WARNING DECAL PLACEMENT

The warning decals shown here have been placed on the weight bench in the locations shown. If a decal is missing or illegible, please call toll-free 1-877-992-5999, Mon. through Fri., 6 a.m. until 6 p.m. Mountain Time, to order a free replacement decal. Place the decal on the weight bench in the location shown.

IMPORTANT PRECAUTIONS

▲ WARNING: To reduce the risk of serious injury, read the following important precautions before using the weight bench.

1. Read all instructions in this manual before using the weight bench. Use the weight bench only as described in this manual.
2. It is the responsibility of the owner to ensure that all users of the weight bench are adequately informed of all precautions.
3. The weight bench is intended for home use only. Do not use the weight bench in any commercial, rental, or institutional setting.
4. Keep the weight bench indoors, away from moisture and dust. Do not put the weight bench in a garage or covered patio, or near water.
5. Use the weight bench only on a level surface. Cover the floor beneath the weight bench to protect the floor.
6. Make sure all parts are properly tightened each time the weight bench is used. Replace any worn parts immediately.
7. Keep children under 12 and pets away from the weight bench at all times.
8. Always wear athletic shoes for foot protection while exercising.
9. Do not use a barbell that is longer than six feet with the weight bench. Note: The weight bench does not include a barbell or weights.
10. Keep hands and feet away from moving parts.
11. The weight bench is designed to support a maximum user weight of 300 pounds, and a maximum total weight of 410 pounds. Do not place more than 110 pounds, including a barbell and weights, on the weight rests. Do not place more than 50 pounds on the leg lever.
12. Always make sure there is an equal amount of weight on each side of your barbell when you are using it. Always keep some weight on both ends of the barbell when adding or removing weights to prevent the barbell from tipping.
13. When you are using the leg lever, place a barbell with the same amount of weight on the weight rests to balance the bench.
14. Always exercise with a partner. When you are performing bench press exercises, your partner should stand behind you to catch the barbell if you cannot complete a repetition.
15. When using the backrest in an inclined position, make sure that the support rod is inserted completely through both uprights, and that the support rod is turned to the locked position.
16. If you feel pain or dizziness at any time while exercising, stop immediately and begin cooling down.

▲ WARNING: Before beginning this or any exercise program, consult your physician. This is especially important for persons over the age of 35 or persons with pre-existing health problems. Read all instructions before using. Sears assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

BEFORE YOU BEGIN

Thank you for selecting the versatile WEIDER® PRO 220 weight bench. The weight bench offers an impressive array of weight stations designed to develop every major muscle group of the body. Whether your goal is to tone your body, build dramatic muscle size and strength, or improve your cardiovascular system, the weight bench will help you to achieve the specific results you want.

For your benefit, read this manual carefully before using the weight bench. If you have questions after

reading this manual, call 1-800-4-MY-HOME® (1-800-469-4663). To help us assist you, please note the product model number and serial number before calling. The model number is 831.150292. The serial number can be found on a decal attached to the weight bench (see the front cover of this manual for the location of the decal).

Before reading further, please review the drawing below and familiarize yourself with the parts that are labeled.

ASSEMBLY

Make Things Easier for Yourself

Everything in this manual is designed to ensure that the weight bench can be assembled successfully by anyone. However, it is important to realize that the versatile weight bench has many parts and that the assembly process will take time. Most people find that by setting aside plenty of time, assembly will go smoothly.

Before beginning assembly, carefully read the following information and instructions:

- Assembly requires two people.
- Place all parts in a cleared area and remove the packing materials. Do not dispose of the packing materials until assembly is completed.
- Tighten all parts as you assemble them, unless instructed to do otherwise.

- As you assemble the weight bench, make sure all parts are oriented as shown in the drawings.
- For help identifying small parts, use the **PART IDENTIFICATION CHART**.

The following tools (not included) are required for assembly:

- Two adjustable wrenches 
- One rubber mallet 
- One standard screwdriver 
- One Phillips screwdriver 
- Lubricant, such as grease or petroleum jelly, and soapy water.

Assembly will be more convenient if you have a socket set, a set of open-end or closed-end wrenches, or a set of ratchet wrenches.

1. Before assembling the weight bench, be sure that you have read and understand the information in the box above.

Attach two Joint Plates (11) to the Upright (1) without the warning decal with two M10 x 66mm Bolts (28) and two M10 Nylon Locknuts (31). **Do not tighten the Locknuts yet.**

Repeat this step with the other Upright (1). Make sure the Joint Plates (11) are oriented as shown in the inset drawing.

2. Attach the Crossbar (2) to an Upright (1) with two M10 x 66mm Bolts (28), two Joint Plates (11), and two M10 Nylon Locknuts (31). **Do not tighten the Locknuts yet.**

Repeat this step with the other Upright (1).

3. Attach the Front Leg (4) to the Bench Frame (3) with an M10 x 66mm Bolt (28), an M10 x 19mm Screw (5), an M10 Washers (30), and an M10 Nylon Locknut (31). **Do not tighten the Locknut or Screw yet.**

4. Attach the Bench Frame (3) to the Crossbar (2) with two M10 x 68mm Bolts (27) and two M10 Nylon Locknuts (31).

5. Insert the Support Rod (14) into a set of holes in the Uprights (1). Turn the Support Rod so the locking pin is wrapped around the Upright.

Tighten the M10 Nylon Locknuts (31) and M10 x 19mm Screw (5) used in steps 1–5.

6. Lubricate the M10 x 60mm Bolt (25) with grease. Attach the Leg Lever (6) to the Front Leg (4) with the Bolt and an M10 Nylon Locknut (31). **Do not overtighten the Locknut; the Leg Lever must be able to pivot easily.**

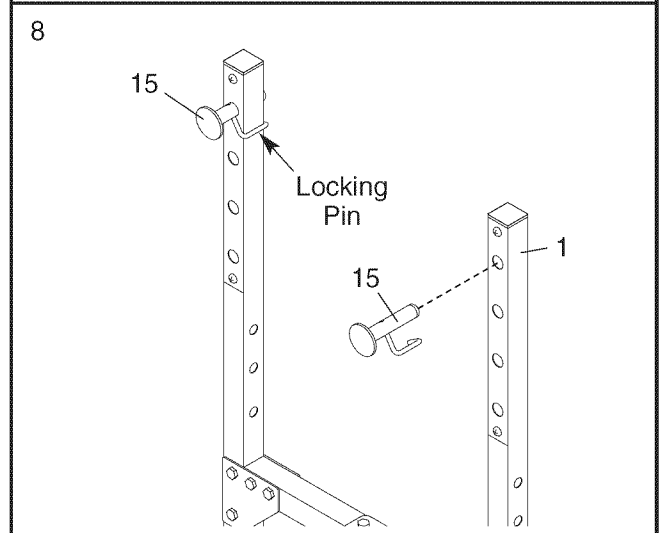

7. Slide a Pad Tube (12) into the Leg Lever (6). Slide two Foam Pads (13) onto the ends of the Pad Tube. **Make sure the Foam Pads are oriented as shown.**

Repeat this step with the other Pad Tube (12).

8. Insert a Weight Rest (15) into an Upright (1). Turn the Weight Rest so the locking pin is wrapped around the Upright.

Repeat this step with the other Weight Rest (15).

9. Attach the Backrest Tubes (7) to the Backrest (8) with four M6 x 38mm Screws (32) and four M6 Washers (22). **Do not tighten the Screws yet. Make sure that the name embroidery is in the indicated location.**

10. Lubricate an M10 x 142mm Bolt (23) with grease. Attach the Backrest Tubes (7) to the welded tube on the Bench Frame (3) with the Bolt, two M10 Washers (30), and an M10 Nylon Locknut (31). **Do not overtighten the Locknut; the Backrest Tubes must be able to pivot easily.**

Tighten the M6 x 38mm Screws (32) used in step 10.

11. Attach the Seat (9) to the Bench Frame (3) with four M6 x 16mm Screws (24). **Make sure the Seat is oriented as shown.**

12. **Make sure that all parts are properly tightened before you use the weight bench.** The use of all remaining parts will be explained in ADJUSTMENTS, beginning on the following page.

ADJUSTMENTS

The weight bench is designed to be used with your own weight set (not included). The steps below explain how the weight bench can be adjusted. See EXERCISE GUIDELINES on page 10 for important exercise information and refer to the accompanying exercise guide to see the correct form for each exercise. Refer also to the exercise information accompanying your weight set for additional exercises.

Make sure all parts are properly tightened each time the weight bench is used. Replace any worn parts immediately. The weight bench can be cleaned with a damp cloth and a mild, non-abrasive detergent. Do not use solvents.

ADJUSTING THE BACKREST

The Backrest (8) can be used in a decline position, a level position, or two incline positions. To use the Backrest in the decline position, remove the Support Rod (14) and lay the Backrest on the Crossbar (2).

To use the Backrest (8) in the level position, lift the Backrest and insert the Support Rod (14) through the bottom set of holes in the Uprights (1). Rotate the locking pin into place around the Upright.

To use the Backrest (8) in an incline position, lift the Backrest and insert the Support Rod (14) through an upper set of holes in the Uprights (1). Rotate the locking pin into place around the Upright.

⚠ WARNING: When using the Backrest (8) in a level or incline position, insert the Support Rod (14) completely through both Uprights (1) and turn it to the locked position.

ATTACHING WEIGHTS TO THE LEG LEVER

To use the Leg Lever (6), slide the desired weights (not included) onto the weight tube.

⚠ WARNING: Do not place more than 50 pounds on the Leg Lever (6).

ADJUSTING THE WEIGHT RESTS

To change the height of the Weight Rests (15), remove them from the Uprights (1) and insert them into the desired set of holes. Rotate the Weight Rests so that the locking pins wrap around the Uprights.

⚠ WARNING: Always set both Weight Rests (15) at the same height.

EXERCISE GUIDELINES

THE FOUR BASIC TYPES OF WORKOUTS

Muscle Building

To increase the size and strength of your muscles, push them close to their maximum capacity. Your muscles will continually adapt and grow as you progressively increase the intensity of your exercise. You can adjust the intensity level of an individual exercise in two ways:

- by changing the amount of resistance used
- by changing the number of repetitions or sets performed. (A “repetition” is one complete cycle of an exercise, such as one sit-up. A “set” is a series of repetitions.)

The proper amount of resistance for each exercise depends upon the individual user. You must gauge your limits and select the amount of resistance that is right for you. Begin with 3 sets of 8 repetitions for each exercise you perform. Rest for 3 minutes after each set. When you can complete 3 sets of 12 repetitions without difficulty, increase the amount of resistance.

Toning

You can tone your muscles by pushing them to a moderate percentage of their capacity. Select a moderate amount of resistance and increase the number of repetitions in each set. Complete as many sets of 15 to 20 repetitions as possible without discomfort. Rest for 1 minute after each set. Work your muscles by completing more sets rather than by using high amounts of resistance.

Weight Loss

To lose weight, use a low amount of resistance and increase the number of repetitions in each set. Exercise for 20 to 30 minutes, resting for a maximum of 30 seconds between sets.

Cross Training

Cross training is an efficient way to get a complete and well-balanced fitness program. An example of a balanced program is:

- Plan strength training workouts on Monday, Wednesday, and Friday.
- Plan 20 to 30 minutes of aerobic exercise, such as running on a treadmill or riding on an exercise bike, on Tuesday and Thursday.
- Rest from both strength training and aerobic exercise for at least one full day each week to give your body time to regenerate.

The combination of strength training and aerobic exercise will reshape and strengthen your body, plus develop your heart and lungs.

PERSONALIZING YOUR EXERCISE PROGRAM

Determining the exact length of time for each workout, as well as the number of repetitions or sets completed, is an individual matter. It is important to avoid overdoing it during the first few months of your exercise program. You should progress at your own pace and be sensitive to your body’s signals. If you experience pain or dizziness at any time while exercising, stop immediately and begin cooling down. Find out what is wrong before continuing. Remember that adequate rest and a proper diet are important factors in any exercise program.

WARMING UP

Begin each workout with 5 to 10 minutes of stretching and light exercise to warm up. Warming up prepares your body for more strenuous exercise by increasing circulation, raising your body temperature and delivering more oxygen to your muscles.

WORKING OUT

Each workout should include 6 to 10 different exercises. Select exercises for every major muscle group, emphasizing areas that you want to develop most. To give balance and variety to your workouts, vary the exercises from session to session.

Schedule your workouts for the time of day when your energy level is the highest. Each workout should be followed by at least one day of rest. Once you find the schedule that is right for you, stick with it.

EXERCISE FORM

Maintaining proper form is an essential part of an effective exercise program. This requires moving through the full range of motion for each exercise, and moving only the appropriate parts of the body. Exercising in an uncontrolled manner will leave you feeling exhausted. On the exercise guide accompanying this manual you will find photographs showing the correct form for several exercises, and a list of the muscles affected. Refer to the muscle chart on the next page to find the names of the muscles.

The repetitions in each set should be performed smoothly and without pausing. The exertion stage of each repetition should last about half as long as the return stage. Proper breathing is important. Exhale during the exertion stage of each repetition and inhale during the return stroke. Never hold your breath.

Rest for a short period of time after each set. The ideal resting periods are:

- Rest for three minutes after each set for a muscle building workout.
- Rest for one minute after each set for a toning workout.
- Rest for 30 seconds after each set for a weight loss workout.

Plan to spend the first couple of weeks familiarizing yourself with the equipment and learning the proper form for each exercise.

COOLING DOWN

End each workout with 5 to 10 minutes of stretching. Include stretches for both your arms and legs. Move

slowly as you stretch and do not bounce. Ease into each stretch gradually and go only as far as you can without strain. Stretching at the end of each workout is an effective way to increase flexibility.

STAYING MOTIVATED

For motivation, keep a record of each workout. List the date, the exercises performed, the resistance used, and the numbers of sets and repetitions completed. Record your weight and key body measurements at the end of every month. Remember, the key to achieving the greatest results is to make exercise a regular and enjoyable part of your everyday life.

PART IDENTIFICATION CHART

This chart is provided to help you identify the small parts used in assembly. The number in parenthesis below each part refers to the key number of the part, from the PART LIST. **Important: Some parts may have been pre-assembled for shipping purposes. If you cannot find a part in the parts bags, check to see if it has been pre-assembled. If a part is missing, call toll-free 1-877-992-5999.**
