Installation

Remove all packing material and tape from the unit. Inspect the unit thoroughly, notify Sears immediately if the unit has any damaged or missing parts.

Install the unit on a strong level floor or counter. Avoid any direct sunlight, heat source or moisture.

Let air circulate freely around the refrigerator. Keep the back of the unit at least 4 inches away from the wall. Provide at least 1 inch of space between the top of the unit and any surface above it.

CAUTION: If you turn off the cold control, allow at least three minutes before restarting to avoid blowing fuses or tripping your circuit breaker.

Electrical Requirements

120 Volts, 60 Hz (60 cycles AC), 15 amps.

Electrical Grounding

Your refrigerator comes with a three-prong plug and must be inserted into a three-prong, grounded wall outlet. Do not use an extension cord.

WARNING: Unless the above grounding methods are followed, you are not protected against severe or lethal shock in the event of a short circuit in refrigerator wiring or electrical components.

Things to Remember

- When resetting your refrigerator to a new temperature, allow 24 hours for it to reach the new setting.
- The motor will start and stop often. It must do so in order to maintain the temperature you select.
- 3. Keep your refrigerator level.
- Unplug the refrigerator before doing anything with the electrical system.

Use and Care Information

Tips on everyday care and use

1. To control the temperature:

First, set the Cold Control on medium position, (See picture below). Then adjust the control if necessary. Setting the Cold Control to MIN is the warmest setting; MAX is the coldest. The MAX setting may reduce the temperature to below freezing, but it will not cool the refrigerator faster.

The fresh food section should be as cold as possible without freezing vegetables or milk. Adjust as necessary.

2. Defrost:

Defrost when 1/4 inch frost forms. Set the temperature control dial to OFF for defrosting. Remove food. Do not touch the freezing plate with your bare hands. Do not use electric defrost devices or hair dryers to melt the frost. They may damage the plastic parts. When defrosting is completed, wipe the freezing plate dry and reset the control dial. Return food to the refrigerator.

3. For all cleaning:

Mix 2 tablespoons baking soda with 1 quart warm water or use a mild soap. Do not use strong cleaners, scouring powder or pads. For persistent odors, contact Sears Service Center for odor removal products.

Energy Saving tips

- Close the door as soon as you can after opening it to remove food. Make sure that the door is fully shut after each use so that cold air does not escape from the refrigerator cavity.
- Adjust the Cold Control. Try a warmer setting.
 Your refrigerator may be colder than necessary.
 Use the condition of the milk of check the
 refrigerator temperature. As long as milk keeps
 without spoiling your refrigerator is cold
 enough.

- 3. Do not place hot food in the refrigerator.
- Reduce the number and length of time you open the door. Your cooling system will not have to run as often.
- Keep your refrigerator level, so that the door seals tightly. When the door is closed, the door gaskets should touch the refrigerator all the way around.
- 6. If not, make the refrigerator level by use of the adjustable leg located under the unit.
- Keep your refrigerator away from stoves or other heat sources. A cool and dry place allows your refrigerator to operate more efficiently.

Before Calling for Service

- · Check the plug and fuse.

HOW TO TRANSFER THE DOOR HINGE LOCATION OF A REVERSIBLE DOOR

Refer to the disassembly diagram and change the door hinges using the following procedure:

- 1. Remove the top hinge and-loosen and remove the two screws holding the top hinge in place.
- 2. Lift the door up and off the bottom hinge pin. Tilt the refrigeration back or lay it on its back. Use a pad or blanket to protect the floor and to avoid scratching the painted finish.
- 3. Loosen and remove the leg and the two screws from the bottom hinge.
- 4. Remove the leg from the left side of the cabinet.
- 5. Remove and transfer the bottom hinge to the left side without flipping or turning it.
- 6. Install the leg that was removed from the left side to the right side of the cabinet.
- 7. Place the door over the bottom hinge pin and guide the door bottom hole to the pin.
- 8. Remove the two plugs from the top left side of the cabinet. Place the top hinge over these holes and the hinge pin into the hole on top of the door. Drive the screws into the top of the cabinet. Do not tighten until the door is checked for proper gasket seal alignment. The following points shoulds be checked.
 - a. Make sure the door is on straight.
 - Make sure that there is no space between the door gasket and the refrigerator unit itself when the door is closed.
 - c. Make sure that the gasket on the hinge side is not caught between the door and the unit when the door is opened or closed. (If the door is forced closed when the gasket is caught, the gasket may be damaged.)
- 9. Stand the unit back in the upright position. Wait 3 hours before plug in the power cord.
