

# Instruction Sheet

## for Downdraft Door Replacement kit

**NOTE:** A short Video of the process is available on servicematters.com. Search JID4436ES0.

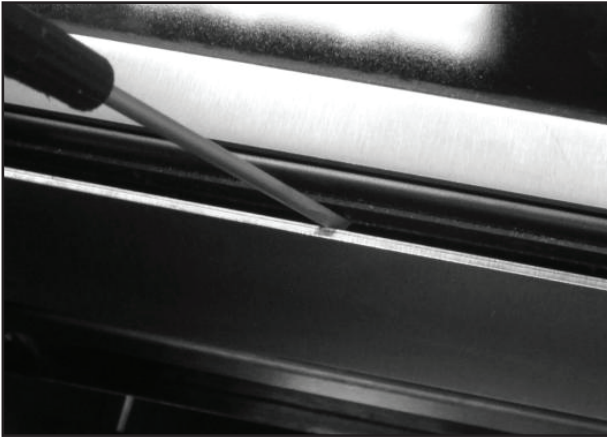

### Kit Contains:

Downdraft Door  
Downdraft Door Support Plate  
Tube of Silicone  
Alcohol Wipes  
Instruction Sheet

### Tools Needed:

- Caulking Gun
- Small Screwdriver

1. Remove the old downdraft door assembly by opening the door and prying off with a small screw driver. See *Figure 1*.

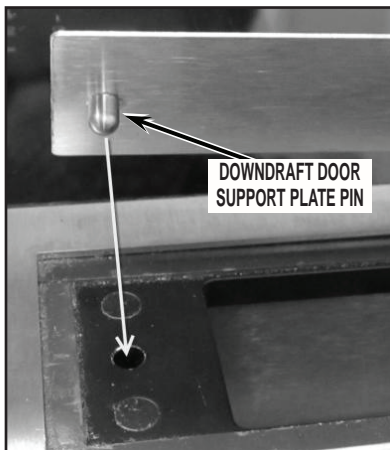

**FIGURE 1**

2. Clean the new surfaces to be glued on the downdraft door and the downdraft door support plate with the alcohol wipes and a lint-free cloth in order to avoid any contamination of grease, oil, dust, water, old adhesives/sealants. Let dry for 1 minute. See *Figure 2*.

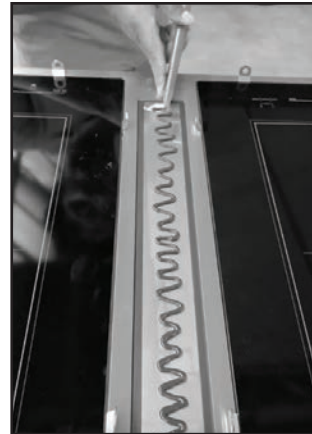

**FIGURE 2**

3. Insert the downdraft door support plate pins into the frame of the door opening. See *Figure 3*.

**FIGURE 3**

4. Apply silicone to the center of the downdraft door support plate keeping it away from the sides edges as illustrated. See *Figure 4*.

**FIGURE 4**

5. Apply the downdraft door with the logo up and facing you as illustrated applying slight pressure downward making sure that the gaps are the same and the cover sits flush. See *Figure 5*.

**IMPORTANT:** If the downdraft door does not sit flush remove and apply more silicone to the low areas and repeat.

**NOTE:** Allow unit to dry for 24 hours before use.
