OWNER'S MANUAL

MODEL 385. 17922

IMPORTANT SAFETY INSTRUCTIONS

Your sewing machine is designed and constructed only for HOUSEHOLD use. Read all instruction before using this sewing machine.

DANGER — To reduce the risk of electric shock:

- 1. An appliance should never be left unattended when plugged in. Always unplug this appliance from the electric outlet immediately after using and before cleaning.
- 2. Always unplug before relamping. Replace bulb with same type rated 15 Watts.
- 3. Do not reach for the appliance that has fallen into water. Unplug immediately.
- 4. Do not place or store appliance where it can fall or be pulled into a tub or sink. Do not place in or drop into water or other liquid.

WARNING-To reduce the risk of burns, fire, electric shock,

or injury to persons.

- 1. Do not allow to be used as a toy. Close attention is necessary when this appliance is used by or near children.
- 2. Use this appliance only for its intended use as described in this manual. Use only attachments recommended by the manufacturer as contained in this manual.
- Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the appliance to the nearest authorized dealer or service center for examination, repair, electrical or mechanical adjustment.

- 4. Never operate the appliance with any air opening blocked. Keep ventilation openings of the sewing machine and foot controller free from accumulation of lint, dust, and loose cloth.
- 5. Never drop or insert any object into any opening.
- 6. Do not use outdoors.
- 7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
- 8. To disconnect, turn all controls to the off ("O") position, then remove plug from outlet.
- 9. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
- 10. Keep fingers away from all moving parts. Special care is required around the sewing machine needle.
- 11. Always use the proper needle plate. The wrong plate can cause the needle to break.
- 12. Do not use bent needles.
- Do not pull or push fabric while stitching. It may deflect the needle causing it to break.
- 14. Switch the sewing machine off ("O") when making any adjustment in the needle area, such as threading needle, changing needle, threading bobbin, or changing presser foot, and the like.
- 15. Always unplug the sewing machine from the electrical outlet when removing covers, lubricating, or when making any other adjustments mentioned in the instruction manual.

SAVE THESE INSTRUCTIONS

SEARS, ROEBUCK AND CO.

Dear Customer:

You have just invested in a very fine zigzag sewing machine. Before using your new Kenmore machine, please pause for a moment and carefully read this booklet which contains instructions on how to operate and care for your machine.

Specific instructions are given on threading, tension adjustments, cleaning, oiling, etc. This will help you obtain the best sewing results and avoid unnecessary service expense for conditions beyond our control.

Advice on the operation and care of your machine is always available at your nearest Sears Retail Store. Please remember, if you have questions about your machine or need parts and service, always mention the model number and serial number when you inquire.

Kenmore Sewing Machine

Record in space provided below the model number and serial number of this appliance. The model number and serial number are located on the nomenclature plate, as identified on Page 4 of this booklet.

Model No. 385.Serial No.Retain these numbers for future reference.

THIS MODEL IS A CENTER NEEDLE, LOW BAR SEWING MACHINE.

A Portable Case or Cabinet is Available

Locate and Identify the Parts

A full line of sewing cabinets is available at your nearest Sears retail store or through our general catalog.

Another option ..., buy a Carrying Case ..., then your Kenmore goes anywhere, can be stored anywhere.

Locate and Identify the Parts (Continued)

Identify the Accessories

Set Up the Machine

Plug in the Machine and Switch on the Power

- NOTE: Before inserting the plug into your machine, be sure the power switch is OFF.
- Check your outlet to be sure it is a 110 to 120 Volt AC outlet.
- 2. Insert the machine plug into the three-prong outlet, as shown. It will only fit one way.
- 3. Insert the power supply plug into the outlet.

 Push the light and power switch to turn on the power and sewing light.

SAFETY FEATURE:

Your machine will not operate unless the light/power switch is turned on. If you are interrupted or stop sewing, turn off the light/power switch to prevent injury to children.

Foot Control Use

The foot control regulates the speed at which you sew.

To increase speed, gently press down with the ball of your foot.

To decrease speed, release your foot pressure slightly.

NOTE: The foot control is sensitive and will increase or decrease your sewing speed immediately. Practice on a scrap of fabric to regulate your sewing speed to your taste and needs.

• Set the Pressure Dial

The pressure control dial is located inside the face cover plate.

Set the dial aligning the setting mark on the dial with the groove as follows.

- 3 most sewing
- 1 basting, sewing chiffon, lace, organdy and other lightweight fabrics. Also for velours and knits (with more stretch).
- 0 manual darning and embroidery
- NOTE: The pressure dial should be reset at 3 after changing pressure, so the machine is ready for most normal sewing the next time you use it.

Set Up the Machine (Continued)

Adjust the Presser Foot Lever

The Presser Foot Lever raises and lowers your presser foot.

You can raise it about 1/4" higher than the normal up position for easy removal of the presser foot or to help you place heavy fabrics under the presser foot. Thread Cutter

You don't need a pair of scissors to cut the thread after you finish sewing. Just use the handy thread cutter.

Accessory Storage Box

The lid of the accessory storage box lifts open toward you.

Sewing accessories are conveniently located in the box.

Free-Arm Sewing: the Removable Extension Table

To remove:

- To Remove the Extension Table (for free-arm sewing)
- 1. Grip the table with your index finger and thumb. as shown.
- 2. Pull it gently toward you. The extension table will snap out.

To Attach:

Your sewing machine can do free arm sewing, This feature makes sewing easy for:

Bar tacking to reinforce pockets, plackets and waistlines on ready-made or homemade garments to avoid fabric bunching around the needle.

Tab

- 1. Fit the tabs into the slot, as shown.
- 2. With your thumb and index finger, gently snap in.

Slot

Set Up the Machine (Continued)

* Stitching sleeves, waistbands, pants legs, or any circular garment area.

¹ Darning socks or mending knees, elbows, or areas of wear in children's clothes.

* Sewing buttons on sleeves, waistbands, etc.

Know What the Presser Feet Will Do

Check The Presser Foot

The Presser feet are an important feature of this machine. You need to know what each foot does in order to use them effectively.

Your presser foot is held in place by a Foot Holder. Each presser foot merely snaps on the foot holder, which is seldom removed.

If you need to remove or attach the foot holder, here is what you do:

To Remove:

To Remove:

Turn the screw toward the back of the machine. Use the large screw driver.

To Attach:

To Attach:

- 1. Match the hole in the foot holder with the threaded hole in the presser bar.
- 2. Fit the foot holder screw into the hole.
- 3. Tighten the screw by turning it toward you.

SECTION 2. PREPARE THE MACHINE FOR SEWING

• Change the Presser Foot

Use the correct presser foot for the stitch you wish to sew. Consult the Stitch Pattern Chart and the detailed directions for sewing with the various presser feet.

To Snap Off:

To Snap Off the Presser Foot:

- 1. Raise the needle bar to its highest position by turning the hand wheel toward you.
- 2. Raise the presser foot.
- 3. Press the snap-on button on the back of the foot holder. The presser foot will drop off.

Know What the Presser Feet Will Do (Continued)

• Change the Presser Foot (Continued)

Presser Foot Types

Use this foot for both straight and zigzag stitcing.

Uses: Zigzag stitching (see page 36), Bar tacking (see page 38), Button sewing (see page 40), Overcasting stitch (see page 41), Blind hemming (see page 42), Lace work (see page 43). Three-step zigzag (see page 44), Box stitching (see page 45). Fagoting (see page 46). Two-point shell stitching (see page 47), Rick-rack stretch (see page 49), Overcast stretch (see page 50), Smocking (see page 50). Elastic stretch (see page 51), Stretch patching (see page 52), Herring bone stretch (see page 52), Twin needle stitching (see page 55). Straight Foot H: Straight foot

Use this foot exclusively for straight stitching using center needle position only.

Uses: Straight stitching (see page <u>31</u>), Topstitching (see page <u>32</u>), Straight stretch (see page <u>49</u>).

To Snap On

To Snap On the Presser Foot:

- 1. Place the presser foot so the horizontal pin on the foot lies just under the groove of the foot holder.
- 2. Lower the presser foot holder to lock the presser foot in place.
- NOTE: If you do not hear the presser foot snap in place, press down on the presser foot holder firmly until you hear the snap.

Presser Foot Types (Continued)

Use this foot for buttonholes of built-in system. It is marked to measure your buttonholes accurately.

Uses: Built-in buttonhole (see page 53).

This foot can be set to sew on each side of your zipper. The edges of the foot guide the zipper and keep the seam straight.

Uses: Zipper application (see page 33).

Use this transparent foot for satin stitch and outlining applique.

Uses: Darning (see page <u>35</u>), Monogramming (see page <u>36</u>), Satin stitch (see page <u>37</u>), Applique (see page <u>38</u>), Shell stitching (see page <u>45</u>), Geometric decorative stitching (see page <u>48</u>), Twin needle stitching (see page <u>55</u>).

Choose the Needle and Thread

Your choice of needle and thread depends on the fabric you are sewing.

In the needle case, you will find the following color-coded needles:

Blue (11).	for stretch fabrics
Orange (11)	for lightweight fabrics
Red (14)	for medium or medium-heavy weight tabrics
Purple (16)	for medium-heavy weight and decorative topstitching on these tabrics
	(This needle has a larger thread hole for thicker topstitching thread.)
Green (18)	for heavy weight fabrics and decorative top- stitching on these fabrics

Check the Needle

- 1. Look for barbed or blunt point.
- 2. A damaged needle can cause permanent snags or runs in knits, fine silks
- and silk-like fabrics.

Always buy a good quality thread. It should resist tangling and be strong, smooth and consistent in thickness.

Fabric, Needle, Thread and Stitch Length Chart

FABRIC	NEEDLE SIZE AND COLOR	THREAD SIZE	RECOMMENDED STITCH LENGTH SETTING
Lightweight: Batiste, Dimity, Chiffon, Silks, Fine Lace, Organza, Crepe, Taffeta, Voile, Organdy	11-ORANGE	Polyester Core/Cotton Wrap Fine Mercerized Cotton Silk A	2 (12 stitches per inch)
Medium Weight: Cotton, Cotton Blend, Percale, Gingham, Shantung, Pique, Seersucker, Satin, Knit, Suitings, Linen, Wool, Crepe, Leather	14-RED	50 Mercerized Cotton Polyester Core/Cotton Wrap Silk A	2–2.5 (10-12 stitches per inch)
Medium Heavy Weight: Corduroy, Denim, Wool, Sailcloth, Wool Flannel, Gabardine, Velvet, Leather	14-RED 16-PURPLE	50 Mercerized Cotton Mercerized Heavy-Duty Polyester Core/Cotton Wrap Silk A	2—3 (8-10 stitches per inch)
Heavy Weight: Coating, Upholstery Cotton Duck, Heavy Twills, Canvas	16-PURPLE 18-GREEN	Heavy Duty Mercenzed Cotton Polyester Core/Cotton Wrap Silk A	3 (8 stitches per inch)
Decorative top-stitching on all types of fabric	16-PURPLE 18-GREEN	Buttonhole Twist (Use as top thread only)	3-4 (6-8 stitches per inch)
Stretch Fabric: Polyester Double Knit, Nylon Tricot, Jersey, Stretch Terry, Spandex, Cire Tricot	11-BLUE (STRETCH FABRIC NEEDLE)	Polyester Care/Cotton Wrap 50 Mercerized Cotton	2–2.5 (10-12 stitches per inch)

• To Change the Needle

NOTE: Raise the needle bar to its highest position by turning the hand wheel toward you.

- 1. Loosen the needle clamp screw by turning it toward you.
- 2. Remove the needle by pulling it downward.
- 3. Insert the new needle into the needle clamp with the flat side away from you.
- 4. Push the needle up as far as it will go.
- 5. Tighten the needle clamp screw firmly with the large screwdriver from your accessory storage box.

Prepare the Bobbin

To Remove the Bobbin from the Machine

(1) Remove the cover plate by (2) Take out the bobbin. sliding the hook cover plate release button to the right.

Tilt up the spool pin. Place the spool of thread on the spool pin with the thread coming off the spool as shown.

Attach the large spool holder pressing it firmly against the thread spool.

• The small spool holder is used with narrow or small thread spools.

The additional spool pin is used to wind extra bobbins without unthreading the machine.

To use, insert the additional spool pin in the hole. Place the felt and the spool on the pin.

Bobbin Winding

- (1) Pull the clutch knob away from the machine to disengage clutch.
- (2) Draw the thread from the spool.
- (3) Guide the thread around the bobbin winder thread guide.
- (4) Insert the thread through the hole in the bobbin, threading from the inside to the outside.
- (5) Put the bobbin on the bobbin winding spindle, and push it to the right.
- (6) With the free end of the thread held in your hand, depress the foot control.
- (7) Stop the machine when it has made a few turns, and cut the thread close to the hole in the bobbin. Depress the foot control again. When the bobbin is fully wound, it will stop automatically.
- (8) Return the bobbin winder to its original position by moving the spindle to the left, and cut the thread as shown.
- (9) Push in the clutch knob to engage clutch.
- * The machine will not sew until the clutch knob is pushed in.

Prepare the Bobbin (Continued)

• Insert the Bobbin into the Bobbin Holder

1. Put the bobbin into the bobbin holder so that the thread feeds counter-clockwise (left).

2. Pull about 4 inches of thread toward you through the tension slot (\widehat{A}) .

3. Then pull the thread clockwise toward the back of the machine through the slot (B) .

4. Pull out about 15 cm (6") of thread and attach the hook cover plate.

- Prepare the Top Thread
- Thread the Needle

The numbered steps above follow the numbers on the illustrations.

Dotted lines show places where the thread loops and then is pulled tight.

Raise the take-up lever to its highest position by turning the hand wheel toward you. Raise the presser foot lever.

Place the spool on the spool pin as shown, with thread coming from the back of the spool.

- 1. Draw thread into thread guide using both hands.
- 2. While holding thread near spool, draw thread down into the tension area and then around the check spring holder.
- 3. Firmly draw thread up and through take-up lever from right to left.
- 4. Draw thread down and slip it through the thread guide.
- 5. Thread then is slipped into needle bar thread guide.
- 6. Thread needle from front to back.

NOTE: Cut the end of the thread with sharp scissors for easier needle threading.:

- Prepare the Top Thread (Continued)
- Pick Up the Bobbin Thread

1. Raise presser foot lever. Hold needle thread loosely in left hand and rotate hand wheel toward you one complete turn.

2. Bring bobbin thread up by pulling top thread.

 Pull both threads under and to the back of the presser foot, leaving 4 to 6 inches of thread clear.

For Straight Stitch

The ideal straight stitch will have threads locked between the two layers of fabric, as shown above, magnified to show detail.

If you look at the stitch, front and back, you will notice that there are no gaps, that each stitch is smooth and even.

When adjusting top thread tension, the higher the number, the tighter the top thread.

Tension is too loose:

The top thread shows through the bottom of the fabric. The bottom side of the stitch will feel bumpy.

Tension is too tight:

The bobbin thread will come through the top of the fabric. The top side of the stitch will feel bumpy.

For Zigzag Stitch

In the correct zigzag stitch, the bobbin threads will not show on the top side of fabric and the top threads will show slightly on the bottom side. See below for the correct appearance. To match this appearance, adjust the top tension.

Top tension Too Tight

Bottom side of Fabric

Too Tight:

 Corner of each zigzag will pull together on the top side of fabrics.

Top side of Fabric

Bottom side of Fabric

Too Loose:

---- The top thread will loop through bottom side of tabric and will be pulled almost together.

Top side of Fabric

Just Right:

Minimize the amount of top thread visible on the bottom side of fabric without causing excessive puckering or causing the bobbin thread to show on the top side. Results vary with tabric, thread and sewing conditions.

Stitch Selector

The stitch selector control determines the stitch you select.

Simply turn this control until the desired stitch is indicated by the red indicator on the stitch indicator panel. The bottom row of stitches is selected when the stitch length control is set at the stretch stitch position.

NOTE: To avoid needle or fabric damage, be sure your needle is up and out of fabric when selecting a stitch.

Stitch patterns are color-coded to recommend setting zones at the stitch length control.

ZONES

- Red Straight, Zigzag and Utility Stitches

Adjusting Stretch Stitch Balance

In stretch stitch sewing, the stretch stitch adjuster should usually be in a neutral position \blacktriangleright or between "+" and "-" position. When sewing some fabrics, you may need to adjust this control to balance the stitches for appearance sake.

If the design seems open like the illustrations to the left, adjust the control slightly toward "--" until it looks like the center design.

If the design appears to be closed as in the right hand illustrations, turn the control toward "+" until stitching is as you desire.

Rickrack stretch

Stitch Width Control

Stitch Length Control

The stitch width control regulates the width The stitch length control regulates the length of the stitch you select.

The higher the number, the wider the stitch. The higher the number, the longer the stitch.

The " 🍴 " is the maximum width for twin needle stitches.

The blue zone is adjustable area for button hole stitches.

of stitch, and also has a stretch stitch setting.

```
0 means no feed.
```

To select the Stretch Stitches, set this control at Stretch Stitch.

NOTE: When you select decorative stitches (green) or built-in buttonhole (blue), make sure that you do not set the stitch length control at "Stretch Stitch". Study the red, green, yellow and blue sections around this control. These are recommended zones of stitch length and color-coded to the stitches pictured on the stitch indicator panel.

Reverse Stitch Control

To reverse stitch, hold down this control during sewing.

Release to sew forward again.

Starting To Sew

Now that you are familiar with the controls on your machine and with the accessories provided for the machine, you are ready to start to sew with your new Kenmore sewing machine. Below are some good habits to follow each time you sit down to sew:

- 1. Inspect the needle. It should be straight, properly set and sharp on the point. It should be the correct size for the fabric and thread being used. Do not be afraid to change your needle frequently. Many of the new fabrics made of synthetic blends tend to dull the needles more easily than fabrics made of natural fibers.
- 2. Before placing the material on the machine, see that the ends of the threads have been drawn about 4 inches to the rear of the machine. Hold on to threads during the sewing of the first 3 or 4 stitches of the seam.
- 3. Test the machine stitch on a scrap of the fabric you plan to use. The fabric should be double thickness. Adjust the machine for the length of stitch and tension suitable to the fabric.
- 4. Fabric should be placed under the presser foot with the bulk of the material to the left of the needle and the right edge of the material placed on the 5/8" seam marking on the needle plate when making a simple seam.
- 5. Run the machine at a slow even speed. The more pressure you put on the foot control, the faster the machine will sew.
- 6. Fasten each seam by back tacking sewing a few stitches in reverse.
- 7. Always finish sewing each seam with the needle at its highest point.
- 8. Guide the fabric gently with your hand in front of the needle. Never pull or hold the fabric in such a way that the normal feeding is altered.
- 9. When turning the hand wheel manually, always turn it toward you.

LEARN THE STITCHES SECTION 3.

Straight Stitches

Straight Stitch

NOTE: Best sewing results are obtained with the straight stitch foot, but the zigzag foot will also provide acceptable results.

Before sewing with the straight stitch 7. At the beginning and end of the foot, always set the stitch width control to 0 to avoid breaking the needle.

- 1. Raise the presser foot.
- 2. Raise the needle to its highest 9. Cut the threads. position.
- 3. Place the edge of the fabric next to a stitching guide line on the needle plate (5/8" is most common).
- 4. Draw the threads toward the back and lower the presser foot.
- 5. Press the foot control.
- 6. Hold the fabric loosely and gently guide it along the guide line, so that it feeds naturally.

Do not force the fabric or try to pull it tight.

- seam, you may want to reverse to lock the stitch.
- 8. Raise the presser foot and remove the fabric.

Use the Seam Guides

The seam guides on the needle plate are engraved to help you measure seam width. The lines are 1/8" apart, with the 5/8" and 7/8" lines marked.

Turn a Square Corner

To turn a square corner 5/8" from the fabric edge:

- 1. Stop stitching and lower the needle by turning hand wheel toward you when the fabric edge facing you lines up with the cornering guide, as shown.
- 2. Raise the presser foot and turn the fabric to line the edge with the 5/8" seam guide.
- 3. Lower the presser foot and begin stitching in the new direction.

Straight Stitches (Continued)

Topstitching

<u>Here's How</u>

- 1. Lower the presser foot.
- 2. Keep the edge of the fabric next to the right edge of the presser foot.
- 3. Guide the fabric evenly along this edge to produce an even row of topstitching 5/8" from the edge.

The Stitch and Its Uses

Topstitching emphasizes the lines of your garment and keeps seams and edges flat and crisp.

Accent suits or blouses with one or two rows of topstitching around the outer edges of cuffs, lapels or collars.

Sew in a Zipper

Fabric Preparation:

Put the top sides of the fabric together and sew to the end of the zipper opening. Use the reverse to lock the stitches.

Sew the zipper opening with stitch length at "4" and top thread tension at "3".

- To sew on the left side of the zipper. attach the presser bar to the right pins
- To sew on the right side of the zipper, attach the presser bar to the left pins

To Sew:

- Reset stitch length at 2 and top 1. thread tension at 2 to 6. Fold back the left seam allowance as shown.
- 2. Turn under the right seam allowance to form a 1/8" fold.
- 3. Place the zipper teeth next to the 1/8" fold and pin in place.

- 4. Attach the presser bar to the right pins on the zipper foot.
- 5. Lower the zipper foot on the top side at the bottom of the zipper so that the needle pierces the fold and the zipper tape.
- 6. Sew through the fold and the zipper tape to the point where the slider begins.
- 7. Lower the needle to hold the fabric and raise the presser foot.

LEARN THE STITCHES SECTION 3.

Straight Stitches (Continued)

- 8. Open the zipper.
- 9. Lower the presser foot and stitch the rest of the seam.

fabric top side up.

- 10. Close the zipper and turn the 11. Remove the zipper foot and attach the presser bar to the left pins on the zipper foot.
 - 12. Stitch across and below the bottom of the zipper.
 - 13. Turn the corner and continue to quide the foot along the zipper teeth, as shown. Stitch through the fabric and

zipper tape.

- 14. Stop about 2" from the top of the zipper.
- 15. Lower the needle into the fabric and raise the presser foot.
- 16. Remove the basting stitches and open the zipper.
- 17. Lower the foot and stitch the rest of the seam. Make sure the fold is even.
Dropping the Feed Dogs

The drop feed lever is located underneath the free arm bed on the back side of the machine.

- (1) To raise the feed dogs, push the lever in the direction of the arrow as illustrated. Then turn the handwheel.
- Feed dogs must always be up for normal sewing.
- (2) For dropping the feed dogs, push the lever in the direction of the arrow as illustrated.

Darning

- 1. Drop the feed dogs.
- 2. Stretch the fabric with the hole in the center between embroidery hoops, as show.
- 3. Lower the presser bar and sew at a slow speed.
- 4. Move the fabric back and forth slowly until you have covered the darning area.
- 5. Turn the fabric 1/4 turn and sew another layer of stitching over the first layer.
- NOTE: If your fabric is thin or badly damaged use a separate piece of fabric under the hole to reinforce it.
- 6. When you finish darning, return the pressure dial to 3.

Zigzag Stitches

Basic Zigzag

The Stitch and Its Uses

The zigzag stitch is one of the most common and most versatile stitches on your machine. It can be a utility stitch for sewing buttons, buttonholes, hemming, overcasting, mending and darning. It can also be used to decorate with trims, appliques and cut-out work or as a decorative stitch.

Here's How

There are many ways to sew a zigzag stitch.

Consult the specific variations for detailed directions. Monogramming page <u>36</u>, Satin Stitch page <u>37</u>, Applique Work page <u>38</u>, Bar Tacking page <u>38</u>, Embroidery page <u>39</u>, Button Sewing page <u>40</u>, Overcasting page <u>41</u>.

Monogramming

- 1. Set the same as satin stitch.
- 2. Back the fabric with paper or interfacing.
- 3. Draw the letters on the fabric with tailor's chalk.
- Satin stitch, adjusting the stitch width as necessary to form each pattern.
- 5. If using paper, carefully remove it when you have finished sewing.

• Satin Stitch

The Stitch and Its Uses

The Satin stitch is a versatile and often used decorative stitch, but it can also be used to overcast a raw edge (for example, blankets, linens, tablecloths and napkins).

The Satin stitch is especially attractive in applique.

Here's How

Once your machine is set up to stitch, you may want to experiment on a scrap of the fabric you are planning to use. Too tight a satin stitch may pucker some light-weight fabrics.

Zigzag Stitches (Continued)

Applique

Baste (or fuse with iron-on fabric)oiner) applique pieces on the fabric. Stitch around the applique making sure the needle falls along the outer edge of the applique.

When sewing corners, lower the needle down into the fabric. Raise the presser foot and pivot the fabric to the right or left. • Bar Tacking

This stitch is similar to a very short satin stitch and is used to reinforce points of strain such as corners or pockets and straps on lingerie.

Sew 4 to 6 zigzag stitches.

Embroidery

Here's How

- 1. Drop the feed dogs (see page 38).
- 2. Remove foot holder (see page 11).
- 3. Adjust the stitch width as desired (see page 25).
- 4. Draw the design on to the fabric with tailor's chalk.
- 5. Stretch the fabric between embroidery hoops and place under the needle.
- 6. Lower the presser foot lever to engaged the top thread tension.
- Holding the top thread in your left hand, rotate the hand wheel toward you one complete turn.
 Pull the top thread to draw the bobbin thread through to the surface of the fabric.
- 8. Using a medium speed, stitch along the marked outline, guiding the fabric carefully by hand.
- 9. When finished embrodiering, raise the feed dogs (see page <u>38</u>).

An embroidery foot is an optional item for all models. Available at many sears stores.

Zigzag Stitches (Continued)

• Sew a Button

- Drop the feed dogs (see page 38).
- 1. Match the center of the button holes to the center of the slot on the presser foot.
- 2. Adjust the stitch width so that needle will drop in each hole.
- 3. Lower the foot to hold the button in place.

Turn the hand wheel by hand so that needle will enter either hole of the button.

4. Stitch several times.

To strength the shank, cut the threads leaving a 8" tail. Bring the needle thread down through the hole in the button and wind it around the shank.

Draw the thread to the bottom side and knot.

When finished, raise the feed dogs (see page <u>38</u>).

Overcasting Stitch

Helpful Hints

Start overcasting about 1/8" inside the raw corner of your seam. If you start right at the edge, the fabric will bunch up and the stitches will become tangled.

The Stitch and Its Uses

This zigzag variation is very useful in garment construction and in finishing raw edges of any sewing project.

Zigzag Stitches (Continued)

Blind Hemming

2. Measure, turn up your hem and pin.

NOTE: For light weight fabrics, you may need a double fold.

.;

- 3. Fold the material (bottom side out) on the edge to be stitched, as shown, leaving 1/4" of the finished hem edge showing.
- 4. Place garment under presser foot in such a manner that narrow zigzag stitches will be sewn on extended edge. The wide zigzag stitch should just catch the fold of the garment.
- 5. After hemming, press both sides of the finished hem. The top side of the garment will show only the blind stitches.

• Lace Work

Lace adds a fanciful, feminine touch to blouses and lingerie. Table linens and pillows become more elegant when trimmed with lace.

Turn raw edge of fabric under at least 5/8". Place lace underneath and topstitch using stretch blind hem stitch.

Trim excess fabric close to stitching.

Zigzag Stitches (Continued)

Three-Step Zigzag

Seam Finishing (Overcasting)

Place the fabric under the presser foot Position the tear under the needle so so that the edge will be slightly inside the right hand side of the presser foot.

Guide the work so sthe right-hand stitches fall at the edge of the fabirc.

Mending

that the stitching will catch both sides.

The Stitch and Its Uses

The three-step zigzag is a combination zígzag and straight stitch. You may use the three-step zigzag everywhere you would use the basic zigzag stitch. It has more strength, elasticity, and is flatter than a regular zigzag.

The three-step zigzag stitch is especially useful for:

- mending
- sewing patches smoothly and securely
- repairing straight tears
- finishing seams

The Stitch and Its Uses

The Shell Stitch is formed by sewing a blind hem over folded fabric. Several rows of shell stitching are called shell tucks.

Shell stitching can be used to finish hems, sleeve and neck openings.

Shell tucking can be used to create scalloped tucks on blouses and lingerie.

Here's How

- 1. For best effect:
 - set the stitch length as you desire.
 - you may need to tighten the top thread tension slightly.
 - allow the needle to just clear the folded edge of the fabric when it zigzags.
- 2. If you sew rows of shell stitches, space the rows 5/8" apart.

You can sew Shell Stitch on knits or soft silky wovens in any direction.

Box Stitching

Use this stitch to join heavy weight interlining.

Overlap two raw edges together and use this stitch to join them.

Zigzag Stitches (Continued)

• Fagoting Stitch

<u>Here's How</u>

- Fold under each fabric edge 5/8" and press.
- 2. Pin the two edges to paper or tear-away backing 1/8" apart.
- 3. Sew slowly, guiding the fabric so the needle catches the folded edge on each side.

The Stitch and Its Uses

Use this stitch to join two pieces of fabric to create an open work appearance and add design interest.

Two-point Shell Stitch

This stitch can also be used as a single overlock stitch.

Zigzag Stitches (Continued)

Decorate with Geometric Patterns

The Stitches and Their Uses

These stitches are purely decorative.

You can sew one row or several or vary the stitch width and length for special effects.

Experiment on a scrap of fabric to see what special effects are possible.

Here's How

- 1. Adjust the stitch width and length as you desire.
- 2. Practice the stitch on a scrap of fabric.
- 3. Mark the lines for decoration on the fabric, using a washable fabric marker.
- 4. Lower the needle at the starting point.
- 5. Lower the presser foot.
- 6. Gently guide the fabric along the maked line.

Stretch Stitches

Straight Stretch

The Stitch and Its Uses

This stitch is the stretch variation of the straight stitch, especially developed for knits and stretch fabrics. Stretch stitching can be used on other fabrics as well. It works well on curved seams and on any garments that will receive a great deal of strain (ex: children's clothes).

The stretch stitch does not actually stretch as it is being sewn, but is stitched in a forward and back motion (sometimes called a "reverseaction" stitch), so that it will give when the fabric stretches instead of breaking. This stitch can also be used for topstitching on all fabrics.

Rick-Rack Stretch

The Stitch and Its Uses

Sew on stretch fabrics in any area that you might use a zigzag stitch.

This stitch can be used as a decorative top stitch as well.

Stretch Stitches (Continued)

Overcast Stretch Stitching

The Stitch and Its Uses

This stitch can be used for sewing a seam with an overcast finish.

The seam is formed and finished in one operation. It can be used when you are making swimwear, ski pants and other garments that require stretch.

Here's How

Place the raw edge of the fabric to the LEFT of the needle as shown.

Stitch so the needle pierces the fabric just short of the outside edge.

Or, place your fabric to allow a 5/8" seam, then trim seam allowance after.

Raw or worn edges of older garments can be overcast to prevent further raveling.

NOTE: Use a blue stretch fabric needle, which effectively prevents skipped stitches.

With the stitch length at "4", sew straight stitching lines 3/8" apart across the area to be smocked.

Knot the threads along one edge. Pull the bobbin threads and distribute the gathers evenly. Secure the threads at the other end. Sew the decorative stitch between the gathering stitches. Pull out the gathering stitches.

NOTE: Loosen the top thread tension to make gathering easier.

The Stitch and Its Uses

Use this stitch when you want a narrow seam that you do not need to press open flat. It is ideal for 1/4" seams on knits or on medium to heavyweight woven fabrics where you want a narrow seam. It is also great for making spandex swim wear.

Here's How

Place the fabric under the presser foot so that the stitches are made over the edge.

NOTE: When using stretch knit fabric, use a blue stretch fabric needle which effectively prevents skipped stitches.

• Elastic Stretch Stitch

Choose this stitch to attach elastic to garments.

- Mark the elastic into quarters and match these to the center front, center back and side seams.
- 2. Place the middle of the elastic under the center of the presser foot and stitch into place, making sure the elastic is evenly distributed.

Stretch Stitches (Continued)

• Stretch Patching

- The Stitch and Its Uses
- For patching worn out elbows or knees.
- For patchwork quilting.

• Herring Bone Stretch

The Stitch and Its Uses

Use as hernming stitch for blankets, tableclothes and draperies.

Here's How

Place the fabric top side up, and sew 3/8'' from the edge.

Trim close to stitching. The stitch will prevent raveling.

Built-in Buttonhole

Adjusting the Stitch Density

Depending upon your fabric or your own preference in buttonholes, you may alter the buttonhole stitch density within the blue buttonhole range on the stitch length dial.

- 1. For less density, turn the dial toward "1"
- 2. For more density, turn the dial toward "0"
- NOTE: Always make a practice buttonhole on a scrap fabric you plan to use to find the more suitable stitch length.

- 1. a. Carefully mark the buttonhole length on your garment.
 - b. Change to the sliding buttonhole foot.
 - c. Insert the garment under the foot with the buttonhole marking running toward you.

- a. Move the slider (A) toward you so that the top mark (C) on the slider meets the start mark (B).
 - b. Line up the markings on the foot with the top mark on your garment.
 - c. Lower the presser foot.
- NOTE: The markings on the slider are engraved in centimeters.

- 3. a. Set the stitch selector at
 - Sew forward until you reach the front marking of your buttonhole.
- c. Stop sewing at the left stitch.

Built-in Buttonhole (Continued)

- 4. a. Set the stitch selector at
 - b. Sew 4 to 6 stitches.
 - c. Stop sewing at the right stitch.

- 5. a. Set the stitch selector at
 - b. Sew until you reach the back of the buttonhole.
 - c. Stop sewing at the right stitch.

- 6. a. Set the stitch selector at
 - b. Sew 4 to 6 stitches.
 - c. Stop sewing at the left stitch.
 - d. Raise the presser foot, and draw the fabric away from you. Cut both the needle and bobbin threads leaving about 10 cm (4") thread ends. Draw the needle thread to wrong side of fabric by pulling the bobbin thread. Then, knot the threads.

7. Remove the fabric and cut the hole open with the buttonhole opener in your accessory storage box.

NOTE:

When sewing at the edge of fabric, set sliding buttonhole foot as illustrared and sew in reverse ($3 \rightarrow \frac{4}{2} \rightarrow 1 \rightarrow \frac{4}{2}$).

Twin Needle Stitching

Illustration A

SECTION 4. PERFORMANCE PROBLEMS CHART

What to Do When

PROBLEM	PROBABLE CAUSE	CORRECTION
Irregular Stitches	Incorrect size needle. Improper threading. Loose upper thread tension. Pulling fabric. Loose presser foot. Unevenly wound bobbin. Nicks or burrs at hole of needle plate.	Choose correct size needle for thread and fabric. Rethread machine. Tighten upper thread tension. Do not pull fabric; guide it gently. Reset presser foot. Rewind bobbin. Replace needle plate, or polish off burrs completely.
Breaking Needle	Pulling fabric. Incorrect size needle. Incorrect setting of needle. Loose presser foot.	Do not pull tabric; guide it gently. Choose correct size needle for thread and tabric. Reset needle. Reset presser toot.
Bunching of Thread	Upper and lower threads not drawn back under presser foot before starting seam.	When starting a seam be sure to draw both threads under and back of presser foot about 4" and hold until a few stitches are formed.
Puckering	Incorrect thread tension. Using two different sizes or kinds of thread, Bent or blunt needle. Loose presser foot. Fabric too sheer or too soft.	Reset thread tension. Upper thread and bobbin thread should be same size and kind. Insert new needle. Reset presser foot. Use underlay of tissue paper.

SECTION 4. PERFORMANCE PROBLEMS CHART

PROBLEM	PROBABLE CAUSE	CORRECTION
Skipping Stitches	Incorrect size needle. Bent or blunt needle. Incorrect setting of needle. Tight upper thread tension.	Choose correct size needle for thread and fabric. Insert new needle, Reset needle, Loosen upper thread tension,
Breaking Upper Thread	Starting to stitch too fast. Improper threading. Tight upper thread tension. Incorrect size needle. Sharp eye in needle. Nicks or burrs at hole of needle plate.	Start to stitch at a medium speed. Rethread machine. Loosen upper thread tension. Choose correct size needle for thread and fabric. Insert new needle. Replace needle plate, or polish off burrs completely.
Breaking Bobbin Thread	Improper bobbin threading. Lint in bobbin holder or hook race.	Check bobbin threading. Clean bobbin holder and hook race.
Fabric not Moving	Darning plate in place. Stitch Length set at 0. Thread knotted under fabric. Push-pull clutch is disengaged.	Remove darning plate. Adjust Stitch Length Control. Place both threads back under presser foot before beginning to stitch. Push in the clutch.
Machine Jamming Knocking Noise	Thread caught in hook race. Lint in bobbin holder or hook race.	Disassemble and clean hook race. Clean bobbin holder and hook race.

SECTION 5. CARE FOR THE MACHINE

Replace the Light Bulb

- 1. Unplug the machine and open the face cover plate.
- CAUTION! The light bulb could be HOT. Protect your fingers when you handle it.
- 2. Push the bulb up and turn the bulb counter-clockwise to remove it.
- 3. Put the new bulb in by pushing it up and turning it clockwise.

Clean the Bobbin Holder

To insure that your machine operates at its best, you need to keep the essential parts clean at all times.

The bobbin area can collect dust and lint. Your machine can become sluggish or knock loudly if a thread is caught.

Turn off the power switch or unplug the machine.

Remove the cover plate by sliding the hook cover plate release button to the right.

Take out the bobbin. Brush out dust and lint or you may use a vacuum cleaner.

Insert the bobbin.

Attach the hook cover plate.

SECTION 5. CARE FOR THE MACHINE

Clean the Hook Race and Feed Dogs

- 1. Unplug the machine and remove 5, the presser foot and needle.
- 2. Remove the bobbin cover plate.
- 3. Remove the screw on the left side of the needle with the large screw driver.
- 4. Remove the needle plate.

 Use the ling brush to clean the 7. feed dogs, hook race and bobbin holder. Also use a soft, dry cloth.

Take out the bobbin. Lift up the

bobbin holder and remove it.

 Line up the triangle, marks and position the bobbin holder so the notch fits next to the stopper in the hook race.

Oiling the Machine

Open face cover plate and oil two points as shown below at least once a year. One or two drops of oil is sufficient.

Remove excess oil, otherwise it may stain fabrics.

In case machine is not used for an extended time, oil it before sewing. Use good quality sewing machine oil.

No other oiling is required

Above points are only area which require oiling on this machine.

PARTS LIST

All parts listed herein may be ordered from any Sears store or service center.

WHEN ORDERING REPAIR PARTS, ALWAYS GIVE THE FOLLOWING INFORMATION:

- 1. PART NUMBER
- 2. PART DESCRIPTION
- 3. MODEL NUMBER
- 4. NAME OF ITEM

If the parts you need are not stocked locally, your order will be electronically transmitted to a Sears Repair Parts Distribution Center for expedited handling.

WARRANTY

FULL 25-YEAR WARRANTY ON SEWING MACHINE HEAD

For 25 years from the date of purchase, Sears will, free of charge, repair detects in material or workmanship which appear in the mechanical components of the sewing machine head.

FULL TWO YEAR WARRANTY ON ELECTRICAL EQUIPMENT OF SEWING MACHINE

For two years from the date of purchase, Sears will, free of charge, repair defects in material or workmanship which appear in the electrical equipment of the sewing machine, including electronic components, motor, wiring, switch and speed control.

FULL 90-DAY WARRANTY ON ALL PARTS AND MECHANICAL ADJUSTMENTS

For 90 days from the date of purchase, Sears will, tree of charge, replace any parts and provide mechanical service necessary for proper operation of the sewing machine, except for normal maintenance.

WARRANTY SERVICE IS AVAILABLE BY RETURNING THE SEWING MACHINE TO THE NEAREST SEARS SERVICE CENTER/DEPARTMENT IN THE UNITED STATES.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

SEARS, ROEBUCK AND CO., D/817 WA, Hoffman Estates, IL 60179

SEWING MACHINE

Now that you have purchased your Kenmore Sewing Machine, should a need ever exist for repair parts or service, simply contact your nearest Sears Service Center. Be sure to provide all pertinent facts when you call or visit.

The model number of your Sewing Machine will be shown on your nomenclature plate on the back of your Sewing Machine. See page 4 for location.

WHEN ORDERING REPAIR PARTS, ALWAYS GIVE THE FOLLOWING INFORMATION:

*PART NUMBER *PART DESCRIPTION *MODEL NUMBER *NAME OF ITEM

If the parts you need are not stocked locally, your order will be electronically transmitted to a Sears Repair Parts Distribution Center for handling.

SEARS, ROEBUCK AND CO., Chicago, IL60684 U.S.A.
