A Special Message to Our Customers,

We hope you take time to read this entire booklet BEFORE using your new Warming Drawer.

This booklet contains suggestions we believe will be helpful. Keep it in a handy spot, as it has the answers to the questions that occur when you start to use the drawer.

Let us know if we can help you. When you write, please include the model number of your Warming Drawer.

Test Kitchen Consumer Scientists

MODEL and PARTS IDENTIFICATION

IMPORTANT SAFETY PRACTICES

When using kitchen appliances basic safety precautions must be followed, including the following:

Read all instructions carefully before using your warming drawer to reduce the risk of fire, electric shock, or injury to persons.

Be sure your appliance is properly installed and grounded by a qualified technician in accordance with the installation instructions provided with the warming drawer.

Warning: The warming drawer is for keeping hot food hot. Never use it to warm or heat a room.

Do not repair or replace any part of the appliance unless specifically recommended in this manual. All other servicing should be referred to a qualified technician.

Children should not be left alone or unattended in an area where appliances are in use. They should never be allowed to sit or stand on any part of the appliance.

Caution: Do not store items of interest to children above the drawer. If a child should climb onto the drawer to reach these items they could be seriously injured.

Use only dry potholders. Moist or damp potholders on hot surfaces may cause burns from steam. Do not use a towel or other bulky cloth in place of potholders. Do not let potholders touch hot heating element located under the drawer.

Storage - Do not store flammable materials in the drawer.

Use care when opening the drawer. Open door a crack and **let hot air or steam escape** before removing or replacing food.

Do not place food in unopened containers in the drawer. Pressure could build up and cause container to burst.

Do not touch the interior surface of the drawer while it is in use. The interior of the drawer could become hot enough to cause burns.

Do not use aluminum foil to line the drawer. Foil is an excellent heat insulator and will trap heat beneath it. This will upset the performance of the drawer and it could damage the interior finish.

SAVE THESE INSTRUCTIONS

CONTROLS

The warming drawer will keep hot, cooked foods at serving temperature. Always start with hot food. DO NOT use to heat cold food other than proofing yeast dough, crisping crackers, chips, and dry cereal, or warming dishes or plates.

THERMOSTAT DIAL / ON KNOB

Open the drawer. The thermostat dial is on the right side of the front frame.

Turn the knob clockwise (to the right). Align a setting on the knob with the raised indicator.

SIGNAL LIGHT

The signal light is located below the thermostat dial and turns "ON" when the dial is set. It stays on until the dial is turned back to the "OFF" position.

This light is visible through the light viewer in the drawer front panel, when the drawer is closed. This is a reminder that the heat is on.

MOISTURE SELECTOR

At the top edge of the drawer trim are the words Moist and Dry.

To keep foods moist, slide the knob inside the drawer to the left. This closes the vents and seals the moisture inside the drawer.

With the vent closed, the drawer is completely sealed which keeps the hot food moist and soft. In this setting condensation may occur around the inside edge of the drawer.

To keep foods crisp, slide the knob to the right. This opens the vents and allows the moisture to escape. With the vents open, it is normal for moisture to collect on surfaces above the warming drawer.

REVERSIBLE RACK

Low Rack Position High Rack Position

- Low position raises utensil about 1/2" from drawer bottom. Example: Used when proofing yeast dough or when a utensil cannot be placed directly on a hot drawer.
- High position allows for double stacking items.

Double Stacking Items

(Drawing shows plates stacked above two 9x13 casserole dishes)

- Rack will fit from front to back.
- With large loads, it may be necessary to use a higher thermostat setting and cover some of the cooked food items.
- When holding hot, cooked foods and warming empty serving dishes at the same time, place the serving dishes on the high rack position and the food items on the bottom of the drawer.
- Food in heat-safe glass and glass ceramic utensils may need higher thermostat settings as compared to food held in metal utensils.
- Allow extra time for the temperature inside the drawer to stabilize, after adding items or checking doneness.

OPERATIONS

DO NOT LINE DRAWER WITH ALUMINUM FOIL.

TO USE:

- Turn thermostat dial to a temperature setting:
LO → → → → MED → → → → HI.
- Slide knob to select a Moist or Dry setting.
- Allow time for the drawer to be preheated:

LO	-	15 minutes
MED	-	25 minutes
HI	-	35 minutes
- Preheat with rack in place if using that arrangement.
- Preheat empty serving dish while preheating drawer.
- Add cooked, hot food in cooking utensil or to heat-safe serving dishes.
- Food may be kept hot in its cooking container or transferred to a heat-safe serving dish.
- Aluminum foil may be used to cover food.

CAUTION: Plastic containers or plastic wrap can melt if in direct contact with the drawer or a hot utensil. If it melts onto the drawer, it may not be removable.

TO WARM EMPTY SERVING BOWLS AND PLATES

- Use only heat-safe dishes.
- May use reversible rack, in low position to raise utensil from direct contact with bottom of drawer.
- Warm on setting appropriate for utensil.
- Check dish temperature during warming period.

TO PROOF YEAST BREAD DOUGH

- Use rack in low position.
- Preheat on LO/MOIST.
- Lightly oil top of dough in bowl large enough to double bread dough. Cover with clean cloth.
- Check dough height in 40 minutes. Add time as needed.

TO CRISP STALE ITEMS

- Place food in low sided dishes or pans.
- Preheat on LO/DRY.
- Check crispness after 45 minutes. Add time as needed.

TEMPERATURE SELECTOR

The setting can be anywhere on or between

LO → → → → MED → → → → HI.

The temperatures range from

140-160°F. on LO

161-190°F. on MED

191 to 220°F. on HI.

To keep several different foods hot, set the temperature to the food needing the highest setting. Place item needing the highest setting on the bottom of the drawer and item needing less heat on the rack.

TEMPERATURE AND MOISTURE SELECTION CHART

FOOD	TEMPERATURE	MOISTURE SELECTOR
Bacon	Hi	Dry
Beef, medium and well done	Med	Moist
Beef, rare	Lo	Moist
Bread, hard rolls	Med	Dry
Bread, soft rolls, c	Med	Moist
Casseroles	Med	Moist
Cooked Cereal	Med	Moist
Eggs	Med	Moist
Fish, Seafood	Med	Moist
Fried foods	Hi	Dry
Fruit	Med	Moist
Gravy, cream sauces	Med	Moist
Ham	Med	Moist
Lamb	Med	Moist
Pancakes, waffles	Hi	Moist
Pies, one crust	Med	Moist
Pies, two crusts	Med	Dry
Pizza	Hi	Center
Pork	Med	Moist
Potatoes, baked	Hi	Center
Potatoes, mashed	Med	Moist
Poultry	Hi	Moist
Vegetables	Med	Moist

- ★ USDA/FSIS recommends an internal temperature of 145°F. as the minimum doneness for beef. Use a portable meat thermometer to check internal temperatures.

USABLE SPACE AND UTENSIL SIZES

Drawer Interior, WD24: 19"W a 18"D x 5"H
WD 27 and WD30: 22"W x 21"D x 7" H

Utensil sizes:

- 2 - 9 x 13" Pyrex 3-quart dishes, side by side.
- 2 - 9 1/2 x 15" Pyrex 4-quart dishes, side by side.
- 4 - 10 1/2" plates, single or stacked
- 3 - 11" plates, single or stacked
- Large 14" pizza, in box.

CARE AND CLEANING

REMOVING THE DRAWER

TO REMOVE THE DRAWER

- Pull drawer to fully open position
- Lift up on left side Release Lever and press down on the right side Release Lever.
- Firmly pull the drawer outward until each Drawer Rail pulls free from each Inner Cabinet Slide. Retract Cabinet Rails while drawer is being cleaned.

TO REPLACE THE DRAWER

- Be sure Cabinet Rails are pushed inside cabinet.
- Align each Drawer Rail to each Inner Cabinet Slide. Use the Slide Lock to guide placement.
- Close the drawer completely; the Slide Lock will secure the drawer.
- Pull out drawer fully to check that both locks are engaged.

**WARNING: DO NOT REMOVE
DRAWER WHILE HOT.
BE SURE DRAWER IS EMPTY
BEFORE REMOVING.**

CARE AND CLEANING

CLEANING CHART

Area / Material	Cleaning Products	Directions
Drawer / Polished Stainless Steel	Hard Water Spots and Scale: vinegar.	Apply with sponge or cloth, then Rinse with clear water and wipe dry. Satisfactory for use on all finishes.
Drawer Front Frame / Brushed Stainless Steel	<i>Mild Cleaners and Polishes:</i> Soap, ammonia, or detergent and water. Stainless Steel Magic®, or Shimmer®	Swab or wipe with cloth. Rinse with water and dry. Satisfactory for use on stainless finishes.
	<i>Slightly Abrasive Cleaners:</i> RevereWare® Instant Stainless Steel Cleaner or Soft Scrub®	Apply with a damp sponge or cloth. <u>Rub in direction of the polish lines.</u> Wipe clean using damp cloth or sponge and dry surface.
	Remember, chlorine and chlorine compounds (check the labels) are corrosive even to stainless steel. It is very important to rinse thoroughly and dry, if a cleaning agent with chlorine is used.	
Drawer Panel / Glass	Glass or window cleaners: Bon Ami®, Windex®, Easy Off®, or use an ammonia and water solution, or vinegar and water solution.	Use a clean dry cloth, paper towel or newspaper to polish. For hard to remove spots, use undiluted vinegar.
Reversible Rack / Chrome	Detergent and water.	Wash, rinse, and dry.
Thermostat Dial / Plastic	Detergent and water.	Pull off knob. Wash, but do not soak. Dry and replace.
