# Safety Precautions

1. Read these instructions. 2. Keep these instructions.

3. Heed all warnings. 4. Follow all instructions.

5. Do not use this apparatus near water. For example, do not use near a laundry tub, in a wet basement, or near a swimming pool,

6. Clean only with dry cloth.

7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions. Slots and openings in the cabinet back or bottom are provided for ventilation, to ensure reliable operation of the TV and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the TV on a bed, sofa, rug, or other

registers, stoves, or other apparatus (including amplifiers) that produce heat.

9. Do not defeat the safety purpose of the polarized or groundingtype plug. A polarized plug has two blades with one wider than the instructions other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet

10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where protection against voltage surges and built-up static charges.

11. Only use attachments/accessories specified by the

the manufacturer, or sold with the apparatus.

combination to avoid injury from tip-over. A TV and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the TV and

cart combination to overturn. 13. Unplug this apparatus during lightning storms or when unused

for long periods of time. For added protection for this TV receiver during a lightning stom

or when it is left unused for long periods of time, unplug it from the Safety Strap wall outlet and disconnect antenna or cable system.

This will prevent damage to the TV due to lightning and power line

14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been osed to rain or moisture, does not operate normally, or has

15. This TV should be operated only from the type of power supply indicated on the rating label.

been dropped.

If customer is not sure the type of power supply in your home, consult your appliance dealer or local power company. For TV remote control battery power, refer to the operating instructions.

16. The TV set shall not be exposed to dripping or splashing. No objects filled with liquids, such as vases, shall be placed on the TV set

17. Never push objects of any kind into this TV through openings as they may touch dangerous voltage or other electrical parts that could result in fire or electric shock. Never spill liquid of any kind into

18. Unplug the TV from the wall outlet before cleaning. Do not use liquid or aero cleaners. Use a damp cloth for cleaning.

19. This TV should never be placed near or over a radiator or heat resource. This TV should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

20. Do not place this TV on an unstable cart, stand, tripod, bracket, or table. The TV may fall, causing serious injury to someone, and serious damage to the appliance.

21. Do not attempt to service this TV by yourself because opening or removing covers may expose you to dangerous high voltage or other hazards. Refer all servicing to qualified service personnel.

22. This device complies with Part 15 of the FCC Rules. Operation s subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept 8. Do not install near any heat sources such as radiators, heat any interference received, including interference that may cause

> 23. WARNING: To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation

> 24. To reduce the risk of electric shock, the grounding of center pin of plug must be maintained.

> 25. If an outside antenna or cable system is connected to the TV. be sure the antenna or cable system is grounded to provide some Section 810 of the National Electrical Code, ANSI/NFPA NO.70, provides information with respect to proper grounding of the mast antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and

Caution: Pushing, pulling or climbing on the TV may cause the TV falling. Do not let children climb or hang on the TV. Always place the TV on a sturdy, level, stable surface that can hold the weight of TV. (Note: The fastening components such as screws are not supplied

Step one: Insert the M6 mounting screws into the upper two wall mounting screw holes and fasten them (Figure B) Step two: Insert anchors to wall and connect the bolts and anchors with ropes or chains (Figure C).

### Channel Bar

iss the OK button on the remote control, when OSD (on-screen display)is not used, the channel bar will appear on the Bottom of the screen. It displays the current channel's information. The following list

escribes	the item	nnel bar.		
D14-	1	ATSC-1	A2	
Air 4:3	[Dd]	English 480i	Air	

Jan-01 07:10 Sat

D14-1/A2 If the channel is analog, A is displayed. If it's a digital channel. D is displayed. For example, in the pictures above, A2 is an analog channel, and D14-1 is a digital channel ( -1 is a sub-channel number). ATSC-1 Display the current TV signal type.

Jan-01 07:10 Sat

ATV

English/Stereo Display whether the current channel is being broadcasted in stereo or mono. If the current channel is digital, this space will be SAP (Second Audio Program) language.

4:3/CC Display the screen aspect ratio

480i/480i Display the signal resolution.

Display the CC status (on or off).

Jan-01 07:10 Sat Display current program date and time. DO If the channel is Dolby Digital AC-3, the double-D symbol is displayed.

#### Adjusting Volume

Press the VOL+VOL- button on the remote control to adjust the volume. If you want to switch sound off, press MUTE, When OSD (On Screen Display) is not used, the arrows left/right can also work as VOL-/VOL+ buttons.

### EPG (Electronic Program Guide)

Press EPG button on the remote control, the electronic program guide will appear in the center of screen. The electronic progran guide gives the TV program playing project. You can use left/right arrows to switch pages.

#### **OSD Menu Operations**

Adjust the OSD Screen

The OSD (On Screen Display) menu enables you to approach to the TV functions.

To use OSD menu system, press OK button on remote control, then use left/right arrow to highlight an option from OUICK CHANNEL PICTURE, AUDIO, TIME, SETUP or LOCK and press OK/down Press the up and down arrow to move to a different option within

each menu. If necessary, press OK or right arrow to display the choices of the option you've highlighted. If available, use the text at the bottom of each screen for help. To return to the previous menu, press the MENU button.

 Press the EXIT button. The menu will clear from the screen · Press the MENU button repeatedly until the menus disappear.

How do I tell an analog channel from a digital channel? Press the OK button to display the Channel Bar. when OSD (on-screen display) is not used. Look at the top right comer of the screen. An "A" is displayed for an analog channel. A "D" is displayed

analog TV function only for some unexpected use.

#### Why are there bars on my screen, and can I get rid of them?

Most digital video is sent in a 16/9 format which fills your screen, but is sometimes sent in 4/3 which does not fill your screen. It depends on how the station or device connected to your TV is formatting the video. If there are bars on the screen, Check Screen size in the picture mode to try a different format that may eliminate the bars. Some bars can't be removed because of the way the format is sent by the oroadcaster. The format changes as you choose screen size type in the oicture mode and the format type is displayed at the bottom of the screen.

#### Why does channel search find a lot of channels

but when I try to tune to them, there's nothing there? When channels are unavailable, your TV screen is blank or appears like snow. You probably want to remove these channels from your channel

### ist. Remove these in the Channel List Menu. Go to page 8 for more Why does it take a long time when I search the channels

If you have both analog and digital channels, the TV is looking for all available channels in the channel list. If you do have digital channels, the TV is also searching for scrambled channels, non-scrambled channels, and each sub-channel of that digital channel,

#### Identifying Problems

If there are any problems when using the product, please consult the ist below. If the list does not solve the problem, call our Customer

### The TV can't be turned on.

Make sure the AC cord is plugged in Check the wall outlet, make sure the AC output works normally and stably.

- The side panel may be locked (disabled). Use the remote control

to turn on the TV.

 Select the Keypad Lock function in the PARENTAL control Menu and press OK to uncheck the locking status.

### There is no picture or sound but the TV is on and there is a "No Are you trying to use an input source with no device connecte

to it? For using other video/audio device, make sure the external device works normally first, then press INPUT and choose the right input source. The Signal Type option may be set incorrectly. Go to page 8 for

The channel may be blank. Try to search the channel again or change another channel.

#### The sound is fine, but the picture is poor.

- If you can only get black and white pictures from external device that you've connected to your TV, maybe it is due to the video

he Quick Menu contains menus and provides you a quick way to approach the main settings that may be most possibly and frequently approached. The Remote control doesn't work. There may be an AC power failure or the power cord

- Something might be blocking between the remote control and the remote sensor on the front panel of the TV. Make sure there is a clear path.

- The remote may not be aimed directly at the TV. The batteries in the remote may be weak, dead, or installed

incorrectly. Put new batteries in the remote. You are experiencing problems with V-Chip/Parental Controls.

#### - If the rating limits don't work, you must lock the settings. Go to the Main Menu (press MENU on your remote), select PARENTAL control to check the settings.

If you've been through the Troubleshooting section and nothing has fixed your problem, try rebooting your TV. Note that after a reboot, you may need to run your TV through the setup process again. To reboot, unplug the power cord from the wall

outlet or power strip. Keep your TV unplugged for about 5 minutes. Then plug in the TV and turn it on. See if the problem is fixed. If the problem remains, then please visit the Customer Support Menu at

# Wall Mounting Unit Specification
