LCD Projection TV HD-Monitor Operating Instructions

© 2003 Sony Corporation

To prevent fire or shock hazard, do not expose the LCD Projection TV to rain or moisture.

This symbol is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

To prevent electric shock, do not use this polarized AC plug with an extension cord, receptacle or other outlet unless the blades can be fully inserted to prevent blade exposure.

This television receiver provides display of television closed captioning in accordance with §15.119 of the FCC rules.

The model and serial numbers are located at the rear of the LCD Projection TV, below the Sony logo, on the sticker, and also on the TV box (white label). Record these numbers in the spaces provided below. Refer to them whenever you call upon your Sony dealer regarding this product.

Model No._____
Serial No._____

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Use of this television receiver for other than private viewing of programs broadcast on UHF, VHF, transmitted by cable companies or satellite for the use of the general public may require authorization from the broadcaster/cable company and/or program owner.

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antennas.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your warranty and your authority to operate this equipment.

This document is for the remote control RM-Y914. MODEL: KDF-60XBR950, KDF-70XBR950 Please keep this notice with the instruction manual. Operate the LCD Projection TV only on 120 V AC. The plug is designed, for safety purposes, to fit into the wall outlet only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.

If any liquid or solid object should fall inside the cabinet, unplug the LCD Projection TV immediately and have it checked by qualified service personnel before operating it further.

If you will not be using the LCD Projection TV for several days, disconnect the power by pulling the plug itself. Never pull on the cord.

For details concerning safety precautions, see "Important Safeguards" on page 4.

To prevent internal heat buildup, do not block the ventilation openings.

Do not install the LCD Projection TV in a hot or humid place, or in a place subject to excessive dust or mechanical vibration.

Avoid operating the LCD Projection TV at temperature below 41°F (5°C).

If the LCD Projection TV is transported directly from a cold to a warm location, or if the room temperature changes suddenly, the picture may be blurred or show poor color. In this case, please wait a few hours to let the moisture evaporate before turning on the LCD Projection TV. To obtain the best picture, do not expose the screen to direct illumination or direct sunlight. It is recommended to use spot lighting directed down

from the ceiling or to cover the windows that face the screen with opaque drapery. It is desirable to install the LCD Projection TV in a room where the floor and walls are not of a reflective material.

As an ENERGY STAR[®] Partner, Sony Corporation has determined that this product meets the ENERGY STAR[®] guidelines for energy efficiency.

ENERGY STAR[®] is a U.S. registered mark. TruSurround, SRS and the ()[®] symbol are trademarks of SRS Labs, Inc. TruSurround technology is incorporated under license from SRS Labs, Inc. BBE and BBE Symbol are trademarks of BBE Sound, Inc. and are licensed by BBE Sound, Inc. under U.S. Patent No. 4,638,258 and 4,482,866. "Dolby", "Pro Logic", and the double-D symbol are trademarks of Dolby Laboratories.

Pour prévenir les chocs électriques, ne pas utiliser cette fiche polarisée avec un prolongateur, une prise de courant ou une autre sortie de courant, sauf si les lames peuvent tre inserées à fond sans en laisser aucune partie à decouvert.

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

11) Only use attachments/accessories specified by the manufacturer.

- 12) Use only with the cart, stand, tripod,
 - bracket, or table specified by the
 - manufacturer, or sold with the apparatus.
 - When a cart is used, use caution when
 - moving the cart/apparatus combination
 - to avoid injury from tip-over.
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- 15) Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

For your protection, please read these instructions completely, and keep this manual for future reference.

Carefully observe and comply with all warnings, cautions and instructions placed on the set or described in the operating instructions or service manual.

To guard against injury, the following basic safety precautions should be observed in the installation, use and servicing of the set.

This set should be operated only from the type of power source indicated on the serial/model plate. If you are not sure of the type of electrical power supplied to your home, consult your dealer or

local power company. For those sets designed to operate from battery power, refer to the operating instructions.

This set is equipped with a polarized AC power cord plug (a plug having one blade wider than the other), or with a three-wire grounding type plug (a plug having a third pin for grounding). Follow the instructions below:

This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit,

contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the polarized plug by forcing it in.

This plug will only fit into a groundingtype power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to have a suitable outlet installed. Do not defeat the safety purpose of the grounding plug.

Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock.

ettest.

Always turn the set off when it is not being used. When the set is left unattended and unused for long periods of time, unplug it from the wall outlet as a precaution against the

possibility of an internal malfunction that could create a fire hazard.

If a snapping or popping sound from a TV set is continuous or frequent while the TV is operating, unplug the TV and consult your dealer or service technician. It is normal for some TV sets to make occasional snapping or popping sounds, particularly when being turned on or off.

Never push objects of any kind into the set through the cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the set.

Do not use attachments not recommended by the manufacturer, as they may cause hazards.

Clean the cabinet of the LCD Projection TV with a dry soft cloth. To remove dust from the screen, wipe it gently with a soft \Box_{C}^{f}

with a cloth slightly dampened with

solution of mild soap and warm water. Never use strong solvents such as thinner or benzine for cleaning.

If the picture becomes dark after using the LCD Projection TV for a long period of time, it may be necessary to clean the inside of the LCD Projection TV. Consult qualified service personnel.

1 t

The screen surface has a special coating to reduce a picture displayed by reflecting. If you clean the screen surface in the wrong way, the screen may be damaged. To clean the screen, do as follows:

Clean the screen with a soft cloth, such as the supplied cleaning cloth or a glass cleaning cloth. To remove hard contamination, use the supplied cleaning cloth or a glass cleaning cloth moistened with a solution of mild detergent and water. Do not use any type of abrasive pad, alkaline cleaner, acid cleaner, scouring powder, chemical cloth, or solvent such as alcohol, benzene or thinner, as these may scratch the screen's coating.

Do not use power-line operated sets near water — for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.

Do not place the set on an unstable cart, stand, table or shelf. The set may fall, causing serious injury to a child or an adult and serious damage to the set. Use only a cart or stand recommended by the manufacturer for the specific

model of LCD Projection TV. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

The slots and openings in the cabinet and in the back or bottom are provided for necessary ventilation. To ensure reliable operation of the set, and to protect it from overheating, these slots and openings must never be blocked or covered.

Never cover the slots and openings with a cloth or other materials.

Never block the slots and openings by placing the set on a bed, sofa, rug or other similar surface.

If an outdoor antenna is installed, follow the precautions below. An outdoor antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can come in contact with such power lines or circuits.

WHEN INSTALLING AN OUTDOOR ANTENNA SYSTEM, EXTREME CARE SHOULD BE TAKEN TO KEEP FROM CONTACTING SUCH POWER LINES OR CIRCUITS AS CONTACT WITH THEM IS ALMOST INVARIABLY FATAL.

Be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges.

Section 810 of the National Electrical Code (NEC) in USA and Section 54 of the Canadian Electrical Code in Canada provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. For added protection for this television receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to the receiver due to lightning and power-line surges.

Unplug the set from the wall outlet and refer servicing to qualified service personnel under the following conditions:

RATED OR

When the power cord or. plug is damaged or frayed. If liquid has been spilled into the set. If the set has been exposed to rain or water. If the set has been subject to excessive shock by being dropped, or the cabinet has been damaged. If the set does not operate normally when following the operating instructions. Adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in

damage and will often require extensive work by a qualified technician to restore the set to normal operation.

When the set exhibits a distinct change in performance, it indicates a need for service.

Do not attempt to service the set by yourself since opening the cabinet may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

When replacement parts are required, be sure the service technician certifies in writing that he has used replacement parts specified by the manufacturer that have the same characteristics as the original parts.

Unauthorized substitutions may result in fire, electric shock or other hazards.

Upon completion of any service or repairs to the set, ask the service technician to perform routine safety checks (as specified by the manufacturer) to determine that the set is in safe operating condition, and to so certify. When the set reaches the end of its useful life, improper disposal could result in a picture tube implosion. Ask a qualified service technician to dispose of the set.

When you place the LCD Projection TV in position, be careful not to drop it on your foot or fingers.

Watch your footing while installing the LCD Projection TV.

If you carry the LCD Projection TV in a manner other than the specified manner and without the specified number of persons, it may drop and a serious injury

persons, it may drop and a serious injury may be caused. Be sure to follow the instructions mentioned below.

i.	Carry the LCD Projection TV with the specified
	number of persons (see page 18).
÷	Do not carry the LCD Projection TV holding the
	speaker grill.
	Hold the LCD Projection TV tightly when carrying
ľ	""it.

Although the LCD projection TV is made with highprecision technology, black dots may appear or bright points of light (red, blue, or green) may appear constantly on the LCD screen. This is a structural property of the LCD panel and is not a malfunction.

If direct sunlight or other strong illumination shines on the screen, part of the screen may appear white due to reflections from behind the screen. This is a structural property of the LCD Projection TV. Do not expose the screen to direct illumination or direct sunlight.

The picture quality may be affected by your viewing position. If you sit too close to the TV, you may suffer from eye fatigue.

For the best picture quality, install your LCD projection TV according to the operating instructions.

Sit at least 2.2 m (approx. 7 ft.) for KDF-60XBR950 or 2.6 m (approx. 8 ft.) for KDF-70XBR950 away from your LCD projection TV, and within 60° of the vertical viewing area, and 130° of the horizontal viewing area.

When installing your LCD Projection TV against a wall, keep it at least 10 cm (4 inches) from the wall. Avoid installing the LCD projection TV near a heater, etc.

Your LCD projection TV uses a projection lamp as its light source. When the projection lamp wears out after using the LCD projection TV for a long period of time, the screen image becomes dark, or no image will appear on the display. If the lamp replacement indicator of the front panel blinks in red, replace the lamp with a new one (not supplied). In some cases, the bulb bursts inside the lamp unit noisily, but the lamp unit is securely designed so that the pieces of broken glass remain inside the lamp unit. (See "Replacing the Lamp" on page 13.)

This LCD projection TV uses a cooling fan to prevent the internal temperature from heating up. You might hear the noise from the cooling fan, depending on the place you install the LCD projection TV.

Introducing the Sony LCD Projection TV

Thank you for purchasing the Sony LCD Projection TV. This manual is for models KDF-60XBR950 and KDF-70XBR950.
Some of the features that you will enjoy with your new LCD projection TV include:
Integrated HDTV: You can watch digital television programs and enjoy the improved audio/video quality offered by these programs.
DRC [®] (Digital Reality Creation) Multifunction V1: Unlike conventional line doublers, the DRC feature converts frames reproduced every 1/60th of a second in real time, minimizing the blur or ghost of the motion images (for 480i signals only).
CineMotion [™] : Using the reverse 3-2 pull down technology, the CineMotion feature allows you to obtain a smooth picture movement when playing back movies or other video sources on film.
Twin View ^{TM} : Using Multi-Image Driver (MID-X), Twin View allows you to watch two programs side by side with the ability to zoom in on one picture and listen to the program in the selected window. You can watch pictures from two different sources (1080i, 720p, 480p or 480i) simultaneously.
Memory Stick[®] Viewer: Allows you to view on your LCD Projection TV screen digital photos (JPEG) and movies (MPEG1) that are stored on Memory Stick media.
Parental Control: V-Chip technology allows parents to block unsuitable programming for younger viewers.
Digital Visual Interface (DVI-HDTV): Can accommodate a copy- protected digital connection (HDCP [*]) to other devices (such as digital set-top boxes) that have compatible interfaces. The DVI-HDTV input terminal is compliant with the EIA-861 standard and is not intended for use with personal computers.

* High-bandwidth Digital Content Protection

(Continued)

i.LINK: Provides a secure digital interface to other digital home entertainment devices. i.LINK allows for the secure transfer of copyright-protected high-definition content between these devices and your LCD projection TV. The i.LINK is not compatible with personal computers.

Component Video Inputs: Offers the best video quality for DVD (480p, 480i) and Digital Set-top box (1080i, 720p, 480p, 480i) connections.

S-VIDEO Inputs: Provides a high-quality image for connected equipment.

Favorite Channel Preview: Preview up to sixteen favorite channels without leaving the current channel.

Wide Screen Mode: Allows you to watch 4:3 normal broadcasts in wide screen mode (16:9 aspect ratio).

Auto Wide: Allows you to select the wide screen mode automatically.

We recommend that you carefully review the contents of the following three sections in the order shown to ensure that you fully understand the operation of your new LCD projection TV.

Installing and Connecting the LCD Projection TV This section guides you through your initial setup. It shows you how to install your LCD projection TV, to connect your new components and to connect the antenna and cable.

Using the Features

This section shows you how to begin using your new LCD projection TV. It also shows you how to use your remote control functions.

Using the menus

This section teaches you how to access on-screen menus and adjust your LCD projection TV settings.

Instructions in this manual are written for the remote control. Similar controls are also found on the LCD projection TV console.

The indicators show the current status of your LCD projection TV.

To minimize screen reflection, its surface has a special coating. Read the instructions "Use of the Cleaning Cloth" on page 12 carefully before cleaning.

Inappropriate cleaning methods could damage the finishing.

Your LCD projection TV uses a projection lamp as its light source. Note the following:

After turning on your LCD projection TV, it may take a while before the picture appears (1 minute or less).

When the projection lamp wears out, the screen image becomes dark. Replace the lamp with a new Sony XL-2100U replacement lamp (not supplied).

Be sure to attach the lamp cover securely; otherwise, your LCD projection TV will not turn on. For details on lamp replacement, see "Replacing the Lamp" on page 13.

The light emitted from the lamp is quite bright when your LCD projection TV is in use. To avoid eye discomfort or injury, do not look into the housing when the power is on.

Notes on the LCD Projection TV

Be sure not to allow sunlight or light from a lamp to shine directly onto the screen.

The screen surface is easily scratched. Do not rub, touch, or tap it with a sharp or abrasive object (see "Use of the Cleaning Cloth" below).

If your LCD projection TV is transported directly from a cold to a warm location, is placed in a humid room, or if the room temperature changes suddenly, the picture may be blurred or show poor color. This is because moisture has condensed on the lenses inside. If this happens, leave the power on and let the moisture evaporate before using your LCD projection TV.

Turn off the main power on the front of your LCD projection TV before going to sleep or going out. Disconnect the AC plug if idle for more than 7 days.

Be sure to turn off the power switch on the main unit or on the remote control. After turning off the power, the fan will continue to blow for about two minutes. Be sure to wait for several minutes after turning the power off when unplugging from the outlet or switching the breaker off.

Before carrying, unplug the power cord and disconnect all cables. Do not carry the LCD projection TV by placing hands under the front screen.

Use of the Cleaning Cloth

To remove dust from the front of the screen, wipe with the supplied Cleaning Cloth.

- Do not use any type of abrasive pad, alkaline cleaner, scouring powder, window cleaners or solvent such as alcohol or benzene. Otherwise, this type of contact may result in a damaged screen.
- To clean the screen, please use the supplied Cleaning Cloth lightly moistened with water diluted mild detergent solution. Do not apply heavy press when cleaning.
- The supplied Cleaning Cloth is washable with warm water and a mild detergent solution, and can be used repeatedly.

The projection lamp has a limited life which illuminates the picture.

If the screen becomes dark, the color looks unusual, or the LAMP indicator on the front of the LCD projection TV flashes, it is time to replace the lamp with a new one (not supplied).

Electric appliances can cause fire or high temperature, resulting in injury or death. Be sure to follow the instructions below.

Use a Sony XL-2100U replacement lamp (not supplied) for replacement. Failure to do so may damage the LCD projection TV.

Do not remove the lamp for any purpose other than replacement. Failure to do so may cause fire or a skin burn.

Before replacing the lamp, turn the power off on the main unit, then several minutes later, unplug the power cord. (The cooling fan will continue to blow for about two minutes after turning the power off.)

Before replacing the lamp, let it cool down completely, as the surface of the lamp remains extremely hot for at least 30 minutes after the power has been turned off.

Do not leave the removed lamp near flammable materials or within the reach of children.

Do not pour water onto the removed lamp, or put any object inside the lamp. Doing so may cause the lamp to burst.

Do not put flammable materials and metal objects inside the lamp receptacle of the LCD projection TV after removing the lamp. Doing so may cause fire or electrical shock. Also, be sure not to touch the receptacle, because it may cause a skin burn.

Mount the new lamp securely, otherwise the screen may become dark, or it may cause a fire.

Do not touch the glass with your fingers on the new lamp.

Used lamp contains Mercury, Dispose According to Local, State or Federal Laws.

Do not touch the front glass of a new lamp or the glass of the lamp receptacle. This may reduce picture quality or lamp life.

(Continued)

Turn off the power switch on the LCD projection TV and after several minutes, unplug the power cord. (The cooling fan will continue to blow for about two minutes after turning the power off.)

Do not touch the front glass of a new lamp or the glass of the lamp receptacle. This may reduce picture quality or lamp life.

Unplug the power cord after turning off the main power. Wait at least 30 minutes to allow the lamp to cool down before replacing it. Take the new lamp out of the box.

Remove the control panel cover.

Push and release the center in the upper of the control panel cover to open it.

Loosen the screw in the right underneath with a coin or similar object and remove the control panel cover.

Loosen the screw with a coin or similar object to remove the lamp cover.

Loosen the two screws that secure the lamp, then pull out the lamp. The lamp is very hot immediately after use. Never touch the front glass of the lamp or the surrounding parts.

Loosen the two screws as shown in the illustration using the hex key supplied with the lamp. Hold the handle and pull straight out.

After it has cooled, place the removed lamp into the empty box of the replacement lamp. Never put the removed lamp into a plastic bag.

Mount the new lamp. Be sure to attach the new lamp securely.

into the lamp receptacle.

Tighten the two screws securely as shown in the illustration using the hex key supplied with the lamp.

Mount the lamp cover and tighten the screw. Make sure that the lamp cover is mounted securely, otherwise the power will not turn on.

If the lamp cover is not mounted securely, the self-diagnostic function works and the POWER/STANDBY indicator flashes for three times.

Mount the front panel in the order of ① to ③, as shown in the illustration.

 Match the projection of the left side.
 Secure the screw of the right side.
 Close the front panel.

Lonsult your Sony dealer for a Sony XL-2100U replacement lamp.

Take great care when replacing the lamp or plugging in/unplugging the connecting cords. If you handle them roughly, the LCD projection TV may fall or be moved, and the TV stand or floor surfaces may be scratched.

Installing and Connecting the LCD Projection TV

The box contains your new LCD projection TV, a remote control and two AA (R6) batteries. No peripheral cables are included. If you intend to add additional equipment to your LCD projection TV, please check the hookup instructions for your desired setup before you begin. You may need to purchase cables and/or splitters to complete the hookup properly.

Insert two size AA (R6) batteries (supplied) by matching the + and - on the batteries to the diagram inside the battery compartment.

- Remove the batteries to avoid damage from possible battery leakage whenever you anticipate that the remote control will not be used for an extended period.
- Handle the remote control with care. Avoid dropping it, getting it wet, or placing it in direct sunlight, near a heater, or where the humidity is high.
- Your remote control can be programmed to operate most video equipment. (See "Programming the Remote Control" on page 48.)

Carrying the LCD projection TV requires at least four people. Do not grasp the pedestal or the front panel of the LCD projection TV, otherwise these parts might break off.

When moving the LCD projection TV, support the screen bottom with one hand while grasping the top part with the other hand, as shown in the illustration below.

Pay special attention to children around the LCD projection TV. If children should climb onto or push the LCD projection TV or its stand SU-GW3 (not supplied), it may fall down.

Keep your LCD projection TV at least 10 cm (4 inches) from the wall.

The picture quality may be affected by your viewing position.

For the best picture quality, install your LCD projection TV within the areas shown below.

Sit at least 2.2 m (approx. 7 ft.) for KDF-60XBR950 or 2.6 m (approx. 8 ft.) for KDF-70XBR950 away from your LCD projection TV, and within 60° of the vertical viewing area, and 130° of the horizontal viewing area.

Front Panel Menu Controls

The front panel menu controls allow access to the on-screen menus without using the remote control. Pressing brings up the on-screen menus. The arrow buttons move the on-screen cursor in the menus and by pressing the - ϕ - button selects the menu item.

To Do This ... Do This ...

Switch the TV's input betweenPressto switch back and forth between thethe cable and antennaTV's VHF/UHF and CABLE inputs.

- It is highly recommended to connect the antenna using a 75-ohm coaxial cable to get optimum picture quality. A 300-ohm twin lead cable can be easily affected by radio noise and the like, resulting in signal deterioration. If you use a 300-ohm twin lead cable, keep it away as far as possible from the LCD projection TV.
- Do not use an indoor antenna because it is especially susceptible to radio noise.

Cable Box and Cable Only

Your cable company scrambles some channels, such as premium channels (which requires you to use a cable box), but does not scramble all channels.

You do not have a VCR. (If you have a VCR, see pages 32 and 33.)

Use the LCD projection TV remote control to change channels coming through the cable box to the LCD projection TV's VHF/UHF input jack. (You must first program the remote control for your specific cable box; see "Programming the Remote Control" on page 48.)

Use the LCD projection TV remote control to change channels coming directly into the LCD projection TV's CABLE input. (The LCD projection TV's tuner provides a better signal than the cable box.)

. About Using This Connection with Dual Picture (Twin View, etc.) Features

With this connection, you can use all the dual picture features for unscrambled channels coming directly into the LCD projection TV's CABLE input jack.

	To Do This	Do This
· · · ·	Use the cable box	Tune the LCD projection TV to the channel the cable box is set to (usually channel 3 or 4) and then use the cable box to switch channels.
: 	Set up the LCD projection TV remote control to operate the cable box	Program the remote control. See "Programming the Remote Control" on page 48.
- S. 	Activate the remote control to operate the cable box	Press repeatedly until the indicator lights up.
· · ·		

Prevent the accidental switching of TV channels	When using the cable box, you need the LCD projection TV to stay on the channel the cable box is set to (usually channel 3 or 4). You can use the LCD projection TV's Channel Fix feature to lock in a specific channel. For details, see "Using the Channel Menu" on page 96.
	Press to switch back and forth between the LCD projection TV's VHF/UHF (scrambled channels) and CABLE (unscrambled) inputs.

Cable Box Only

Your cable company scrambles all channels, which requires you to use a cable box.

You do not have a VCR. (If you have a VCR, see pages 32 and 33.)

Use the LCD projection TV remote control to change channels coming through the cable box to the LCD projection TV's VHF/UHF jack. (You must first program the remote control for your specific cable box.)

About Using This Connection with Dual Picture (Twin View, etc.) Features

With this connection, all channels come into the LCD projection TV through your cable box and only one unscrambled signal is sent to the LCD projection TV, so you cannot use the dual picture features. If some of your channels are scrambled, but others are not, consider using the "Cable Box and Cable Only" connection on page 28 instead.

Connect the CATV cable to the cable box's input jack.

Use a coaxial cable to connect the cable box's output jack to the LCD projection TV's VHF/UHF jack.

Run the Auto Setup program, as described in "Setting Up the LCD Projection TV Automatically" on page 45.

To do this	Do This
	Tune the LCD projection TV to the channel the cable box is set to (usually channel 3 or 4) and then use the cable box to switch channels.
	Program the remote control. See "Programming the Remote Control" on pages 48.

Use this hookup if:

You have cable TV that does not require a cable box.

Connect the cable TV cable to the VCR's IN jack.

Using a coaxial cable, connect the VCR's OUT jack to the LCD projection TV's CABLE jack.

Using AUDIO and S VIDEO cables, connect the VCR's Audio and S Video OUT jacks to the LCD projection TV's AUDIO and S VIDEO IN jacks.

32

Use this hookup if:

Your cable TV company scrambles some channels, but not all of them (pay channels vs. regular cable channels) and you need to use a cable box, and

You want to enjoy the Twin View feature.

With this setup you can:

Use the LCD projection TV remote control to change channels on your cable box when the signal is scrambled. To program your Sony remote control to operate your cable box, see "Programming the Remote Control" on page 48.

Use the LCD projection TV remote control to change channels using your LCD projection TV when the signal is not scrambled. Your LCD projection TV's tuner provides a better signal than the cable box.

Use the Twin View feature. (When all channels are routed through your cable box, only one signal is sent to the LCD projection TV, so you cannot use the Twin View feature.)

Connect the CATV cable to the single (input) jack of the splitter.

Use a coaxial cable to connect one of the splitter's two output jacks to the TV's CABLE jack.

Use a coaxial cable to connect the splitter's other output jack to the cable box's input jack.

Use a coaxial cable to connect the cable box's output jack to the VCR's RF input jack.

Use an A/V cable to connect the VCR's A/V output jacks to the LCD projection TV's A/V input jacks.

Use a coaxial cable to connect the VCR's RF output jack to the LCD projection TV's VHF/UHF jack.

Run the Auto Setup program, as described in "Setting Up the LCD Projection TV Automatically" on page 45.

To view scrambled channels, set your LCD projection TV to channel 3 or 4 (depending on your cable box output). Change channels using your cable box.

(Continued)

If you are connecting a digital cable box, you will need a special bi-directional splitter designed to work with your cable box. **Coaxial cable** Rear of LCD ╓┌┍ projection TV $(\bigcirc$ Ō \bigcirc ABLE VHF/UHF (Markyv R A AUDIO บธระส 8 ⁰ 12.042 \$544X) 758742 H Coaxial S VIDEO g VEFAM cable AUDIO AUDIO \bigcirc IDEO AUDIO AUDIO -23 Ŕ ..¦s NYACZ MAZ ¥I, :04:, HOYOVD IN (\bigcirc) our 55 CONTRAM R VIDEO (yellow) AUDIO-L (white) 6 2 Splitter AUDIO-R (red) VCR S VIDEO AUDIO L. Set your LCD projection TV and VCR to channel 3 or 4, depending on your cable box channel output. Pressing ANT on the remote control switches between the channels coming in through the cable box (scrambled) and those coming directly to the LCD projection TV (unscrambled).

If you connect two VCRs, you can record from one VCR to the other while using your LCD projection TV to monitor what is being recorded.

Using AUDIO and VIDEO cables, connect the playback VCR's Audio and Video OUT jacks to the recording VCR's Audio and Video IN jacks.

Using AUDIO and VIDEO cables, connect the recording VCR's Audio and Video OUT jacks to the LCD projection TV's AUDIO and VIDEO IN jacks.

VC-810S/820S/830S (not supplied)

VC-810S/820S/830S (not supplied)

- To perform tape editing, set the LCD projection TV to the video input intended for playback by pressing TV/VIDEO on the remote control.
- You may need to change the video input on your VCR. Consult your VCR's operating manual for instructions.
- If your VCRs have an S VIDEO jack: For best picture quality, use an S VIDEO connection instead of the yellow video cable on your combined A/V cable.

Using an S VIDEO cable, connect the playback VCR's S VIDEO OUT jack to the recording VCR's S VIDEO IN jack. S VIDEO does not provide audio, so audio cables must be connected to provide sound.

You cannot record signals from equipment connected to the Y, PB, PR input. Connect the satellite antenna cable to the satellite receiver's SATELLITE IN jack.

Using AUDIO and S VIDEO cables, connect the satellite receiver's AUDIO and S VIDEO OUT jacks to the LCD projection TV's AUDIO and S VIDEO IN jacks.

Connect a coaxial cable from your cable or antenna to the LCD projection TV's VHF/UHF or CABLE jack.

If your satellite receiver is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.

Connect the satellite antenna cable to the satellite receiver's SATELLITE IN jack. Connect the CATV cable to the VCR's VHF/UHF IN jack. Using a coaxial cable, connect the VCR's VHF/UHF OUT jack to the LCD projection TV's CABLE jack. Using AUDIO and S VIDEO cables, connect the satellite receiver's AUDIO and S VIDEO OUT jacks to the VCR's AUDIO and S VIDEO IN jacks. Using AUDIO and S VIDEO cables, connect the VCR's AUDIO and S VIDEO OUT jacks to the LCD projection TV's AUDIO and S VIDEO IN jacks.

Rear of LCD projection TV

⁽Continued)

Be sure your VCR's video input is set correctly. Consult your VCR's operating manual for instructions.

✓ Use TV/VIDEO to select

- VIDEO 1 to watch satellite TV or the VCR (your VCR must be turned on).
- VHF/UHF to watch cable TV.

Using audio cables, connect the LCD projection TV's AUDIO OUT (VAR/ FIX) jacks to the audio receiver's audio LINE IN jacks.

Rear of LCD projection TV

This is the preferred hookup to use if:

Your DVD player has component (Y, B-Y, R-Y) jacks.

Using three separate component video cables, connect the DVD player's Y, B-Y and R-Y jacks to the Y, PB and PR jacks on the LCD projection TV. Use the HD/DVD IN 5 or 6 connections.

The Y, B-Y and R-Y jacks on your DVD player are sometimes labeled Y, CB and CR, or Y, PB and PR. If so, connect the cables to like colors.

Using an audio cable, connect the DVD player's Audio OUT jacks to the LCD projection TV's AUDIO IN jacks. Be sure to use the same row of inputs that you used for the video connection (HD/DVD IN 5 or 6).

40

Use this hookup if: Your DVD player does not have component (Y, PB, PR) jacks. If your DVD player has video component output connectors: for best picture quality use the connection described on page 40. Using audio cables, connect the DVD player's Audio OUT jacks to the LCD projection TV's AUDIO IN jacks. Using an S VIDEO cable, connect the DVD player's S VIDEO jack to the LCD projection TV's S VIDEO jack. RK-C310/C320/C330 (not supplied)

To take advantage of the Wide Screen modes, set the TV's aspect ratio to 16:9 on your DVD player. For details, refer to the operating instructions supplied with your DVD player.

AN OUT

2200787X 8

- Use TV/VIDEO on the remote control to switch between the VCR, DVD player and cable TV inputs.
- If your VCR is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.

For easy connection of the camcorder, the LCD projection TV has front Audio and Video inputs (shown below). However, if you prefer, you can also connect the camcorder to the LCD projection TV's rear AUDIO and VIDEO IN jacks.

Using AUDIO and S VIDEO cables, connect the camcorder's Audio and S VIDEO OUT jacks to the LCD projection TV's AUDIO and S VIDEO IN jacks.

- If you have a mono camcorder, connect its left audio output to the LCD projection TV's AUDIO L (MONO) jack.
- If your camcorder is not equipped with S VIDEO, use a VIDEO cable (yellow) instead of the S VIDEO cable.

You can use the LCD Projection TV's DIGITAL AUDIO (OPTICAL) OUT jack to connect a digital audio device that is PCM/Dolby digital compatible, such as an audio amplifier.

Using an optical cable, connect the device's OPTICAL IN jack to the LCD Projection TV's DIGITAL AUDIO (OPTICAL) OUT jack.

CONTROL S allows you to control your LCD projection TV system and other Sony equipment with one remote control. In addition to allowing you to control multiple devices with one remote control, the CONTROL S feature allows you to always point your remote control at your LCD projection TV, instead of having to point it at the other equipment, which might be hidden or out of direct line of sight.

After you finish connecting your LCD projection TV, you need to run Auto Setup to set up available analog and digital channels. The Auto Program screen appears when you turn your LCD projection TV on for the first time after installing it. If you do not want to set up the channels at this time, you can do it later by using the Auto Program feature in the Channel menu (see page 96).

In the Auto Setup feature does not apply for installations that use a cable box for all channel selection.

Using Auto Setup

Press on the front panel of your LCD projection TV to turn on the LCD projection TV. The Initial Setup screen appears.

Auto Program may take up to 30 minutes to complete. A progress bar is displayed while the channel list is being created.

You can run Auto Program by selecting it in the Channel menu, as described on page 96.

Using the Features

The following table describes the buttons on the remote control that are for more advanced functions.

The remote control is preset to operate Sony brand video equipment.

·		Equipment	
		Sony DVD player	
۰.	SAT/CABLE	Sony DSS tuner	
• • •	i,LINK	Sony DVD player (i.LINK)	901

If you have video equipment other than Sony brand that you want to control with the LCD projection TV's remote control, use the following procedure to program the remote control.

The equipment must have infrared (IR) remote capability in order to be used with the remote control.

Turn to the list of "Manufacturer's Codes" on page 49, and find the three-digit code number for the manufacturer of your equipment. (If more than one code number is listed, use the number listed first.)

Press repeatedly until the DVD/VCR, SAT/CABLE or i.LINK indicator lights up.

Press for five seconds until the indicator of the selected input flashes.

While the desired indicator is flashing, enter the three-digit manufacturer's code number.

Press

You must do step 5 within 10 seconds of step 4, or you must redo steps 4 through 5.

To check if the code number works, aim the LCD projection TV's remote control at the equipment and press that corresponds with that equipment. If it responds, you are done. If not, try using another code listed for that manufacturer.

If more than one code number is listed, try entering them one by one until you come to the correct code for your equipment.

If you enter a new code number, the code number you previously entered at that setting is erased.

In some cases, you may not be able to operate your equipment with the supplied remote control. In such cases, use the equipment's own remote control unit.

Whenever you remove the batteries to replace them, the code numbers may revert to the factory setting and must be reset.

Many TV features can be accessed directly through the remote control. The following will explain the function of some of the buttons found on your remote control.

Buttons for LCD Projection TV Operations

Press until the TV indicator lights up. This activates the remote control for use with the LCD projection TV.

Press to change between the VHF/UHF input and the CABLE input.

Press to turn the LCD projection TV on and off. If a video input indication (e.g., VIDEO 1, VIDEO 2) appears on the screen, press or until a channel number appears.

Use for direct channel selection. Press to select an analog channel (for example, to select channel 10, press 1 and 0). The channel will change after 3 seconds, or you can press for immediate selection.

For digital subchannels, press , , press again, and then

You can also select digital channels using the digital program guide. See page 60 for details.

Press to scan through the channels (+ up or - down).

Press to adjust the volume (+ up or - down).

Press to jump back and forth between the current channel and the last channel selected.

Press to mute the sound. "MUTING" will appear on the screen and will dim three seconds later. To restore the sound, press again or press

This is useful when you need to copy down information that appears on the LCD projection TV's screen (see "Using the Freeze Function" on page 58).

10

12

13

14

11

Press repeatedly to display the time in minutes (15, 30, 45, 60 or 90) that you want the LCD projection TV to remain on before shutting off.

To cancel Sleep Timer, press SLEEP repeatedly until SLEEP OFF appears.

Press to display a list of available i.LINK devices, and select the desired device from the list. See page 83 for details.

Press repeatedly to scroll through available video inputs: TV, VIDEO 1, VIDEO 2, VIDEO 3, VIDEO 4, VIDEO 5, VIDEO 6 and VIDEO 7.

If you select as a in the Setup menu, your LCD projection TV will skip the video input you selected (see "Video Label" on page 103).

Press to display the channel number, current time and channel label (if set). To turn the display off, press again.

Press repeatedly to directly choose one of three different video modes that best suits the program you are watching.

: Select for enhanced picture contrast and sharpness.

: Select to display a standard picture for home entertainment.

: Select to display a picture with minimum enhancements.

When you select each mode, you can also adjust the picture quality (such as Picture, Brightness, Color, etc.) to suit your taste. For details, see "Mode" on page 88.

The Favorite Channel feature lets you select programs from a list of favorite channels that you preset.

Creating a List of Favorite Channels

Displaying a List of

Favorite Channels

Press to display the Menu.

Press \blacklozenge or \blacklozenge to highlight the Channel icon and press (r).

Press (\mathbf{r}) to select Favorite Channels.

Press \clubsuit or \clubsuit to highlight a Favorite Channel number (1-16) and press (F).

Press \blacklozenge or \blacklozenge to highlight a channel you want to assign to the Favorite Channel number. A preview of the highlighted channel appears in the upper right of the screen.

Press (r) to select that channel as a Favorite Channel.

To add more channels to your favorites list, repeat steps 4-5.

To clear a Favorite Channel, press \blacklozenge or \clubsuit to highlight the channel you want to clear. Press (a) and then press

Press to exit the Menu.

For details on using the Channel Menu, see page 96.

Press

The Favorite Channel options appear.

Preview window

Favorite Channels

Press \blacklozenge or \blacklozenge to highlight the channel you want to watch. The program of that channel appears in the preview window. Press (\updownarrow) to select.

When the remote control mode is set to other than TV function, you can display the Favorite Channels. However, you cannot select the channel by using ▲ or ◀.

To assign Channel Labels (e.g., ABC, HBO, MTV, etc.) to channel numbers, as shown at right, use the Channel Label feature in the Channel Menu (see page 97). Twin View enables you to watch two programs at the same time. You can also change the size of both the left and right pictures.

Activating Twin Pictures

Make sure your LCD projection TV is tuned to a working channel.

11		··, · · · · ··	1,	1 <u>.</u>		-1. în
- 14 A.	Press		909	in (or	press	(\$).
	11000	<u>к. </u>	~~~~	miloi	Propp.	- ミキノフ?

Activating the Picture

(Continued)

A Hookups that affect your ability to use Twin View:

- If you are viewing all channels through the cable box, the Twin View feature will not work. The cable box only unscrambles one signal at a time, so the right picture will be the same as the left picture.
- You can watch a scrambled cable channel and another video source. Be sure your DVD player, VCR or satellite receiver are connected to one of the VIDEO IN 1-7 and antenna inputs on the rear of the LCD projection TV. Digital TV pictures, and pictures from equipment connected to HD/DVD IN 5 and 6, and DVI-HDTV IN 7, will only appear in the left picture, not in the right.
- \not The active picture is indicated by the ightharpoonup icon.

If you use a cable box to view all channels, the same channel appears in both windows because the cable box unscrambles only one channel at a time.

If you use a cable box, you can view the cable box output in one window and view a different source (such as a VCR or DVD player) in the second window by using the ______ button.

Digital TV channels, as well as any sources connected to the VIDEO 5, VIDEO 6, and VIDEO 7 inputs display in the left window, but not the right.

If you are viewing a 4:3 source and a 16:9 enhanced source (such as a DVD) side by side, the 4:3 source appears larger.

Twin View does not display channels that are blocked by parental settings (see page 98).

Changing the Picture Size

The zoom feature lets you change the size of the left and right pictures.

Press \leftarrow to activate the left picture (if not already activated).

Press → to activate the right picture (if not already activated).

Press \blacklozenge to enlarge the picture and \blacklozenge to reduce the picture.

When you adjust the twin screen sizes, the LCD projection TV memorizes the change. The next time you use the Twin View function, the memorized sizes appear.

The button allows you to temporarily capture a program's picture. You can use this feature to write down information such as phone numbers, recipes, etc.

When the program information you want to capture is displayed, press

The LCD projection TV switches to Twin View mode and displays the "frozen" picture on the right, while the current program continues on the left.

Current program

To cancel and return to normal viewing, press

🖄 Freeze feature is not available if you are already in Favorite Channel (see page 54), or Twin View[™] (see page 55) mode.

Wide Screen Mode lets you watch 4:3 normal broadcasts in several Wide Screen Modes (16:9 aspect ratio).

Press repeatedly to toggle through the following Screen Mode settings.

You can also access the Screen Mode settings in the Screen menu. For details, see page 94.

Wide Zoom

Normal

Full

Zoom

fill the 16:9 screen, keeping the original image as much as possible.

Wide Zoom enlarges the 4:3 picture to

Normal returns the 4:3 picture to its original size.

Full Mode stretches the 4:3 picture horizontally only, to fill the 16:9 screen.

Zoom Mode enlarges the 4:3 picture horizontally and vertically to an equal aspect ratio that fills the 16:9 screen. Useful for watching Letterbox movies.

When you change channels or inputs, the Screen Mode settings revert to Wide Zoom (or the 4:3 Default setting in the Screen menu). To retain the current Screen Mode setting as channels and inputs are changed, set 4:3 Default to Off. For details, see page 95.

Using the Digital Program Guide

This LCD projection TV is equipped to show digital programming, if a digital signal is present. The digital program guide and menus let you review program information, select digital channels and subchannels, set up your LCD projection TV's digital programming, and enable digital closed captioning.

🖉 Analog channels are not available in this guide.

Tune your LCD projection TV to a digital channel by using the , , and buttons.

Press on the LCD projection TV's remote control. The digital program guide appears, with the currently selected program showing in the background.

CSC	Outdoor Digest Mountain Challenge. Notable explorers and mountaineers converge to ascess one of the misst dangerous mountain ranges in the world. Time remaining 38 minutes	.C 1929 (17) (CC
Ch Z	SS Program Options Caption Vision 🗗 Digital Setup	
Ch 4	1 Outdoor Digest	
Ch 6 Ch 21	3 Sports Update State St	
Ch 43		

Program information in the guide is provided by the broadcasters. As a result, it may sometimes include only the channel number, without a program title or description.

The digital program guide and menus are not available while using multipicture functions (Twin View, Freeze, i.LINK, Memory Stick, or Favorite Channels).

Navigating the Digital Program Menus

Four digital menus are available on the digital program guide.

Digital Program Menu See Page
 Using the Guide Menu 61
Using the Program Options Menu 61
 Using the Caption Vision Menu 62
Using the Digital Setup Menu 62

Press (r) to select the desired option.

Using the Guide Menu

The Guide menu allows you to select digital channels and subchannels from a dropdown list. This list also provides information about the current program being shown on each digital channel.

Subchannels are additional channels of programming broadcast simultaneously. For example, channel 4 might include three subchannels (4.1, 4.2, 4.3) that are showing programs at the same time.

Using the Program Options Menu

The Program Options menu allows you to customize the settings of the program on the currently tuned channel.

Option Description

Each program has a main video stream, and may have alternate video streams. This option allows you to switch among these alternate video streams. Each program has a main audio stream (the audio that you hear when the channel is first tuned). This option allows you to switch among these alternate audio streams (e.g., for different languages).

	• •		• •	• •			•	 • •	• •	• •	• •	• •	 • •	• •	• •	 ••••						these alternate audio streams (e.g., for different languages).	

Using the Caption Vision Menu

The Caption Vision menu allows you to turn on/off digital closed captioning, and to modify how digital closed captioning is shown on your LCD projection TV. Depending on the program, digital closed captioning will be available in a number of different languages, aspect ratios, and reading levels.

Press ♠ or ♥ to select from the following six services. The service description, if available, applies to the currently tuned channel.

Option	Description
	Turns off closed captioning for digital programs
	= language (English, Spanish, French, etc.)
	= reader level (standard*, easy)
********	= aspect ratio (4:3, 16:9)
	* When set to this option, the option name is not shown
. 20111110000000000000000000000000000000	

The Caption Vision menu only affects digital channels. For closed captioning on analog channels, see "Using the Setup Menu" on page 102.

Using the Digital Setup Menu

The Digital Setup menu lets you change the way your digital channels are displayed.

The following digital setup functions are available:

This option is the same Option	Description
as the "Digital Channels" option. See	This option allows you to add new digital channels for the currently active antenna mode (Cable or VHF/UHF).
"Using the Channel Menu" on page 96.	This option is useful if the number of digital channels that your LCD projection TV is able to receive has recently been increased, but you do not want your LCD projection TV to perform a full Auto Setup.
	This option allows you to remove (hide) digital channels from the Digital Program Guide's list of channels and subchannels, as well as from channel surfing using . Hidden channels can still be directly tuned using and .
	Displays the current strength of the digital signal on VHF/ UHF, to allow you to adjust your antenna for optimal reception. (Does not apply to digital cable channels.)
	Allows you to customize digital closed captioning (see page 63 for details).

Customizing Caption Vision

You can use the Digital Caption Setup menu to customize your LCD projection TV's Caption Vision.

Select from the following options to change the visual characteristics of your LCD projection TV's digital closed captioning. A preview window displays a sample as you scroll through each option.

BONY	**************	1.11
200	· · · · · · · · · · · · · · · · · · ·	1.1.3
	1	. j
4 818	MEMORY STICK	

Memory Stick (sold separately) is a new, compact, portable, and versatile Integrated Circuit recording medium with a data capacity that exceeds that of a floppy disk. Memory Stick is specially designed for sharing digital data among Memory Stick compatible products such as digital cameras and digital video cameras. Because it is removable, Memory Stick can also be used for external data storage.

The Memory Stick Viewer on your LCD projection TV allows you to view files that are stored on Memory Stick media. You can view:

```
Digital photos (JPEG files)
```

Movies (MPEG1 files)

You can also play slide show background music using MP3 files stored on your Memory Stick.

For more information about handling Memory Stick media, see "Notes on Using Memory Stick Media" on page 78.

 Features
 With the Memory Stick Viewer, you can:

 View photo (JPEG) and movie (MPEG1) files in a thumbnail index or Slide Show

 Set customized Slide Show options, including transitions and background audio

 Pan, zoom, and rotate photos

 Lock (protect) or delete files on the Memory Stick

Memory Stick Compatibility

This television is compatible with the following Memory Stick media types: Memory Stick Media Memory Stick Duo Media Memory Stick Media with Memory Select Function Memory Stick PRO Media

Memory Stick PRO media features vary by and are dependent upon the design of host hardware devices. Memory Stick Pro in this LCD projection TV has been tested to support up to 1 GB media capacity and does not support high-speed transfer, MagicGate copyright protection technology, or access control security features.

File Compatibility

The Memory Stick Viewer is compatible with JPEG images taken with Sony digital still cameras and MPEG1^{*} movies taken with Sony digital cameras and camcorders. In order to be viewable in the Memory Stick Viewer, the files must have the following file name extensions:

File Type	Supported File Name Extensions
JPEG	.jpg .jpeg
and the second	.mpg .mpeg
· · · · · · · · · · · · · · · · · · ·	

Trademark Information

Memory Stick, Memory Stick PRO, and MagicGate are trademarks of Sony Corporation.

* Some variations of MPEG1 movies may not play back correctly.

If you are using a Memory Stick Duo, see "Inserting the Memory Stick Duo" on page 67.

Inserting a Memory Stick

Locate the Memory Stick slot and insert the Memory Stick into the Memory Stick slot as illustrated below. When inserted properly, it should slide in with little resistance and click into place.

Be sure to insert the Memory Stick in the correct direction. If the Memory Stick is forced in the wrong way, it may become damaged.

Insert only Memory Stick media into the Memory Stick slot. Attempting to insert other objects into the slot may damage the LCD projection TV.

To remove the Memory Stick, see "Removing a Memory Stick" on page 68.

Inserting the Memory Stick Duo

Memory Stick Duo is a new, compact version of the standard-sized Memory Stick recording medium.

CAUTION: Inserting the Memory Stick Duo incorrectly may result in permanent damage to the Memory Stick Duo and the LCD projection TV.

Before inserting a Memory Stick Duo into the LCD projection TV's Memory Stick slot, you must first insert the Memory Stick Duo into an adapter (sold separately).

CAUTION: Inserting the Memory Stick Duo into the Memory Stick slot without the adapter may result in permanent damage to the Memory Stick Duo and the LCD projection TV.

Insert the Memory Stick Duo and adapter as shown below.

CAUTION: Inserting the Memory Stick adapter backwards or upside down may result in permanent damage to the Memory Stick adapter and the LCD projection TV.

To remov	e the Memory	Stick Duo, see	"Removing a M	1emory Stick" on
page 68.	*****			
				• • • • • • • • • • • • • • • • • • • •

Removing a Memory Stick

Check that the Memory Stick indicator is off. (When the light is on, this indicates that the LCD projection TV is reading data from the Memory Stick.)

Removing the Memory Stick while a file is being accessed (when the Memory Stick indicator on the LCD projection TV's front panel is lit) may damage the Memory Stick or its contents.

Push the Memory Stick gently into the slot, and then release it. The Memory Stick media is ejected.

Pull the Memory Stick completely out of the slot.

To protect small children from injury from Memory Stick Media, remove all Memory Stick media from the LCD projection TV's Memory Stick slot and store it in a safe location when it is not in use.

When removing the Memory Stick, do not attempt to just pull it from its slot. Follow steps 1-3 (right). Turn on the LCD projection TV and insert a Memory Stick that contains the photo or movie files you want to view. For how to insert a Memory Stick, see page 66.

If the Memory Stick Index does not appear, press the MEMORY STICK button on the remote control.

The Memory Stick Index appears, which displays thumbnail images of the files stored on the Memory Stick.

	Allows you to selectively display specific file types within the selected folder.
	Displays all readable files.
	Displays only photo (JPEG) files.
	Displays only movie (MPEG1) files.

Memory Stick Menu The Memory Stick menu displays the current status of the Memory Stick, including total capacity, used capacity, and free capacity.

About DCF File Names

Names

Most Sony brand digital still and video cameras automatically record still photo and movie files using DCF compliant directory and file names.

If you selected the option, as described on page 77, you might want to have your digital camera's instruction manual handy in order to check how files and directories are organized for your specific model of digital camera.

DCF stands for "Design Rules for Camera File Systems," which are specifications established by the Japan Electronics and Information Technology Industries Association (JEITA: former JEIDA).

Memory Stick Precautions

When using Memory Stick media, follow these precautions:

To avoid permanent damage to still image data, do not turn off the LCD projection TV or remove Memory Stick media from the insertion slot while data is being read (as indicated by the Memory Stick indicator light being on).

Avoid touching the terminal of Memory Stick media or bringing it into contact with a metal object.

Do not drop, bend, or submit Memory Stick media to external shock.

Do not disassemble or modify Memory Stick media.

Avoid getting liquid on Memory Stick media.

Apply labels only within the designated label area.

To avoid permanent damage to still image data, do not use or store Memory Stick media in a location subject to:

High temperature (such as near a heater or inside a hot car) High humidity Direct sunlight Corrosive substances Magnetic fields Excessive dust Static electricity or electric noise Electric surges Store and carry Memory Stick media in its original case to ensure protection of stored data.

Save a backup of stored data.

Using i.LINK

This LCD projection TV is equipped with i.LINK, which provides a secure digital interface to other digital home entertainment devices, such as digital VCRs, digital camcorders, set-top boxes, and other devices that also are equipped with i.LINK. i.LINK allows for the secure transfer of copyright-protected digital content between these devices and your digital television.

i.LINK is a trademark of Sony Corporation and used only to designate that a product contains an IEEE 1394 connector.

All products with an i.LINK connector may not communicate with each other.

Using i.LINK Cables

This LCD projection TV has three S400 i.LINK terminals (one in the front panel, and two in the back panel). You can use the following i.LINK cables with this LCD projection TV:

4-pin i.LINK cable

Sony Model	Length
VMC-IL4415	1.5 meters
VMC-IL4435	3.5 meters

Do not use cables other than the ones listed above.

•••	To Do This	Do This	
•.	Set up a digital i.LINK	For digital i.LINK devices (devices that require only th	e
	device	i.LINK connection), no setup is necessary. The LCD projection TV automatically recognizes the device as so as the connection is made.	oon
34 	Set up an i.LINK device that supports an	Connect analog A/V cables to the VIDEO 3 input (see page 81).	
	EIA-775A analog connection	Use the i.LINK Control Panel to activate the analog connection to your i.LINK device (see page 86).	

To connect two or more i.LINK devices, use i.LINK cables to connect them as shown below.

You can connect up to 63 i.LINK devices. However, the maximum number of cables in any serial route is 16.

Do not connect i.LINK devices in a way that creates a loop.

Connecting non-compatible devices, such as PCs or PC peripherals, may result in malfunctions.

Before an i.LINK device can be viewed, it must first be selected via the i.LINK Device List.

Connect the i.LINK device that you wish to operate.

In For instructions on connecting i.LINK devices, see page 81.

The LCD projection TV (DTV), along with all devices connected by i.LINK to the LCD projection TV, appear on the i.LINK Device List.

Devices that are not supported by the LCD projection TV appear on the Device List as "Other Device," but cannot be controlled using the LCD projection TV's remote control or on-screen i.LINK Control Panel. For these devices, use the remote control supplied with the device.

Press ♠ or ♥ to navigate among the i.LINK-connected devices.

I.LINK devices can be connected to one another and to the LCD projection TV while the LCD projection TV is powered on. The Device List will automatically update to include the newly-connected device. See page 81 for more information on connecting i.LINK devices.

Press (‡) to select the desired device and display the device's i.LINK Control Panel. Use the i.LINK Control Panel to operate the selected device. For details, see page 84.

i.LINK functions are not available while using the following TV features: Twin View, Freeze, and Memory Stick. After you select an i.LINK device using the Device List, the LCD projection TV displays the i.LINK Control Panel, which allows you to use the LCD projection TV's remote to control the selected i.LINK device.

If the i.LINK Control Panel is not already displayed, press on the remote control.

If i.LINK is pressed while the LCD projection TV is displaying an analog or digital channel (not the i.LINK device), then the Device List will appear. Select the desired device from the list and press (1) to display the Control Panel.

Press $\blacklozenge \blacklozenge \blacklozenge \blacklozenge$ on the remote control to navigate through the options available in the i.LINK Control Panel.

Press (\ddagger) to select a desired option.

Press to exit the Control Panel and view the i.LINK device full-screen.

🖾 To exit i.LINK mode, select DTV from the Device List or press CH+/-.

The i.LINK Control Panel displays the signal from the LCD projection TV to the left (if available), and the signal from the currently selected device to the right.

The DTV window appears only if the i.LINK menus were entered while watching a digital TV channel

Stop a recording from the selected Press ♦ ♦ ♦ ♦ to highlight and press (). i.LINK digital VCR
Turn the selected device power on and Press $\bigstar \bigstar \bigstar \bigstar$ to highlight and press (\mathbf{r}) .
Setup the selected device $Press \blacklozenge \blacklozenge \blacklozenge \blacklozenge \blacklozenge highlight$ and press (\textcircled{P}) . For more details on Setup, see page 86.
You can control the functions of the selected i.LINK device by using the equivalent buttons on the LCD projection TV's remote control. To program the remote control to operate i.LINK devices, see "Programming the Remote Control" on page 48.
Some options on the i.LINK Control Panel may not be available, depending on the device being controlled.
Only i.LINK-equipped digital camcorders and digital VCRs can be controlled directly through the i.LINK Control Panel.
Not all functions are supported for all i.LINK devices.

You can use the i.LINK Control Panel to access digital setup options, some of which are also available through the Digital Program Guide (described on page 62).

To Do This	Do This
Set up the selected device	Press $\blacklozenge \blacklozenge $
Set up Caption Vision	Once i.LINK Setup has been selected, Press \Rightarrow then \Rightarrow or \Rightarrow to , and press $$.
	For details about setting up Caption Vision , see "Customizing Caption Vision" on page 63.
(Set-Top Box)	The LCD projection TV is able to accept an analog signal from a selected set-top box. The set-top box must be EIA-775A compliant and must be connected to the LCD projection TV's VIDEO 3 input. To associate the device with the LCD projection TV's analog VIDEO 3 input, press \blacklozenge or \blacklozenge to select to press (‡). All EIA-775A-compliant devices will be shown in the list. Select the desired device from the list and press (‡).
1.0.000.000.000.000.000.000.000.000.000	

The LCD projection TV can act as an i.LINK repeater, so that i.LINK signals are be relayed to another device even when the LCD projection TV is powered off. To enable this feature, set the option to using the Setup Menu as described on page 105.

Parental Control settings apply to the signal from a selected device. For more details, see page 98.

Using the Menus

Press to display the menu screen.

Press \blacklozenge or \blacklozenge to highlight the desired menu icon and press (\clubsuit) to select it.

Use the arrow button to scroll through the features.

See the specific menu page for instructions on moving through the menu.

Press again

Press \blacklozenge to return to the menu icons.

Press \blacklozenge or \blacklozenge to choose the next menu icon and press (\mathfrak{p}) to select it.

The menu gives you access to the following features:

Menu Icon	Description Allows you to make adjustments to your picture settings. It also allows you to customize the Picture Mode based on the type of program you are viewing.	Page 88
	Offers enhanced audio options such as listening to second audio programming (SAP), or customizing the Effect of the sound on your LCD projection TV.	92

Specifications	115
Optional Accessories	116
Index	117

A signaling method that uses continuous changes in the amplitude or frequency of an electronic transmission to convey information.

Refers to the ratio between the width and height of the screen. This LCD projection TV has a 16:9 (widescreen) aspect ratio, as opposed to a 4:3 aspect ratio.

Component video is sent through three cables: two color shade (chrominance) signals and one brightness (luminance) signal. Component video achieves greater color accuracy than composite video or S VIDEO by splitting chrominance into two separate portions.

Composite video is sent through a single cable. Composite video combines the color shade (chrominance) and brightness (luminance) information into one video signal.

A new technology for transmitting and receiving broadcast television signals. DTV provides higher resolution and improved sound quality over analog television.

A unit of the Federal Communications Commission, Washington, DC, that establishes television standards in the United States, such as NTSC Color, the standard used in this LCD projection TV.

Radio Frequency. That part of the frequency spectrum that is used to transmit TV and radio signals.

S VIDEO requires a single cable, which carries the brightness (luminance) and color (chrominance) signals of the picture separately. S VIDEO provides better resolution than composite video, which carries the signals together.

VHF (Very High Frequency) is the part of the frequency spectrum from 30 to 300 megahertz. UHF (Ultra High Frequency) is the part of the frequency spectrum from 300 to 3,000 megahertz.

Provides 480 lines of resolution. Displays images using interlaced scanning, which first transmits all the odd lines on the LCD projection TV screen and then the even lines.

Provides 480 lines of resolution. Displays images using progressive scanning, which transmits each line from top to bottom.

Provides 720 lines of resolution. Displays images using progressive scanning, which transmits each line from top to bottom.

Provides 1080 lines of resolution. Displays images using interlaced scanning, which first transmits all the odd lines on the LCD projection TV screen and then the even lines. 1080i is one of the formats used by HDTV (High Definition TV).

If, after reading these operating instructions, you have additional questions related to the use of your Sony television, please call our Customer Information Services Center at 1-800-222-SONY (7669) (US residents only) or (416) 499-SONY (7669) (Canadian residents only).

Twin View

Problem

Possible Remedies

гюмет го	Same relieues
I cannot get Twin View to work	If you are using a cable box to unscramble all channels (as shown on page 30), you cannot use the Twin View feature. This is because the cable box can
	unscramble only one channel at a time.
	You can use Twin View to view a signal from a different source that is connected
	to the LCD projection TV's A/V jacks (such as a VCR or DVD player) in the
	second window by pressing while in Twin View.

Video

Problem Possible Remedies If your LCD projection TV does not turn on, and a red light keeps flashing, your No picture (screen not lit), no sound LCD projection TV may need service. Call your local Sony Service Center. Make sure the power cord is plugged in. Press on the front of the LCD projection TV. Press to cycle through the connected video sources. Try another channel; it could be station trouble. Dark, poor or no picture Adjust the option in the Video Menu (see page 88). (screen lit), good sound Adjust the option in the Video Menu (see page 88). Check the antenna/cable connections. No color Adjust the option in the Video Menu (see page 88). Only snow and noise appear on Check the antenna/cable connections. the screen Try another channel; it could be station trouble. Press to change the input mode (see page 47). Dotted lines or stripes Adjust the antenna. Move the LCD projection TV away from noise sources such as cars, neon signs. or hair-dryers. Double images Using a highly directional outdoor antenna or a cable may solve the problem. Set the to an appropriate value. The default setting is . If doubled images appear with select the best value from to (see page 105). "Black box" on screen You have selected a text option in the Setup Menu and no text is available. (See page 102 to reset Setup selections.) To turn off this feature, set the option to : If you were trying to select closed captioning, select instead of Some wide-screen programs are filmed in aspect ratios that are greater than 16:9 Black bands appear at the top and bottom of the screen (this is especially common with theatrical releases). Your LCD projection TV will show these programs with black bands at the top and bottom of the screen. For more details, check the documentation that came with your DVD (or contact your program provider). Certain programs on DVD or The compression used by certain digital broadcasts and DVDs may cause your other digital sources display a LCD projection TV's screen to display less detail than usual, or cause artifacts loss of detail, especially during (small blocks or dots, pixelations) to appear on your screen. This is due to your fast-motion or dark scenes LCD projection TV's large screen and ability to show very fine detail, and is normal for certain digitally recorded programs. Adjust the reality/clarity in the DRC Palette menu (see page 90) to optimize the picture while viewing these sources.

Audio

Problem Pro	ssible Remedies
Good picture, no sound	Press so that disappears from the screen (see page 52). Make sure the option is set to in the Audio Menu (see page 93).
Audio noise	Communication problems may occur if the infrared communication equipment (e.g., infrared cordless headphones) is used near the LCD projection TV. Please use headphones other than infrared cordless headphones. Also, if you use the infrared communication equipment other than infrared cordless headphones, move the infrared transceiver away from the LCD projection TV until the noise is eliminated, or move the transmitter and receiver of the infrared communication equipment closer together.
Cannot gain enough volume when using a cable box	Increase the volume of the cable box using the cable box's remote control. Then press repeatedly until the LCD projection TV indicator lights up and adjust the LCD projection TV's volume.
Sound seems weak or insufficient	The LCD projection TV's audio might be set to or , when it might be better set to . In the Audio Menu (see page 93), set the setting to . If already set to , switch to (which may reduce background noise during weak stereo broadcasts).
Cannot raise the volume on external speakers	If theoption is set toand theoption is set to(inorder to output the sound to your audio system) use your audio receiver to adjust the sound (see page 93). Or, to use the LCD projection TV remote control, set the option toTo turn on the LCD projection TV speakers, set the option to (see page 93).
······································	Luci

Channels

Problem Pos Cannot receive upper channels (UHF) when using an antenna	Press to select the VHF/UHF input (see page 47). Use in the Channel Menu to add receivable channels that are not presently in the LCD projection TV's memory (see page 96).
TV is fixed to one channel	Use in the Channel Menu to add receivable channels that are not presently in the LCD projection TV's memory (see page 96). Check your Channel Fix settings (see page 96).
Cannot receive any channels when using cable TV	Use in the Channel Menu to add receivable channels that are not presently in the LCD projection TV's memory (see page 96). Press to select the CABLE input (see page 47).
Cannot receive or select channels	Use in the Channel Menu to add receivable TV channels that are not presently in LCD projection TV memory (see page 96).
Some digital cable channels are not being displayed	Certain cable companies have limitations on the broadcast of digital cable channels. Check with your cable company for more information. The digital cable channel may be set to in the Digital Setup Menu (see page 62).

General

Problem Pos	sible Remedies
How to restore Video settings to factory settings	Press on the remote control while in the Video Menu (see page 88).
How to restore Audio settings to factory settings	Press on the remote control while in the Audio Menu (see page 92).
Cannot cycle through the other video equipment connected to the LCD projection TV	Be sure the option is not set to (see page 103).
	If a menu option appears in gray, this indicates that the menu option is not available.
Lost password	In the password screen (see page 98), enter the following master password: The master password clears your previous password; it cannot be used to temporarily unblock channels. The i.LINK STANDBY LED blinks when the signal from an i.LINK device is being shown.
· · · · · · · · · · · · · · · · · · ·	If you have several i.LINK devices connected and operating at once, the LCD projection TV may not be able to display the signal from the selected device. Turn the other i.LINK devices off, and reselect the desired i.LINK device.

The POWER/STANDBY (green or red) and/or LAMP (red) indicators indicate the conditions of the LCD projection TV and warnings by lighting or flashing, as follows.

The lamp for the light source is ready to turn on.

The lamp cover is not attached securely. When you correct, the POWER/STANDBY indicator lights in red and the LCD projection TV enters the standby mode (see page 16).

The lamp for the light source burns out. Replace it with new one (see page 13).

If the LCD projection TV is not recovered after correcting the problems, contact with qualified Sony personnel.
