe it away. The cloth should be non-abrasive. If necessary, you can use any gentle surface cleaner (no bleach or ammonia) with a lint free cloth.
NOTE: DO NOT spray the cleaning product directly on the table surface. It must be applied to the cloth directly. Then the table top can be wiped in a lengthwise direction.
- This table is meant for indoor use only.
- Do not sit on the table or the rods.

Legs -

- Periodically check the bolts on the legs to make sure that they are secure. After heavy playing or lots of abuse, there is a chance they can loosen and decrease the stability of the cabinet.

Rods and Players -

- Periodically check that the nuts and bolts securing the players are tight. If not tight, tighten with a Phillips Head Screwdriver.
- To clean the rods if necessary, you can use any gentle surface cleaner (no bleach or ammonia) with a lint free cloth.
- **DO NOT** hang on the rods. This will cause them to deform and will ruin the playability of your table. If this is the case, contact EastPoint for parts and repair instructions.
- **DO NOT** aggressively spin the rods as this may damage the bushings (and its not legal as per the official rules of the game)
- Use of 100% Silicone lubricant is acceptable to lubricate the rods and bushings.
NOTE: DO NOT over lubricate as you will lose all the touch and feel required to perform various plays and tricks.

Moving the Table -

- Do not drag the table with its legs touching the floor. If moving, you must lift it by either the 2 end aprons or 2 side aprons.
NOTE: DO NOT lift the table by the rods. This will damage the table and the rods and will make the table unplayable without contacting EastPoint for parts and repair instructions.

Balls -

- Over time, the textured surface of your ball will wear and become more smooth. This will lead to the player having less of an ability to trap the ball, perform tricks, or have really good ball control.
- If the ball is worn and you notice a decrease in the quality of your game play, either switch to a new one or contact EastPoint to purchase replacement balls.
