Monogram.[®]
We bring good things to life.

Introduction

Your new Monogram refrigerator makes an eloquent statement of style, convenience and kitchen planning flexibility. Whether you chose it for its purity of design, practical storage arrangements or assiduous attention to detail—or for all of these reasons—you'll find that your Monogram refrigerator's superior blend of form and function will delight you for years to come.

The information on the following pages will help you operate and maintain your refrigerator properly.

If you have any other questions, visit our Website at: www.monogram.com

*Before
using
your
refrigerator*

Read this manual carefully. It is intended to help you operate and maintain your new refrigerator properly.

Keep it handy for answers to your questions.

If you don't understand something or need more help, there is a list of toll-free consumer service numbers included in the back section of this manual.

OR

Visit our Website at: www.monogram.com

*Write
down the
model &
serial
numbers*

You'll see them on a label inside the fresh food compartment at the top on the right side.

Please write these numbers on the Consumer Product Ownership Registration Card included with the packing material.

Before sending in this card, please also write these numbers here:

Model Number

Serial Number

Use these numbers in any correspondence or service calls concerning your refrigerator.

*If you
received a
damaged
refrigerator*

Immediately contact the dealer (or builder) that sold you the refrigerator.

*Save time
& money*

Before you request service, check the Problem Solver in the back of this manual.

It lists causes of minor operating problems that you can correct yourself.

*If you
need
service*

To obtain service, see the Consumer Services page in the back of this manual.

We're proud of our service and want you to be pleased. If for some reason you are not happy with the service you receive, here are steps to follow for further help.

For customers in the USA:

FIRST, contact the people who serviced your appliance. Explain why you are not pleased. In most cases, this will solve the problem.

NEXT, if you are still not pleased, write all the details—including your phone number—to:

Manager, Customer Relations
GE Appliances
Appliance Park
Louisville, KY 40225

For customers in Canada:

FIRST, contact the people who serviced your appliance. Explain why you are not pleased. In most cases, this will solve the problem.

NEXT, if you are still not pleased, write all the details—including your phone number to:

Manager, Consumer Relations
Camco Inc.
1 Factory Lane, Suite 310
Moncton, N.B. E1C 9M3

IMPORTANT SAFETY INSTRUCTIONS

READ AND SAVE THESE INSTRUCTIONS

⚠ WARNING—When using this appliance, always exercise basic safety precautions, including the following:

- Use this appliance only for its intended purpose as described in this Owner's Manual.
 - This refrigerator must be properly installed in accordance with the Installation Instructions before it is used.
 - Do not allow children to climb, stand or hang on the shelves in the refrigerator. They could damage the refrigerator and seriously injure themselves.
 - Do not touch the cold surfaces in the freezer compartment when hands are damp or wet. Skin may adhere to these extremely cold surfaces.
 - Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
 - In refrigerators with automatic icemakers, avoid contact with moving parts of the ejector mechanism, or with the heating element located on the bottom of the icemaker.
- Do not place fingers or hands on the automatic icemaking mechanism while the refrigerator is plugged in.
- Keep fingers out of the “pinch point” areas: clearances between the doors and between the doors and cabinet are necessarily small. Be careful closing doors when children are in the area.
 - Unplug your refrigerator before cleaning and making repairs. **NOTE:** We strongly recommend that any servicing be performed by a qualified individual.
 - Before replacing a burned-out light bulb, the refrigerator should be unplugged in order to avoid contact with a live wire filament. (A burned-out light bulb may break when being replaced.) **NOTE:** Turning control to OFF does not remove power to the light circuit.
 - Do not refreeze frozen foods which have thawed completely.
 - Always clean the CustomCool™ Tray after thawing food.

⚠ DANGER: RISK OF CHILD ENTRAPMENT

Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators are still dangerous...even if they will sit for “just a few days.” If you are getting rid of your old refrigerator, please follow the instructions below to help prevent accidents.

Before You Throw Away Your Old Refrigerator or Freezer:

- Take off the doors.
- Leave the shelves in place so that children may not easily climb inside.

REFRIGERANTS

All refrigeration products contain refrigerants, which under federal law must be removed prior to product disposal.

If you are getting rid of an old refrigeration product, check with the company handling the disposal about what to do.

LIRE ET CONSERVER CES INSTRUCTIONS

▲ AVERTISSEMENT :

Lorsque vous utilisez le réfrigérateur, observez toujours certaines précautions de base, notamment :

- **N'utilisez le réfrigérateur que pour son usage prévu**, comme décrit dans le présent manuel.
- **Installez le réfrigérateur conformément aux directives d'installation avant de l'utiliser.**
- **Ne laissez pas les enfants grimper, s'asseoir, se tenir debout ni se pendre aux clayettes du réfrigérateur.** Ils pourraient endommager le réfrigérateur et se blesser gravement.
- **Une fois le réfrigérateur en marche, ne touchez pas les surfaces froides du congélateur, surtout si vous avez les mains humides ou mouillées :** la peau risque d'adhérer à ces surfaces très froides.
- **N'entreposez et n'utilisez pas d'essence ou autres vapeurs et liquides inflammables à proximité de cet appareil ou de tout autre appareil électroménager.**
- **Pour les réfrigérateurs dotés d'une machine à glaçons automatique, évitez le contact avec les pièces mobiles du mécanisme éjecteur, ou avec l'élément chauffant situé à la partie inférieure de la machine à glaçons.**

Ne posez pas les doigts ou les mains sur le mécanisme de la machine à glaçons pendant que le réfrigérateur est branché.

- **Éloignez les doigts des parties du réfrigérateur où l'on peut facilement se pincer :** les espaces entre les portes et entre les portes et les placards sont toujours étroits. Soyez prudent lorsque vous fermez les portes de l'appareil en présence des enfants.
- **Débranchez votre réfrigérateur avant de le nettoyer et de le réparer.**
REMARQUE : Nous vous recommandons vivement de confier toute réparation à un technicien qualifié.
- **Avant de remplacer une ampoule grillée,** le réfrigérateur doit être débranché afin d'éviter tout contact avec un fil sous tension. (Une ampoule grillée peut se briser pendant l'opération). **REMARQUE :** Lorsque vous placez la commande sur éteint, l'alimentation électrique de l'ampoule n'est pas coupée.
- **Ne faites PAS recongeler des aliments surgelés qui ont complètement dégelé.**
- **Nettoyez toujours le contenant CustomCool™ après avoir dégelé les aliments.**

▲ DANGER: RISQUES POUR LES ENFANTS

Les enfants pris au piège ou morts d'asphyxie sont toujours d'actualité. Les appareils de réfrigération abandonnés sont toujours aussi dangereux, même si on n'attend que "quelque jours" pour s'en débarrasser. Si vous ne gardez pas votre ancien appareil, veuillez suivre les directives ci-dessous afin de prévenir les accidents.

Avant de vous débarrasser de votre vieux appareil de réfrigération :

- Démontez les portes.
- Laissez les clayettes en place afin d'empêcher les enfants de grimper à l'intérieur.

RÉFRIGÉRANTS

Tous les appareils de réfrigération contiennent des réfrigérants qui, conformément aux lois fédérales, doivent être enlevés avant toute élimination de l'appareil.

Si vous vous débarrassez de vieux appareils de réfrigération, vérifiez, auprès de la société qui s'occupe de leur élimination, ce que vous devez faire.

IMPORTANT SAFETY INSTRUCTIONS

HOW TO CONNECT ELECTRICITY

Do not, under any circumstances, cut or remove the third (ground) prong from the power cord. For personal safety, this appliance must be properly grounded.

The power cord of this appliance is equipped with a 3-prong (grounding) plug which mates with a standard 3-prong (grounding) wall outlet to minimize the possibility of electric shock hazard from this appliance.

Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded.

Where a standard 2-prong wall outlet is encountered, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

The refrigerator should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating plate.

This provides the best performance and also prevents overloading house wiring circuits which could cause a fire hazard from overheated wires.

Never unplug your refrigerator by pulling on the power cord. Always grip plug firmly and pull straight out from the outlet.

Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end.

When moving the refrigerator away from the wall, be careful not to roll over or damage the power cord.

USE OF ADAPTER PLUGS (Adapter plugs not permitted in Canada)

Because of potential safety hazards under certain conditions, we strongly recommend against the use of an adapter plug.

However, if you must use an adapter, where local codes permit, a **temporary connection** may be made to a properly grounded 2-prong wall outlet by use of a UL-listed adapter available at most local hardware stores.

The larger slot in the adapter must be aligned with the larger slot in the wall outlet to provide proper polarity in the connection of the power cord.

When disconnecting the power cord from the adapter, always hold the adapter in place with one hand while pulling the power cord plug with the other hand. If this is not done, the adapter ground terminal is very likely to break with repeated use.

If the adapter ground terminal breaks, **DO NOT USE** the appliance until a proper ground has been established.

Attaching the adapter ground terminal to a wall outlet cover screw does not ground the appliance unless the cover screw is metal, and not insulated, and the wall outlet is grounded through the house wiring. You should have the circuit checked by a qualified electrician to make sure the outlet is properly grounded.

Use of an adapter plug will increase the clearance needed for the back of the appliance.

USE OF EXTENSION CORDS

Because of potential safety hazards under certain conditions, we strongly recommend against the use of an extension cord.

However, if you must use an extension cord, it is absolutely necessary that it be a UL-listed, 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 15 amperes (minimum) and 120 volts.

SAVE THESE INSTRUCTIONS

RACCORDEMENT ÉLECTRIQUE

Ne coupez ni retirez en aucun cas la troisième broche (mise à la terre) de la fiche du cordon d'alimentation. Pour votre sécurité, cet appareil doit être correctement mis à la terre.

Le cordon d'alimentation de cet appareil est muni d'une fiche à 3 broches (mise à la terre) qui se branche dans une prise mural ordinaire à 3 alvéoles (mise à la terre) pour réduire au minimum les risques du chocs électriques.

Faites examiner la prise de courant et le circuit par un électricien qualifié pour vous assurer que la prise est correctement mise à la terre.

Si la prise murale est du type standard à 2 alvéoles, il vous incombe de la faire remplacer par une prise à 3 alvéoles correctement mise à la terre.

La machine à glaçons doit toujours être branché dans sa propre prise de courant, dont la tension nominale est identique à celle indiquée sur la plaque signalétique.

Cette précaution est recommandée pour garantir un rendement optimum et éviter une surcharge des circuits électriques de la résidence, ce qui pourrait créer un risque d'incendie par surschauffe des fils.

Ne débranchez jamais l'appareil en tirant le cordon d'alimentation. Saisissez fermement la fiche du cordon et tirez droit pour la retirer de la prise.

Réparez ou remplacez immédiatement tout cordon effiloché ou endommagé. N'utilisez pas un cordon fendillé ou présentant des signes d'usure.

Lorsque vous déplacez l'appareil du mur, faites attention de ne pas la faire rouler sur le cordon d'alimentation afin de ne pas l'endommager.

FICHE D'ADAPTATION *(Fiches d'adaptation non permises au Canada)*

Nous vous recommandons fortement de ne pas utiliser une fiche d'adaptation à cause des risques potentiels qu'elle présente dans certaines circonstances.

Toutefois, si vous décidez d'utiliser tout de même une fiche d'adaptation, vous pouvez effectuer un **raccordement temporaire**, si les codes locaux le permettent, dans une prise de courant à 2 alvéoles adéquatement mise à la terre en utilisant une fiche d'adaptation homologuée UL, en vente dans la plupart des quincailleries.

La fente la plus longue de la fiche doit être alignée avec la fente la plus longue de la prise murale afin d'assurer la polarité appropriée pour le branchement du cordon d'alimentation.

Lorsque vous débranchez le cordon d'alimentation de la fiche d'adaptation, saisissez toujours la fiche d'une main pendant que vous tirez sur la fiche du cordon d'alimentation de l'autre. Sinon, la borne de mise à la terre de la fiche d'adaptation risque de casser avec le temps.

Si la borne de mise à la terre de la fiche casse, **N'UTILISEZ PAS** l'appareil tant qu'une mise à la terre adéquate n'aura pas été rétablie.

Le fait de fixer la borne de mise à la terre de la fiche d'adaptation à la plaque de la prise de courant n'assure pas automatiquement la mise à la terre de l'appareil. Il faut que la vis soit en métal, non isolée, et que la prise de courant soit mise à la terre par l'entremise du câblage de résidence. Faites vérifier le circuit par un électricien qualifié pour vous assurer que la prise est adéquatement mise à la terre.

CORDONS PROLONGATEURS

Nous vous recommandons fortement de ne pas utiliser de cordons prolongateurs à cause des risques potentiels qu'ils présentent dans certaines conditions.

Toutefois si vous décidez d'utiliser tout de même un cordon prolongateur, il est absolument

nécessaire qu'il s'agisse d'un cordon à 3 fils avec mise à la terre pour appareils électroménagers homologués UL (aux États-Unis) ou homologués CSA (au Canada), pourvu d'une fiche et d'une prise mises à la terre de 15 ampères (minimum) et de 120 volts.

CONSERVEZ CES DIRECTIVES

Temperature controls

The temperature controls are preset in the factory at **37°F** for the fresh food compartment and **0°F** for the freezer compartment. Allow 24 hours for the temperature to stabilize to the preset recommended settings.

The temperature controls can display both the **SET** temperature as well as the actual temperature in the fresh food and freezer compartments. The actual temperature may vary slightly from the **SET** temperature based on usage and operating environment.

Setting either or both controls to **OFF** stops cooling in both the freezer and fresh food compartments, but does not shut off electrical power to the refrigerator.

NOTE: The refrigerator is shipped with protective film covering the temperature controls. If this film was not removed during installation, remove it now.

To change the temperature, press and release the ☺ (warmer) or ☹ (colder) pad. The SET light will come on and the display will show the set temperature. To change the temperature, tap either the ☺ (warmer) or ☹ (colder) pad until the desired temperature is displayed. Fresh food temperatures can be adjusted between 34°F and 44°F and the freezer temperatures can be adjusted between -6°F and +6°F.

Once the desired temperature has been set, the temperature display will return to the actual fresh food and freezer temperatures after 5 seconds. Several adjustments may be required. Each time you adjust controls, allow 24 hours for the refrigerator to reach the temperature you have set.

To turn the cooling system off, tap the ☺ (warmer) pad for either the fresh food compartment or the freezer until the display shows OFF. **To turn the unit back on,** press the ☹ (colder) pad for either the fresh food compartment or freezer. The SET light will illuminate on the side you selected. Then press the ☹ (colder) pad again (on the side where the SET light is illuminated) and it will go to the preset points of 0°F for the freezer and 37°F for the fresh food compartment.

Performance Air Flow System

The Performance Air-Flow System is designed to maximize temperature control in the fresh food and freezer compartments. This unique special feature consists of the Air Tower along the top and back walls of the fresh food compartment and the Air Tunnel on the bottom portion of the freezer rear wall. Placing food in front of the louvers on these components will not affect performance.

Although the Air Tower and the Air Tunnel can be removed, doing so will affect temperature performance. (For removal instructions, on-line, 24 hours a day, contact us at www.monogram.com or call 800.444.1845. In Canada, call us at 1.888.880.3030.)

How it works

TurboCool rapidly cools the refrigerator compartment in order to more quickly cool foods.

Use **TurboCool** when adding a large amount of food to the refrigerator compartment, putting away foods after they have been sitting out at room temperature or when putting away warm leftovers. It can also be used if the refrigerator has been without power for an extended period.

Once activated, the compressor will turn on immediately and the fans will cycle on and off at high speed as needed for 8 hours.

The compressor will continue to run until the refrigerator compartment cools to approximately 34°F (1°C), then it will cycle on and off to maintain this setting. After 8 hours, or if **TurboCool** is pressed again, the refrigerator compartment will return to the original setting.

How to use

1 Press **TurboCool**. The refrigerator temperature display will show TC.

2 After **TurboCool** is complete, the refrigerator compartment will return to the original setting.

NOTES:

- The refrigerator temperature cannot be changed during **TurboCool**.
- The freezer temperature is not affected during **TurboCool**.
- When opening the refrigerator door during **TurboCool**, the fans will continue to run if they have cycled on.

How it works

The **CustomCool** feature is a system of dampers, a fan, a temperature thermistor and a heater. Depending on the function selected, a combination of these will be used to quickly chill items, thaw items or hold the pan at a specific temperature.

The pan is tightly sealed to prevent the pan's temperature from causing temperature fluctuations in the rest of the refrigerator.

The controls for this pan are located at the top of the fresh food compartment with the temperature controls.

How to use

- 1 Empty the pan. Place the Chill/Thaw tray in the pan with the metal plate facing down to chill and store items, or with the metal plate facing up to thaw items. Place the items on the tray and close the pan completely.
- 2 Select the **ExpressThaw™**, **ExpressChill™** or **SelectTemp™** pad. The display and SET light will come on. Tap the pad until the light appears next to the desired setting. Use the chart to determine the best setting to use.
 - To stop a feature before it is finished, tap that feature's pad until no options are selected and the display is off.
 - During **ExpressThaw** and **ExpressChill**, the display on the controls will count down the time in the cycle.
 - After the **ExpressThaw** cycle is complete, the pan will reset to the MEAT setting (31°F) to help preserve thawed items until they are used.
 - The displayed actual temperature of the **CustomCool** pan may vary slightly from the SET temperature based on usage and operating environment.

NOTE: For food safety reasons, it is recommended that foods be wrapped in plastic wrap when using **ExpressThaw**. This will help contain meat juices and improve thawing performance.

ExpressThaw™

ExpressChill™

CustomCool™
chart

NOTE: Results may vary depending on packaging, starting temperature and other food traits.

0.5 Lb. (4 hours)

- Hamburger Patties (0.5 lb)
- Individually Wrapped Filet Mignon (0.5 lb)

1.0 Lb. (6 hours)

- Chicken Breasts (1.0 lb)
- Ground Beef (1.0 lb)
- Steak (1.0 lb)

2.0 Lbs. (10 hours)

- Chicken Breasts (2.0 lbs)
- Ground Beef (2.0 lbs)
- Steak (2.0 lbs)

3.0 Lbs. (12 hours)

- Chicken Breasts (3.0 lbs)
- Ground Beef (3.0 lbs)
- Steak (3.0 lbs)

15 Minutes

- 1 Beverage Can (12 oz)
- 2 Small Juice Boxes (6–8 oz each)

30 Minutes

- 2 to 6 Beverage Cans (12 oz each)
- 2 Plastic 20 oz Bottles of Beverage
- 4 to 6 Small Juice Boxes (6–8 oz each)
- 3 Foil Juice Packets
- Wine (750 ml bottle)

45 Minutes

- 2 Liter of Beverage
- 1/2 Gallon of Juice
- Gelatin – 1 package

- Asparagus, Broccoli, Corn, Mushrooms, Spinach, Cauliflower, Kale, Green Onion, Beets, Onions

Meat Setting (31°F)

- Raw Meat, Fish and Poultry

CustomCool™
rack and tray

To clean the Chill/Thaw tray, disassemble the metal tray from the plastic stand by lightly pushing in on the handles of the plastic stand and removing the metal tray. Both the metal tray and the plastic stand are dishwasher safe.

Disassembling the **Chill/Thaw** tray

To reassemble the tray, place the plastic stand upside down (handles on bottom) on a solid surface. Place the metal plate on top of the stand matching up the curved side of the plate with the curved side of the stand. Insert one side of the plate into the notches on the stand. Push in on the handle on the other side of the stand while pushing that end of the plate down and into place. You should hear the plate “click” into place.

Water filter cartridge

The water filter cartridge is located in the back upper right corner of the fresh food compartment.

When to Replace the Filter

There is a replacement indicator light for the water filter cartridge on the dispenser. This light will turn orange to tell you that you need to replace the filter soon.

The filter cartridge should be replaced when the replacement indicator light turns red or if the flow of water to the dispenser or icemaker decreases.

Installing the Filter Cartridge

Place the top of the cartridge up inside the cartridge holder and slowly turn it to the right.

- 1 If you are replacing the cartridge, first remove the old one by slowly turning it to the left. **Do not** pull down on the cartridge. A small amount of water may drip down.
- 2 Fill the replacement cartridge with water from the tap to allow for better flow from the dispenser immediately after installation.
- 3 Lining up the arrow on the cartridge and the cartridge holder, place the top of the new cartridge up inside the holder. **Do not** push it up into the holder.
- 4 Slowly turn it to the right until the filter cartridge stops. **DO NOT OVERTIGHTEN.** As you turn the cartridge, it will automatically raise itself into position. Cartridge will rotate about 1/4 turn.
- 5 Run water from the dispenser for 3 minutes (about one and a half gallons) to clear the system and prevent sputtering.
- 6 Press and hold the RESET WATER FILTER pad on the dispenser for 3 seconds.

NOTE: A newly-installed water filter cartridge may **cause water to spurt** from the dispenser.

Filter Bypass Plug

You must use the filter bypass plug when a replacement filter cartridge is not available. The dispenser and the icemaker will not operate without the filter or filter bypass plug.

Replacement Filters:

To order additional filter cartridges in the United States, call GE Parts and Accessories, 800.626.2002.

GWF

Suggested Retail \$34.95 USD

Customers in Canada should consult the yellow pages for the nearest Camco Service Center.

Fresh food compartment door bins and freezer door tilt-out bins

Large Bins

The larger fresh food compartment door bins and freezer tilt-out door bins are adjustable.

To remove: Lift the front of the bin straight up, then lift up and out.

To replace or relocate: Engage the back side of the bin in the molded supports of the door. Then push down on the front of the bin. Bin will lock in place.

Fresh food compartment door bin

Small Bins

To remove: Lift the front of the bin straight up, then out.

To replace: Position the bin above the rectangular molded supports on the door. Then slide the bin down onto the support to lock it in place.

The snagger helps prevent tipping, spilling or sliding of small items stored on the door shelf. Place a finger on either side of the snagger near the rear and move it back and forth to fit your needs.

Freezer tilt-out bin

Slide-out spillproof shelf

The slide-out spillproof shelf allows you to reach items stored behind others. The special edges are designed to help prevent spills from dripping to lower shelves.

To remove: Slide the shelf out until it reaches the stop, then press down on the tab and slide the shelf straight out.

To replace or relocate: Line the shelf up with the supports and slide it into place. The shelf can be repositioned when the door is at 90° or more. To reposition the shelf, slide the shelf past the stops and angle downward. Slide shelf down to the desired position, line up with the supports and slide into place.

Make sure you push the shelves all the way back in before you close the door.

Shelves and Bins

Stainless Steel Refrigerator

QuickSpace™ shelf

This shelf splits in half and slides under itself for storage of tall items on the shelf below.

This shelf can be removed and replaced or relocated just like Slide-Out Spillproof Shelves.

On some models, this shelf can not be used in the lowest position.

Freezer baskets

To remove, push the basket all the way to the back of the freezer. Lift up until the back pins are disengaged. Lift the entire basket up and pull out.

The divider can be used to organize food packages. For large packages, simply fold down the divider.

Make sure you push the baskets all the way back in before you close the door.

Slide-out freezer shelves

To remove, slide out to the **stop** position, lift the front past the stop position, and slide out.

Make sure you push the shelves all the way back in before you close the door.

Fixed freezer shelves

To remove, lift the shelf up at the left side and then bring the shelf out.

Removable beverage rack

The beverage rack is designed to hold a bottle on its side. It can be attached to any slide-out shelf.

To install:

- 1 Line up the large part of the slots on the top of the rack with the tabs under the shelf.
- 2 Then slide the rack back to lock it in place.

Refrigerator doors

The refrigerator doors may feel different than the ones you are used to. The special door opening/closing feature makes sure the doors close all the way and are securely sealed.

When opening and closing the door you will notice a **stop** position. If the door is opened past this **stop** point, the door will remain open to allow you to load and unload food more easily. When the door is only partially open it will automatically close.

The resistance you feel at the **stop** position will be reduced as the door is loaded with food.

When the door is only partially open, it will automatically close.

Beyond this **stop** the door will stay open.

Crispers and Pans

Stainless Steel Refrigerator

Fruit and vegetable crispers

Excess water that may accumulate in the bottom of the drawers should be wiped dry.

The bottom drawer has a cover that slides back as the drawer is opened. This allows full access to the drawer. As the drawer is closed, the cover will slide forward into its original position.

Adjustable humidity crispers

Slide the control all the way to the **HI** setting to provide high humidity recommended for most vegetables.

Slide the control all the way to the **LO** setting to provide lower humidity levels recommended for most fruits.

Convertible meat pan

The convertible meat pan has its own cold air duct to allow a stream of cold air from the freezer compartment to flow to the pan.

The variable temperature control regulates the air flow from the Climate Keeper.

Set the control to the **coldest** setting to store fresh meats.

Set the control to **cold** to convert the pan to normal refrigerator temperature and provide extra vegetable storage space. The cold air duct is turned off. Variable settings between these extremes can be selected.

Crisper removal

Crispers can easily be removed by pulling the drawer straight out and lifting the drawer up and over the **stop** location.

If the door prevents you from taking out the drawers, first try to remove the door bins. If this does not offer enough clearance, the refrigerator will need to be rolled forward until the door opens enough to slide the drawers out. In some cases, when you roll the refrigerator out, you will need to move the refrigerator to the left or right as you roll it out.

Automatic icemaker

A newly-installed refrigerator may take 12 to 24 hours to begin making ice.

The icemaker will produce seven cubes per cycle—approximately 100–130 cubes in a 24-hour period, depending on freezer compartment temperature, room temperature, number of door openings and other use conditions.

If the refrigerator is operated before the water connection is made to the icemaker, set the power switch in the **0** (off) position.

When the refrigerator has been connected to the water supply, set the power switch to the **I** (on) position.

The icemaker will fill with water when it cools to 15°F (–10°C). A newly-installed refrigerator may take 12 to 24 hours to begin making ice cubes.

You will hear a buzzing sound each time the icemaker fills with water.

Throw away the first few batches of ice to allow the water line to clear.

Be sure nothing interferes with the sweep of the feeler arm.

When the bin fills to the level of the feeler arm, the icemaker will stop producing ice. It is normal for several cubes to be joined together.

If ice is not used frequently, old ice cubes will become cloudy, taste stale and shrink.

NOTE: *In homes with lower-than-average water pressure, you may hear the icemaker cycle multiple times when making one batch of ice.*

Pull the upper freezer shelf straight out to access the icemaker. Always be sure to replace the shelf. The shelf can be used for storage.

Ice storage drawer

To access ice, pull the drawer forward.

To remove the drawer, pull it straight out and lift it past the **stop** location.

Using the dispenser

Select CUBED ICE , CRUSHED ICE  or WATER .

Press the glass gently against the top of the dispenser cradle.

The spill shelf is not self-draining. To reduce water spotting, the shelf and its grille should be cleaned regularly.

If no water is dispensed when the refrigerator is first installed, there may be air in the water line system. Press the dispenser arm for at least two minutes to remove trapped air from the water line and to fill the water system. To flush out impurities in the water line, throw away the first six glassfuls of water.

CAUTION: *Never put fingers or any other objects into the ice crusher discharge opening.*

ATTENTION : *Ne mettez jamais les doigts ou d'autres objets dans l'ouverture du distributeur.*

Other dispenser controls

Locking the Dispenser

Press the LOCK CONTROL pad for 3 seconds to lock the dispenser and control panel. To unlock, press and hold the pad again for 3 seconds.

Quick Ice

When you need ice in a hurry, press this pad to speed up ice production. This will increase ice production for the following 48 hours or until you press the pad again.

Dispenser Light

This pad turns the **night light** in the dispenser on and off. The light also comes on when the dispenser cradle is pressed. If this light burns out, it should be replaced with a 6 watt 12V maximum bulb.

Door Alarm

To set the alarm, press this pad until the indicator light comes on. This alarm will sound if either door is open for more than 3 minutes. The light goes out and the beeping stops when you close the door.

Important facts about your dispenser

- Do not add ice from trays or bags to the storage drawer. It may not crush or dispense well.
- Avoid overfilling glass with ice and use of narrow glasses. Backed-up ice can jam the chute or cause the door in the chute to freeze shut. If ice is blocking the chute, poke it through with a wooden spoon.
- Beverages and foods should not be quick-chilled in the ice storage drawer. Cans, bottles or food packages in the storage drawer may cause the icemaker or auger to jam.
- To keep dispensed ice from missing the glass, put the glass close to, but not touching, the dispenser opening.
- Some crushed ice may be dispensed even though you selected CUBED ICE. This happens occasionally when a few cubes accidentally get directed to the crusher.
- After crushed ice is dispensed, some water may drip from the chute.
- Sometimes a small mound of snow will form on the door in the ice chute. This condition is normal and usually occurs when you have dispensed crushed ice repeatedly. The snow will eventually evaporate.

Ice storage drawer

To remove:
Set the icemaker power switch to the **0** (off) position. Pull the drawer straight out and then lift past the **stop** position.

To replace:
When replacing the drawer, be sure to press it firmly into place. If it does not go all the way back, remove it and rotate the drive mechanism 1/4 turn. Then push the drawer back again.

Cleaning the outside

The dispenser drip area, beneath the grille, should be wiped dry. Water left in this area

may leave deposits. Remove the deposits by adding undiluted vinegar to the well. Soak until the deposits disappear or become loose enough to rinse away.

Dispenser drip area.

The dispenser cradle. Before cleaning, lock the dispenser by pressing and holding the LOCK CONTROL pad for 3 seconds. Clean with warm water and baking soda solution—about a tablespoon (15 ml) of baking soda to a quart (1 liter) of water. Rinse thoroughly and wipe dry.

The stainless steel panels and handles can be cleaned with a commercially available stainless steel cleaner such as *Stainless Steel Magic*.™

Stainless Steel Magic is available at Ace, True Value, Servistar, HWI and other leading stores. It is also available through GE Parts and Accessories, 800.626.2002. Order part number WX10X15.

Do not use appliance wax or polish on the stainless steel.

Cleaning the inside

To help prevent odors, leave an open box of baking soda in the fresh food and freezer compartments.

Unplug the refrigerator before cleaning.

If this is not practical, wring excess moisture out of sponge or cloth when cleaning around switches, lights or controls.

Use warm water and baking soda solution—about a tablespoon (15 ml) of baking soda to a quart (1 liter) of water. This both cleans and neutralizes odors. Rinse and wipe dry.

Use of any cleaning solution other than that which is recommended, especially those that contain petroleum distillates, can crack or damage the interior of the refrigerator.

Avoid cleaning cold glass shelves with hot water because the extreme temperature difference may cause them to break. Handle glass shelves carefully. Bumping tempered glass can cause it to shatter.

Do not wash any plastic refrigerator parts in the dishwasher.

Behind the refrigerator

Be careful when moving the refrigerator away from the wall. All types of floor coverings can be damaged, particularly cushioned coverings and those with embossed surfaces.

Pull the refrigerator straight out and return it to position by pushing it straight in. Moving the refrigerator in a side direction may result in damage to the floor covering or refrigerator.

When pushing the refrigerator back, make sure you don't roll over the power cord or icemaker supply line.

Preparing for vacation

For long vacations or absences, remove food and unplug the refrigerator. Clean the interior with a baking soda solution of one tablespoon (15 ml) of baking soda to one quart (1 liter) of water. Leave the doors open.

Set the icemaker power switch to the **O** (off) position and shut off the water supply to the refrigerator.

If the temperature can drop below freezing, have a qualified servicer drain the water supply system to prevent serious property damage due to flooding.

Preparing to move

Secure all loose items such as shelves and drawers by taping them securely in place to prevent damage.

When using a hand truck to move the refrigerator, do not rest the front or back of the refrigerator against the hand truck. This could damage the refrigerator. Handle only from the sides of the refrigerator.

Be sure the refrigerator stays in an upright position during moving.

Replacing the Light Bulbs

Stainless Steel Refrigerator

Fresh food compartment—upper light

Setting the controls to OFF does not remove power to the light circuit.

- 1 Unplug the refrigerator.
- 2 The bulbs are located at the top of the compartment, inside the light shield. On some models, a screw at the front of the light shield will have to be removed.
- 3 To remove the light shield, press in on the tabs on the sides of the shield and slide forward and out.

- 4 After replacing the bulb with an appliance bulb of the same or lower wattage, replace the light shield and screws (on some models). When replacing the light shield, make sure that the tabs at the back of the shield fit into the slots at the back of the light shield housing.
- 5 Plug the refrigerator back in.

Fresh food compartment—lower light

Setting the controls to OFF does not remove power to the light circuit.

This light is located above the top pan.

- 1 Unplug the refrigerator.
- 2 Remove the convertible meat drawer control knob by pulling straight out.
- 3 Lift the light shield up and pull it out.
- 4 After replacing the bulb with an appliance bulb of the same or lower wattage, replace the shield and the knob.
- 5 Plug the refrigerator back in.

Freezer compartment

Setting the controls to OFF does not remove power to the light circuit.

- 1 Unplug the refrigerator.
- 2 Remove the shelf just above the light shield. (The shelf will be easier to remove if it is emptied first.) On some models, a screw at the top of the light shield will need to be removed.
- 3 To remove the light shield, press in on the sides, and lift up and out.

- 4 Replace the bulb with an appliance bulb of the same or lower wattage, and reinstall the light shield. When reinstalling the light shield, make sure the top tabs snap securely into place. Replace the screw (on some models).
- 5 Reinstall the shelf and plug the refrigerator back in.

Dispenser

Setting the controls to OFF does not remove power to the light circuit.

- 1 Unplug the refrigerator.
- 2 The bulb is located on the dispenser under the control panel. Remove the light bulb by turning it counterclockwise.

- 3 Replace the bulb with a bulb of the same size and wattage.
- 4 Plug the refrigerator back in.

Normal operating sounds

Newer refrigerators sound different from older refrigerators. Modern refrigerators have more features and use newer technology.

Do you hear what I hear? These sounds are normal.

HUMMM... WHOOSH...

- The new high efficiency compressor may run faster and longer than your old refrigerator and you may hear a high-pitched hum or pulsating sound while it is operating.
- Sometimes the refrigerator runs for an extended period, especially when the doors are opened frequently. This means that the **Frost Guard™** feature is working to prevent freezer burn and improve food preservation.
- You may hear a whooshing sound when the doors close. This is due to pressure equalizing within the refrigerator.

WHIR!

- You may hear the fans spinning at high speeds. This happens when the refrigerator is first plugged in, when the doors are opened frequently or when a large amount of food is added to the refrigerator or freezer compartments. The fans are helping to maintain the correct temperatures.
- If either door is open for over 3 minutes, you may hear the fans come on in order to cool the light bulbs.
- The fans change speeds in order to provide optimal cooling and energy savings.
- You may hear the fans running after selecting one of the **CustomCool™** settings.

CLICKS, POPS, CRACKS and CHIRPS

- You may hear cracking or popping sounds when the refrigerator is first plugged in. This happens as the refrigerator cools to the correct temperature.
- Electronic dampers click open and closed to provide optimal cooling and energy savings.
- The compressor may cause a clicking or chirping sound when attempting to restart (this could take up to 5 minutes).
- The electronic control board may cause a clicking sound when relays activate to control refrigerator components.
- Expansion and contraction of cooling coils during and after defrost can cause a cracking or popping sound.
- On models with an icemaker, after an icemaking cycle, you may hear the ice cubes dropping into the ice bucket.

WATER SOUNDS

- The flow of refrigerant through the freezer cooling coils may make a gurgling noise like boiling water.
- Water dropping on the defrost heater can cause a sizzling, popping or buzzing sound during the defrost cycle.
- A water dripping noise may occur during the defrost cycle as ice melts from the evaporator and flows into the drain pan.
- Closing the door may cause a gurgling sound due to pressure equalization.

For additional information on normal icemaker and dispenser operating sounds, see the **Automatic Icemaker** and **Ice and Water Dispenser** sections.

PROBLEM	POSSIBLE CAUSE
REFRIGERATOR DOES NOT OPERATE	<ul style="list-style-type: none"> • Refrigerator may be in defrost cycle when motor does not operate for about 30 minutes. • Either or both controls set to OFF. Set to a temperature setting. • If interior light is not on, refrigerator may not be plugged in at wall outlet. Push the plug completely into the wall outlet. • The fuse is blown/circuit breaker is tripped. Replace fuse or reset the breaker. • The refrigerator is in showroom mode. Unplug it and plug it back in.
VIBRATION OR RATTLING (Slight vibration is normal.)	<ul style="list-style-type: none"> • Adjust the rollers as shown in the Installation Instructions.
MOTOR OPERATES FOR LONG PERIODS OR CYCLES ON AND OFF FREQUENTLY (Modern refrigerators with more storage space and a larger freezer require more operating time. They start and stop often to maintain even temperatures.)	<ul style="list-style-type: none"> • Normal when refrigerator is first plugged in. Wait 24 hours for the refrigerator to completely cool down. • Often occurs when large amounts of food are placed in refrigerator. This is normal. • Door left open or package holding door open. • Hot weather or frequent door openings. This is normal. • Temperature controls set at the coldest setting. See Temperature Controls.
FRESH FOOD OR FREEZER COMPARTMENT TOO WARM	<ul style="list-style-type: none"> • Temperature controls not set cold enough. See Temperature Controls. • Warm weather or frequent door openings. • Door left open for long time. • Package may be holding door open.
FROST OR ICE CRYSTALS ON FROZEN FOOD (Frost within package is normal.)	<ul style="list-style-type: none"> • Door left open or package holding door open. • Too frequent or too long door openings.
DIVIDER BETWEEN FRESH FOOD AND FREEZER COMPARTMENTS FEELS WARM	<ul style="list-style-type: none"> • Automatic energy saver system circulates warm liquid around the front edge of the freezer compartment to help prevent condensation from forming on the outside.
AUTOMATIC ICEMAKER DOES NOT WORK	<ul style="list-style-type: none"> • Icemaker power switch is in the O (off) position. • Water supply turned off or not connected. See Installation Instructions. • Freezer compartment too warm. Allow 24 hours for the refrigerator to completely cool down. • Piled up cubes in storage bin cause icemaker to shut off. Level cubes in bin. • Ice cubes stuck in icemaker (green power light on the icemaker is blinking). Turn off the icemaker, remove cubes and turn the icemaker back on.

* Tested using a flow rate of 0.5 gpm (1.8927 l/m); pressure of 120 psig (8.437 kg/cm²); pH of 7.5±0.5; temp. of 68°±4.5° F (20°±2.5° C)

** Measurement in particles/ml

*** NTU = Nephelometric Units

Operating Specifications

- Capacity: certified for up to 500 gallons (1893 liter); up to one year
- Pressure requirement: 40-120 psi (2.8-8.2 bar), non-shock
- Temperature: 33°-100° F (0.6°-38° C)
- Flow rate: 0.5 gpm (1.9 lpm)

General Installation/Operation/Maintenance Requirements

- Flush new cartridge at full flow for 3 minutes to purge out trapped air.
- Replace cartridge when flow becomes too slow.

Special Notices

- Installation instructions; parts and service availability; and standard warranty are included with the product when shipped.
- This drinking water system must be maintained according to manufacturer's instructions, including replacement of filter cartridges.
- Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.
- The contaminants or other substances removed or reduced by this water treatment system are not necessarily in your water.
- Check for compliance with the state and local laws and regulations.

Manufacturer: General Electric Appliances

The water treatment device(s) listed on this certificate have met the testing requirements pursuant to Section 116830 of the Health and Safety Code for the following health related contaminants:

Microbiological Contaminants and Turbidity

Cysts (protozoan)
Turbidity

Inorganic/Radiological Contaminants

Asbestos
Lead

Organic Contaminants

Atrazine
Lindane
2,4-D

Rated Service Capacity: 300 gallons*

Rated Service Flow: 0.5 gpm

Do not use where water is microbiologically unsafe or with water of unknown quality, except that systems claiming cyst reduction may be used on water containing cysts.

* 500 gallons for models that include a replacement filter indicator light.

With the purchase of your new Monogram appliance, receive the assurance that if you ever need information or assistance from GE, we'll be there. All you have to do is call—toll-free!

GE Answer Center®

***In the USA:
800.626.2000***

Whatever your question about any Monogram major appliance, GE Answer Center® information service is available to help. Your call—and your question—will be answered promptly and courteously. And you can call any time. GE Answer Center® service is open 24 hours a day, 7 days a week.

In Canada, call 1.888.880.3030.

In-Home Repair Service

***In the USA:
800.444.1845***

***In Canada:
1.888.880.3030***

A GE consumer service professional will provide expert repair service, scheduled at a time that's convenient for you. Many GE Consumer Service company-operated locations offer you service today or tomorrow, or at your convenience (7:00 a.m. to 7:00 p.m. weekdays, 9:00 a.m. to 2:00 p.m. Saturdays). Our factory-trained technicians know your appliance inside and out—so most repairs can be handled in just one visit.

For Customers With Special Needs...

***In the USA:
800.626.2000***

GE offers Braille controls for a variety of GE appliances, and a brochure to assist in planning a barrier-free kitchen for persons with limited mobility.

Consumers with impaired hearing or speech who have access to a TDD or a conventional teletypewriter may call 800.TDD.GEAC (800.833.4322) to request information or service.

Service Contracts

***In the USA:
800.626.2224***

***In Canada:
1.888.880.3030***

You can have the secure feeling that GE Consumer Service will still be there after your warranty expires. Purchase a GE contract while your warranty is still in effect and you'll receive a substantial discount. With a multiple-year contract, you're assured of future service at today's prices.

Parts and Accessories

***In the USA:
800.626.2002***

***In Canada:
1.888.880.3030***

Individuals qualified to service their own appliances can have parts or accessories sent directly to their home. The GE parts system provides access to over 47,000 parts...and all GE Genuine Renewal Parts are fully warranted. VISA, MasterCard and Discover cards are accepted.

User maintenance instructions contained in this manual cover procedures intended to be performed by any user. Other servicing generally should be referred to qualified service personnel. Caution must be exercised, since improper servicing may cause unsafe operation.

YOUR MONOGRAM REFRIGERATOR WARRANTY

Staple sales slip or cancelled check here. Proof of original purchase date is needed to obtain service under warranty.

WHAT IS COVERED

From the Date of the Original Purchase

FULL ONE-YEAR WARRANTY

For one year from date of original purchase, we will provide, free of charge, parts and service labor in your home to repair or replace *any part of the refrigerator* that fails because of a manufacturing defect.

FULL FIVE-YEAR WARRANTY

For five years from date of original purchase, we will provide, free of charge, parts and service labor in your home to repair or replace *any part of the sealed refrigerating system* (the compressor, condenser, evaporator and all connecting tubing) that fails because of a manufacturing defect.

.....
This warranty is extended to the original purchaser and any succeeding owner for products purchased for ordinary home use in the 48 mainland states, Hawaii, Washington, D.C. or Canada. In Alaska the warranty is the same except that it is LIMITED because you must pay to ship the product to the service shop or for the service technician's travel costs to your home.

All warranty service will be provided by our Factory Service Centers or by our authorized Customer Care® servicers during normal working hours.

Should your appliance need service, during warranty period or beyond, in the USA call 800.444.1845. In Canada: 888.880.3030.

WHAT IS NOT COVERED

- Service trips to your home to teach you how to use the product.
- Replacement of house fuses or resetting of circuit breakers.
- Damage to the product caused by accident, fire, floods or acts of God.
- Failure of the product if it is used for other than its intended purpose or used commercially.
- Improper installation.
- If you have an installation problem, contact your dealer or installer. You are responsible for providing adequate electrical, plumbing and other connecting facilities.
- Loss of food due to spoilage (in the USA only).
- Incidental or consequential damage caused by possible defects with this appliance.

Some states/provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state/province to province. To know what your legal rights are in your state/province, consult your local or state/provincial consumer affairs office or your state's Attorney General.
