Step 3: Electrical Installation

The Bosch microwave oven is equipped with a grounded cord. The wall receptacle must be installed and grounded in accordance with the national electrical code. Also, electrical connections and grounding must comply with all applicable local codes.

The electrical requirements for a separate circuit serving only this microwave oven are: 120V, 60Hz, 15Amp.

Step 4: Installing the Microwave Oven

Step A

1. Disconnect the microwave oven from the outlet before proceeding with installation.
2. Remove any loose items (turntable, support, etc.) from the microwave oven.
3. Fasten the bottom bracket to the bottom duct by using two 1/2" screws.
4. Install bottom duct with four 1/2" screws to bottom of microwave.

Step 4: Installing The Microwave Oven (continued)

Step B

1. Remove the one existing screw from the left side of the microwave oven.
2. Connect the side duct to upper duct as shown.
 - a) Insert projecting tabs of upper duct into holes of side duct.
 - b) Bend tabs up as shown.

NOTE: Remove any oil or dirt on surface of microwave oven before ducts are attached.

3. Peel off the backing of double-sided tape. Attach the side duct and upper duct assembly on the microwave cabinet. Press down firmly on ducts. Fasten duct assembly to left side of cabinet with one existing screw.

Step C

1. On the cutout floor, mark hole centers for the anti-tip brackets as shown using the supplied template. Be sure to align the center line of template to center line of cutout floor.
2. Drill two holes for anti-tip bracket. (Use $\frac{7}{64}$ " drill or #35 drill)
3. Install anti-tip bracket onto cutout floor using two $\frac{1}{2}$ " screws.

DIMENSIONS:

$$A = 4\text{-}\frac{1}{4}"$$

$$B = 3"$$

$$C = 18\text{-}\frac{3}{16}"$$

Step 4: Installing the Microwave Oven (continued)

Step D

1. Slide microwave oven part way into cabinet opening. (Bottom bracket must be flat to the cutout floor to engage correctly with anti-tip brackets as shown).
2. Plug in the microwave oven.
3. Center the microwave oven within the cutout opening and slide the microwave oven in the anti-tip bracket. (Ensure the microwave oven is accurately centered).
4. Drill pilot holes (use $\frac{7}{64}$ " drill or #35 drill) through the positioning flange and then install three $\frac{1}{2}$ " screws at the front of the bottom duct as shown.

Step 5: Installing the Trim Kit

1. Place the trim kit frame over the microwave oven.

Important Note: Trim kit frame orientation is important. Orient the frame so the louvers are sloping downward to the front. (See Figure Detail A).

2. Make sure the trim kit is level and centered with respect to microwave oven. Mark four hole centers through the four mounting holes of the trim kit.

NOTE: Center the trim kit frame equally on all four sides.

3. Remove the trim kit and drill four pilot holes. (use $\frac{7}{64}$ drill or #35 drill)
4. Attach the trim kit frame by using four 1" screws. Make sure that the orientation is correct as stated above.
