WARNING:
Read and follow all Safety Rules and Operating Instructions before first use of this product.

For answers to your questions about this product:
Call 7 am–7 pm, Mon.–Sat., or 10 am–7 pm, Sun.
1-800-235-5878 (Hours listed are Central Time)

Sears, Roebuck and Co., Hoffman Estates, IL 60179 U.S.A.

545167679 Rev. 2 7/3/08 BRW
**ONE YEAR FULL WARRANTY ON CRAFTSMAN GAS WEEDWACKER**

When used and maintained according to the operator's manual, if this product fails due to a defect in material or workmanship within one year from the date of purchase, return it to any Sears store, Sears Service Center, or other Craftsman outlet in the United States for free repair (or replacement if repair proves impossible).

This warranty excludes cutting line, spark plug and air filter, which are expendable parts that can wear out from normal use in less than one year.

This warranty applies for only 90 days from purchase date if this product is ever used for commercial or rental purposes.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Sears, Roebuck and Co., Hoffman Estates, IL 60179

---

**IDENTIFICATION OF SAFETY SYMBOLS**

- **DANGER:** Use only specified trimmer head, spool, and recommended trimmer line. Never use blades, flailing devices, wire, rope, string, etc. This attachment is designed for line trimmer use only. Failure to follow these instructions may result in serious injury.

- **WARNING:** This unit can be dangerous! Careless or improper use can cause serious injury.

- Read the operator's manual before use. Failure to follow instructions could result in serious injury. Save operator's manual.

- Trimmer line can throw objects violently. You can be blinded or injured. Always wear hearing protection and safety glasses marked Z87. Always wear head protection, heavy, long pants, long sleeves, boots and gloves.
Hazard zone for thrown objects.
- Trimmer line throws objects violently.
- You and others can be blinded/injured.
- Keep children, bystanders, and animals 50 feet (15 meters) away.

Secure hair above shoulder length. Do not wear jewelry, loose clothing, or clothing with loose hanging straps, ties, tassels, etc. They can be caught in moving parts.

Assist handle to be positioned only below the arrow.

Never allow children to operate this unit.

Store unit indoors in a high, dry place out of the reach of children. Store unit and fuel in an area where fuel vapors cannot reach sparks or open flames from water heaters, electric motors or switches, furnaces, etc.

When servicing unit, use only identical replacement parts.

Always stop unit and disconnect spark plug before cleaning or servicing.

⚠️ WARNING: Fire hazard. Never mix, pour, or store gasoline or use the unit near a flame or sparks (including smoking, open flames, or work that can cause sparks).
Use unleaded gasoline and two-stroke oil mixed at a ratio of 40:1 (2.5%).

OPTIONAL ATTACHMENTS

These attachments used in combination with the specified powerhead have been evaluated to ANSI B175.3-2003, “Grass Trimmers and Brushcutters – Safety Requirements”.

Powerhead including trimmer attachment 358.79104
Brushcutter attachment 358.79244

These attachments used in combination with the specified powerhead have been evaluated to applicable ISO and EN safety requirement standards by the Swedish Machinery Testing Institute:

Edger attachment 358.79240
Cultivator attachment 358.79241
Blower attachment 358.79242
Pruner attachment 358.79245

SAFETY RULES

⚠️WARNING: When using gardening appliances, basic safety precautions must always be followed to reduce the risk of fire and serious injury. Read and follow all instructions. This power unit can be dangerous! Operator is responsible for following instructions and warnings on unit and in manual. Read entire operator’s manual before using unit! Be thoroughly familiar with the controls and the proper use of the unit. Restrict the use of this unit to persons who have read, understand, and will follow the instructions and warnings on the unit and in the manual. Never allow children to operate this unit.

If situations occur which are not covered in this manual, use care and good judgment. If you need assistance, contact your Sears Service Center or call 1-800-235-5878.

OPERATOR SAFETY

• Dress properly. Always wear safety glasses or similar eye protection when operating, or performing maintenance, on your unit (safety glasses are available). Eye protection should be marked Z87.
• Always wear face or dust mask if operation is dusty.
• Always wear heavy, long pants, long sleeves, boots, and gloves. Wearing safety leg guards is recommended.
• Always wear foot protection. Do not go barefoot or wear sandals. Stay clear of spinning line.
• Secure hair above shoulder length. Secure or remove loose clothing or clothing with loosely hanging ties, straps, tassels, etc. They can be caught in moving parts.
• Being fully covered also helps protect you from debris and pieces of toxic plants thrown by spinning line.
• Stay Alert. Do not operate this unit when you are tired, ill, upset or under the influence of alcohol, drugs, or medication. Watch what you are doing; use common sense.
• Wear hearing protection.
• Never start or run inside a closed room or building. Breathing exhaust fumes can kill.
• Keep handles free of oil and fuel.
• Always keep engine on the right hand side of your body.
• Hold the unit firmly with both hands.
• Keep trimmer head (or other optional attachment) below waist level and away from all parts of your body. Do not raise engine above your waist.
• Keep all parts of your body away from muffler and spinning line (or other optional attachment). A hot muffler can cause serious burns.
• Keep firm footing and balance. Do not overreach or use from unstable surfaces such as ladders, trees, steep slopes, rooftops, etc.
• Use only for jobs explained in this manual (or manuals for optional attachments).

UNIT / MAINTENANCE SAFETY

WARNING: Stop unit and disconnect the spark plug before performing maintenance (except carburetor adjustments).
• Look for and replace damaged or loose parts before each use. Look for and repair fuel leaks before use. Keep in good working condition.
• Replace trimmer head parts that are chipped, cracked, broken, or damaged in any other way before using the unit.
• Maintain unit according to recommended procedures. Keep cutting line at proper length.
• Use only Craftsman brand replacement line. Never use wire, rope, string, etc.
• Install required shield properly before using the unit. Use only specified trimmer head; make sure it is properly installed and securely fastened.
• Make sure unit is assembled correctly as shown in this manual.
• Make carburetor adjustments with lower end supported to prevent line from contacting any object.
• Keep others away when making carburetor adjustments.
• Use only recommended Craftsman accessories and replacement parts.
• Have all maintenance and service not explained in this manual performed by a Sears Service Center.

FUEL SAFETY
• Mix and pour fuel outdoors.
• Keep away from sparks or flames.
• Do not smoke or allow smoking near fuel or the unit or while using the unit.
• Avoid spilling fuel or oil. Wipe up all fuel spills before starting engine.
• Move at least 10 feet (3 meters) away from fueling site before starting engine. Stop engine and allow it to cool before removing fuel cap.
• Empty the fuel tank before storing or transporting the unit. Use up fuel left in the carburetor by starting the engine and letting it run until it stops.
• Store unit and fuel in area where fuel vapors cannot reach sparks or open flames from water heaters, electric motors or switches, furnaces, etc.
• Always store gasoline in a container approved for flammable liquids.

TRANSPORTING AND STORAGE
• Stop the unit before carrying.
• Allow engine to cool before storing or transporting in vehicle.
• Empty the fuel tank before storing or transporting the unit. Use up fuel left in the carburetor by starting the engine and letting it run until it stops.
• Store unit and fuel in area where fuel vapors cannot reach sparks or open flames from water heaters, electric motors or switches, furnaces, etc.
• Store unit so line limiter blade cannot accidentally cause injury. The unit can be hung by the shaft.
• Store unit out of reach of children. This unit is not equipped with an anti-vibration system and is intended for occasional use only.

SAFETY NOTICE: Exposure to vibrations through prolonged use of gasoline powered hand tools could cause blood vessel or nerve damage in the fingers, hands, and joints of people prone to circulation disorders or abnormal swellings. Prolonged use in cold weather has been linked to blood vessel damage in otherwise healthy people. If symptoms occur such as numbness, pain, loss of strength, change in skin color or texture, or loss of feeling in the fingers, hands, or joints, discontinue the use of this tool and seek medical attention. An anti-vibration system does not guarantee the avoidance of these problems. Users who operate power tools on a continual and regular basis must monitor closely their physical condition and the condition of this tool.
SPECIAL NOTICE: This unit is equipped with a temperature limiting muffler and spark arresting screen which meets the requirements of California Codes 4442 and 4443. All U.S. forest land and the states of California, Idaho, Maine, Minnesota, New Jersey, Oregon, and Washington require by law that many internal combustion engines be equipped with a spark arresting screen. If you operate in a locale where such regulations exist, you are legally responsible for maintaining the operating condition of these parts. Failure to do so is a violation of the law. For normal homeowner use, the muffler and spark arresting screen will not require any service. After 50 hours of use, we recommend that your muffler be serviced or replaced by a Sears Service Center.

LINE TRIMMER SAFETY

WARNING: Inspect the area to be trimmed before each use. Remove objects (rocks, broken glass, nails, wire, etc.) which can be thrown by or become entangled in line. Hard objects can damage the trimmer head and be thrown causing serious injury.

• Only use the trimmer attachment for trimming, scalping, mowing and sweeping. Do not use the trimmer attachment for edging, pruning or hedge trimming.
• Cut only from your left to your right. Cutting on right side of the shield will throw debris away from the operator.

ADDITIONAL SAFETY RULES FOR OPTIONAL ATTACHMENTS

WARNING: For each optional attachment used, read entire operators manual before use and follow all warnings and instructions in manual and on attachment.

WARNING: Ensure handlebar is installed when using brushcutter attachment. Attach handlebar above arrow on safety label on the upper shaft (engine end of unit). If your brushcutter attachment does not include a handlebar, a handlebar accessory kit (#530071451) is available from your Sears Service Center.

BLOWER/VACUUM SAFETY

WARNING: Inspect area before starting unit. Remove all debris and hard objects such as rocks, glass, wire, etc. that can ricochet, be thrown, or otherwise cause injury or damage during operation.

• Do not set unit on any surface except a clean, hard area while engine is running. Debris such as gravel, sand, dust, grass, etc., could be picked up by the air intake and thrown out through discharge opening, damaging unit, property, or causing serious injury to bystanders or operator.
Never place objects inside the blower tubes, vacuum tubes or blower outlet. Always direct the blowing debris away from people, animals, glass, and solid objects such as trees, automobiles, walls, etc. The force of air can cause rocks, dirt, or sticks to be thrown or to ricochet which can hurt people or animals, break glass, or cause other damage.

Never run unit without the proper equipment attached. When using your unit as a blower, always install blower tubes.

Check air intake opening, blower tubes or vacuum tubes frequently, always with engine stopped and spark plug disconnected. Keep vents and discharge tubes free of debris which can accumulate and restrict proper air flow.

Never place any object in air intake opening as this could restrict proper air flow and cause damage to the unit.

Never use for spreading chemicals, fertilizers, or other substances which may contain toxic materials.

To avoid spreading fire, do not use near leaf or brush fires, fireplaces, barbecue pits, ashtrays, etc.

**BRUSHCUTTER SAFETY**

**DANGER:** Blade can thrust violently away from material it does not cut. Blade thrust can cause amputation of arms or legs.

**WARNING:** Do not use trimmer head as a fastening device for the blade.

**WARNING:** Use only specified blade and make sure it is properly installed and securely fastened.

Cut from your left to your right.

Always use the handlebar and a properly adjusted shoulder strap with blade (see ASSEMBLY instructions in brushcutter attachment operator's manual).

**CULTIVATOR SAFETY**

**WARNING:** Rotating tines can cause serious injury. Keep away from rotating tines. Stop the engine and disconnect the spark plug before unclogging tines or making repairs.

**WARNING:** Inspect the area to be cultivated before starting the unit. Remove all debris and hard and sharp objects such as rocks, vines, branches, rope, string, etc.
• Avoid heavy contact with solid objects that might stop the tines. If heavy contact occurs, stop the engine and inspect the unit for damage.
• Never operate the cultivator without the tine cover in place and properly secured.
• Keep the tines and guard clear of debris.
• After striking a foreign object, stop the engine, disconnect the spark plug and inspect the cultivator for damage. Repair before restarting.
• Disconnect attachment from the drive engine before cleaning the tines with a hose and water to remove any build-up. Oil the tines to prevent rust.
• Always wear gloves when servicing or cleaning the tines. The tines become very sharp from use.
• Do not run unit at high speed unless cultivating.

HEDGE TRIMMER SAFETY

DANGER: RISK OF CUT. KEEP HANDS AWAY FROM BLADE - Blade moves momentarily after the trigger is released. Do not attempt to clear away cut material when the blade is in motion. Make sure engine is stopped, the spark plug wire is disconnected, and the blade has stopped moving before removing jammed material from the cutting blade. Do not grab or hold the unit by the cutting blade.

WARNING: Inspect the area before starting the unit. Remove all debris and hard objects such as rocks, glass, wire, etc. that can ricochet, be thrown, or otherwise cause injury or damage during operation.
• Do not use a cutting blade that is bent, warped, cracked, broken or damaged in any other way. Have worn or damaged parts replaced by your Sears Service Center.
• Always keep unit in front of your body. Keep all parts of your body away from the cutting blade.
• Keep the cutting blade and air vents clear of debris.

POLE PRUNER SAFETY

WARNING: The reciprocating blade/rotating chain can cause severe injury. Inspect the unit before use. Do not operate unit with a bent, cracked or dull blade or dull chain. Keep away from the blade/chain.

WARNING: The reciprocating blade/rotating chain is sharp. Do not touch. To prevent serious injury, always stop engine and ensure blade/chain has stopped moving, disconnect spark plug, and wear gloves when changing or handling the blade or chain.

WARNING: A coasting blade/rotating chain can cause injury while it continues to move after the engine is stopped. Maintain proper control of the unit until the blade/chain has completely stopped moving. Keep hands, face and feet at a distance from all moving parts. Do not attempt to touch or stop the blade or chain when it is moving.

WARNING: Falling objects can cause severe head injury. Wear head protection when operating this unit with a pole pruner attachment.

WARNING: To prevent serious injury, do not use more than one boom extension with a pole pruner attachment.

WARNING: Keep the pruner away from power lines or electrical wires.
• Only use for pruning limbs or branches up to 6 inches (15 cm) in diameter.
- Do not operate the unit faster than the speed needed to prune. Do not run the unit at high speed when not pruning.
- Always stop the unit when work is delayed or when walking from one cutting location to another.
- If you strike or become entangled with a foreign object, stop the engine immediately and check for damage. Have any damage repaired by a Sears Service Center before attempting further operations. Discard blades that are bent, warped, cracked or broken.
- Stop the unit immediately if you feel excessive vibration. Vibration is a sign of trouble. Inspect thoroughly for loose nuts, bolts or damage before continuing. Contact Sears Service for repair or replacement of affected parts as necessary.

**SNOW THROWER SAFETY**

⚠️ **WARNING:** Keep hands and feet away from the rotor when starting or running the engine. Never attempt to clear the rotor with the engine/motor running. Stop engine and disconnect spark plug before unclogging snow or debris from discharge chute or when adjusting vanes.

⚠️ **WARNING:** Never lean over discharge chute. Rocks or debris could be thrown into the eyes and face and cause serious injury or blindness.

⚠️ **WARNING:** Inspect the area where the unit is to be used. Remove objects that could be thrown or damage the unit. Some objects may be hidden by fallen snow – be alert for the possibility.

- Direct material discharge away from glass enclosures, automobiles, etc.
- Do not run engine at high speed while not removing snow.
- Be attentive when using the snowthrower, and stay alert for holes in the terrain and other hidden hazards.
- Make sure the rotor will spin freely before attaching the snowthrower to the powerhead.
- If the rotor will not rotate freely due to frozen ice, thaw the unit thoroughly before attempting to operate under power.
- Keep the rotor clear of debris.
- Do not throw snow near other people. The snow thrower could propel small objects at high speed causing injury.
- After striking a foreign object, stop the engine, disconnect spark plug and inspect the snowthrower for damage and repair if necessary before restarting unit.
- Never operate the snowthrower near glass enclosures, automobiles and trucks.
- Never attempt to use the snowthrower on a roof.
- Never operate the snowthrower near window wells, dropoffs, etc.
- Never operate the snowthrower near window wells, dropoffs, etc.
- Never discharge snow onto public roads or near moving traffic.
- Clear snow from slopes by going up and down; never across. Use caution when changing directions. Never clear snow from steep slopes.
- Let snowthrower run for a few minutes after clearing snow so moving parts do not freeze.
- Look behind and use care when backing up. Exercise caution to avoid slipping or falling, especially when operating in reverse.
- Know how to stop quickly.
CARTON CONTENTS
Check carton contents against the following list.
Model 358.791042
- Powerhead
- Trimmer attachment
- Shield
- Wing Nut (screwed onto shield)
- Container of line
- Container of oil
Examine parts for damage. Do not use damaged parts.
NOTE: If you need assistance or find parts missing or damaged, call 1-800-235-5878.

It is normal for the fuel filter to rattle in the empty fuel tank.
Finding fuel or oil residue on muffler is normal due to carburetor adjustments and testing done by the manufacturer.

ASSEMBLY

WARNING: Always stop unit and disconnect spark plug before performing any assembly procedures.

WARNING: If received assembled, repeat all steps to ensure your unit is properly assembled and all fasteners are secure.

INSTALLING TRIMMER ATTACHMENT
CAUTION: When installing trimmer attachment, place the unit on a flat surface for stability.
1. Loosen the coupler by turning the knob counterclockwise.
2. Remove shipping protector from coupler.
3. Remove the shaft cap from the trimmer attachment (if present).
4. Position locking/release button of attachment into guide recess of coupler.
5. Push the attachment into the coupler until the locking/release button snaps into the primary hole.
6. Before using the unit, tighten the knob securely by turning clockwise.

WARNING: Make sure the locking/release button is locked in the primary hole and the knob is securely tightened before operating the unit. All attachments are designed to be used in the primary hole unless otherwise stated in the applicable attachment operator's manual. Using the wrong hole could lead to serious injury or damage to the unit.

ATTACHING SHIELD

WARNING: The shield must be properly installed. The shield provides partial protection from the risk of thrown objects to the operator and others and is equipped with a line limiter blade which cuts excess line to the proper length. The line limiter blade (on underside of shield) is sharp and can cut you.
For proper orientation of shield, see KNOW YOUR TRIMMER illustration in OPERATION section.
1. Remove wing nut from shield.
2. Insert bracket into slot as shown.
3. Pivot shield until bolt passes through hole in bracket.
4. Securely tighten wing nut onto bolt.
ADJUSTING THE HANDLE

**WARNING:** When adjusting the assist handle, be sure it remains above the safety label and below the mark or arrow on the shaft.

1. Loosen wing nut on handle.
2. Rotate the handle on the shaft to an upright position; retighten wing nut.

---

**OPERATION**

**KNOW YOUR TRIMMER**

READ THIS OPERATOR'S MANUAL AND SAFETY RULES BEFORE OPERATING YOUR UNIT. Compare the illustrations with your unit to familiarize yourself with the location of the various controls and adjustments. Save this manual for future reference.

---

**ON/STOP SWITCH**

The ON/STOP switch is located on the trigger handle and is used to stop the engine. To stop the engine, push and release the engine ON/STOP switch.

**PRIMER BULB**

The PRIMER BULB removes air from the carburetor and fuel lines and fills them with fuel. This allows you to start the engine with fewer pulls on the starter rope. Activate the primer bulb by pressing it and allowing it to return to its original form.

**START LEVER**

The START LEVER helps to supply fuel to the engine to aid in starting. Activate the starting system by moving the start lever to the START position. DO NOT squeeze the throttle trigger until the engine has started and runs. After the engine starts, allow the engine to warm-up 5 seconds, then fully squeeze the throttle trigger to deactivate the starting system (start lever returns to RUN position).

**COUPLER**

The COUPLER enables optional attachments to be installed on the unit.

---

**BEFORE STARTING ENGINE**

**WARNING:** Be sure to read the fuel information in the safety rules before you begin. If you do not understand the safety rules, do not attempt to fuel your unit. Call 1-800-235-5878.

**FUELING ENGINE**

**WARNING:** Remove fuel cap slowly when refueling.

This engine is certified to operate on unleaded gasoline. Before operation, gasoline must be mixed with a good
quality synthetic 2-cycle air-cooled engine oil. We recommend Craftsman brand synthetic oil. Mix gasoline and oil at a ratio of 40:1. A 40:1 ratio is obtained by mixing 3.2 ounces of oil with 1 gallon of unleaded gasoline. Included with this trimmer is a 3.2 ounce container of oil. Pour the entire contents of this container into 1 gallon of gasoline to achieve the proper fuel mixture. DO NOT USE automotive oil or marine oil. These oils will cause engine damage. When mixing fuel, follow instructions printed on container. Once oil is added to gasoline, shake container momentarily to assure that the fuel is thoroughly mixed. Always read and follow the safety rules relating to fuel before fueling your unit.

IMPORTANT
Alcohol blended fuels (called gasohol or using ethanol or methanol) can attract moisture which leads to separation and formation of acids during storage. Acidic gas can damage the fuel system of an engine while in storage. To avoid engine problems, empty the fuel system before storage for 30 days or longer. Drain the gas tank, start the engine and let it run until the fuel lines and carburetor are empty. Use fresh fuel next season. Never use engine or carburetor cleaner products in the fuel tank or permanent damage may occur. See the STORAGE section for additional information.

HOW TO STOP YOUR UNIT
• Release the throttle trigger.
• Push and release the engine ON/STOP switch. The switch will automatically return to the ON position. Wait 5 seconds before attempting to restart unit to allow switch to reset.

HOW TO START YOUR UNIT

WARNING: Avoid any contact with the muffler. A hot muffler can cause serious burns.

STARTING A COLD ENGINE

NOTE: DO NOT squeeze the throttle trigger until the engine has started and runs.
1. Set unit on a flat surface.
2. Slowly press the primer bulb 6 times.
3. Move the start lever to the START position.

4. This unit has the Sim-pul™ starting system. You do not have to pull the starter rope handle sharply or briskly. Pull starter rope handle with a controlled and steady motion until engine starts and runs.
5. Allow unit to run for 5 seconds, then fully squeeze the throttle trigger to disengage the starting system (start lever returns to RUN position).

STARTING A WARM ENGINE
1. Squeeze and hold the throttle trigger.
2. Pull starter rope handle with a controlled and steady motion while squeezing throttle trigger until engine starts and runs.

NOTE: Normally, the warm starting procedure can be used within 5 to 10 minutes after the unit is turned off. If the unit sits for more than 10 minutes without being used, it will be necessary to start the unit by following the steps under STARTING A COLD ENGINE or following the starting instruction steps shown on the unit.

STARTING A FLOODED ENGINE

Flooded engines can be started by placing the start lever to the RUN position. Fully squeeze throttle trigger. Pull the starter rope handle repeatedly while squeezing throttle trigger until engine starts and runs. This could require pulling the starter rope handle many times, depending on how badly the unit is flooded. If the unit still doesn't start, refer to TROUBLESHOOTING TABLE or call 1-800-235-5878.
CRAFTSMAN® CONVERTIBLE™ FEATURE

This model is equipped with a coupler which enables optional attachments to be installed. The optional attachments are:

- Edger ................. 358.79240
- Cultivator .............. 358.79241
- Blower ................ 358.79242
- Brushcutter ............ 358.79244
- Pruner ................ 358.79245

⚠️ WARNING: Always stop unit and disconnect spark plug before removing or installing attachments.

REMOVING TRIMMER ATTACHMENT (OR OTHER OPTIONAL ATTACHMENTS)

CAUTION: When removing or installing attachments, place the unit on a flat surface for stability.

1. Loosen the coupler by turning the knob counterclockwise.
2. Press and hold the locking/release button.
3. While securely holding the engine and upper shaft, pull the attachment straight out of the coupler.

INSTALLING OPTIONAL ATTACHMENTS

1. Remove the shaft cap from the attachment (if present).
2. Position locking/release button of attachment into guide recess of coupler.
3. Push the attachment into the coupler until the locking/release button snaps into the primary hole.
4. Before using the unit, tighten the knob securely by turning clockwise.

⚠️ WARNING: Always wear eye protection and hearing protection. Never lean over the trimmer head. Rocks or debris can ricochet or be thrown into eyes and face and cause blindness or other serious injury.
When operating unit, stand as shown and check for the following:
• Wear eye protection, hearing protection and heavy clothing.
• Hold trigger handle with right hand and assistant handle with left hand.
• Hold unit so that engine is below waist level.
• Cut only from your right to your left to ensure debris is thrown away from you. Without bending over, keep line near and parallel to the ground and not crowded into material being cut.
Do not run the engine at a higher speed than necessary. The cutting line will cut efficiently when the engine is run at less than full throttle. At lower speeds, there is less engine noise and vibration.
Always release the throttle trigger and allow the engine to return to idle speed when not cutting.

HOW TO STOP YOUR UNIT
• Release the throttle trigger.
• Push and release the engine ON/STOP switch.

CUTTING METHODS

WARNING: Use minimum speed and do not crowd the line when cutting around hard objects (rock, gravel, fence posts, etc.), which can damage the trimmer head, become entangled in the line, or be thrown causing a serious hazard.
• The tip of the line does the cutting. You will achieve the best performance and minimum line wear by not crowding the line into the cutting area. The right and wrong ways are shown below.

- The line will easily remove grass and weeds from around walls, fences, trees and flower beds, but it also can cut the tender bark of trees or shrubs and scar fences.
- For trimming or scalping, use less than full throttle to increase line life and decrease head wear, especially:

  - During light duty cutting.
  - Near objects around which the line can wrap such as small posts, trees or fence wire.

TRIMMING – Hold the bottom of the trimmer head about 3 inches (8 cm) above the ground and at an angle. Allow only the tip of the line to make contact with vegetation. Do not force trimmer line into work area.

CUTTING METHODS

TRIMMING – Hold the bottom of the trimmer head about 3 inches (8 cm) above the ground and at an angle. Allow only the tip of the line to make contact with vegetation. Do not force trimmer line into work area.

SCALPING – The scalping technique removes unwanted vegetation down to the ground. Hold the bottom of the trimmer head about 3 inches (8 cm) above the ground and at an angle. Allow the tip of the line to strike the ground around trees, posts, monuments, etc. This technique increases line wear.

MOWING – Your trimmer is ideal for mowing in places conventional lawn mowers cannot reach. In the mowing position, keep the line parallel to the ground. Avoid pressing the head into the ground as this can scalp the ground and damage the tool.
SWEEPING - The fanning action of the rotating line can be used to blow away loose debris from an area. Keep the line parallel to and above the area surface and swing the tool from side to side.

MAINTENANCE

MAINTENANCE SCHEDULE

⚠️ WARNING: Disconnect the spark plug before performing maintenance except for carburetor adjustments.

<table>
<thead>
<tr>
<th>CARE &amp; MAINTENANCE TASK</th>
<th>WHEN TO PERFORM</th>
</tr>
</thead>
<tbody>
<tr>
<td>Check for loose fasteners and parts</td>
<td>Before each use</td>
</tr>
<tr>
<td>Check for damaged or worn parts</td>
<td>Before each use</td>
</tr>
<tr>
<td>Inspect and clean unit and decals</td>
<td>After each use</td>
</tr>
<tr>
<td>Clean air filter</td>
<td>Every 5 hours of operation</td>
</tr>
<tr>
<td>Inspect muffler and spark arresting screen</td>
<td>Every 50 hours of operation</td>
</tr>
<tr>
<td>Replace spark plug</td>
<td>Yearly</td>
</tr>
</tbody>
</table>

GENERAL RECOMMENDATIONS

The warranty on this unit does not cover items that have been subjected to operator abuse or negligence. To receive full value from the warranty, the operator must maintain unit as instructed in this manual. Various adjustments will need to be made periodically to properly maintain your unit.

CHECK FOR LOOSE FASTENERS AND PARTS

- Spark Plug Boot
- Air Filter
- Housing Screws
- Assist Handle Screw
- Debris Shield

CHECK FOR DAMAGED OR WORN PARTS

Contact Sears Service Center for replacement of damaged or worn parts.

- ON/STOP Switch - Ensure ON/STOP switch functions properly by pushing and releasing the switch. Make sure engine stops. Wait 5 seconds before attempting to restart unit to allow switch to reset. Restart engine and continue.
- Fuel Tank - Discontinue use of unit if fuel tank shows signs of damage or leaks.
- Debris Shield - Discontinue use of unit if debris shield is damaged.

INSPECT AND CLEAN UNIT AND DECALS

- After each use, inspect complete unit for loose or damaged parts. Clean the unit and decals using a damp cloth with a mild detergent.
- Wipe off unit with a clean dry cloth.

CLEAN AIR FILTER

A dirty air filter decreases engine performance and increases fuel consumption and harmful emissions. Always clean after every 5 hours of operation.

1. Clean the cover and the area around it to keep dirt from falling into the carburetor chamber when the cover is removed.
2. Remove parts by pressing button to release air filter cover.
3. Wash the filter in soap and water.
4. Allow filter to dry.
5. Replace parts.

NOTE: To avoid creating a fire hazard or producing harmful evaporative emissions, do not clean filter in gasoline or other flammable solvent.
WARNING: The muffler on this product contains chemicals known to the State of California to cause cancer. As your unit is used, carbon deposits build up on the muffler and spark arresting screen.

For normal homeowner use, however, the muffler and spark arresting screen will not require any service. After 50 hours of use, we recommend that your muffler be serviced or replaced by your Sears Service Center.

REPLACE SPARK PLUG
Replace the spark plug each year to ensure the engine starts easier and runs better. Set spark plug gap at 0.025 inch (0.6 mm). Ignition timing is fixed and nonadjustable.
1. Twist, then pull off spark plug boot.
2. Remove spark plug from cylinder and discard.
3. Replace with Champion RCJ-6Y spark plug and tighten securely with a 3/4 inch socket wrench.
4. Reinstall the spark plug boot.

SERVICE AND ADJUSTMENTS

LINE REPLACEMENT
- Always use Craftsman replacement line.

Choose the line size best suited for the job at hand. Red line is designed for cutting grass and small weeds. The black colored line is designed for cutting larger weeds and light brush.

NOTE: Before inserting new line into the holes in the cutting head, identify the proper holes. Follow directions as shown on the line glide plate.
1. Remove the old line and line glide plate from the cutting head.
2. Clean entire surface of cutting head.
3. Reinstall line glide plate (see illustration). Align arrow with:
   - when using medium (red) or large (black) line
   - when using lines with diameter smaller than medium (red) line (optional)

4. Insert both ends of your line through the proper holes in the side of the cutting head.
5. Pull the line and make sure the line is against the hub and extended full through the positioning tunnels.
6. Correctly installed line will be the same length on both ends.

CARBURETOR ADJUSTMENT

WARNING: Keep others away when making idle speed adjustments. The trimmer head will be spinning during most of this procedure. Wear your protective equipment and observe all safety precautions. After making adjustments, the trimmer head must not move or spin at idle speed.

The carburetor has been carefully set at the factory. Adjustments may be necessary if you notice any of the following conditions:
- Engine will not idle when the throttle is released.
• The trimmer head moves or spins at idle.

Make adjustments with the unit supported so the cutting attachment is off the ground and will not make contact with any object. Hold the unit by hand while running and making adjustments. Keep all parts of your body away from the cutting attachment and muffler.

Idle Speed Adjustment
Allow engine to idle. Adjust speed until engine runs without trimmer head moving or spinning (idle too fast) or engine stalling (idle speed too slow).
- Turn idle speed screw clockwise to increase engine speed if engine stalls or dies.
- Turn idle speed screw counterclockwise to decrease engine speed if trimmer head moves or spins at idle.

WARNING: Recheck the idle speed after each adjustment. The trimmer head must not move or spin at idle speed to avoid serious injury to the operator or others.

If you require further assistance or are unsure about performing this procedure, contact your Sears Service Center or call our customer assistance help line at 1-800-235-5878.

Fuel stabilizer is an acceptable alternative in minimizing the formation of fuel gum deposits during storage. Add stabilizer to the gasoline in the fuel tank or fuel storage container. Follow the mix instructions found on stabilizer container. Run engine at least 3 minutes after adding stabilizer.

Craftsman 40:1, 2-cycle engine oil (air cooled) is already blended with fuel stabilizer. If you do not use this Sears oil, you can add a fuel stabilizer to your fuel tank.

ENGINE
- Remove spark plug and pour 1 teaspoon of 40:1, 2-cycle engine oil (air cooled) through the spark plug opening. Slowly pull the starter rope 8 to 10 times to distribute oil.
- Replace spark plug with new one of recommended type and heat range.
- Clean air filter.
- Check entire unit for loose screws, nuts, and bolts. Replace any damaged, broken, or worn parts.
- At the beginning of the next season, use only fresh fuel having the proper gasoline to oil ratio.

OTHER
- Do not store gasoline from one season to another.
- Replace your gasoline can if it starts to rust.

STORAGE

WARNING: Perform the following steps after each use:
- Allow engine to cool before storing or transporting.
- Store unit and fuel in a well ventilated area where fuel vapors cannot reach sparks or open flames from water heaters, electric motors or switches, furnaces, etc.
- Store unit with all guards in place. Position unit so that any sharp object cannot accidentally cause injury.
- Store unit and fuel well out of the reach of children.

SEASONAL STORAGE
Prepare unit for storage at end of season or if it will not be used for 30 days or more.
If your unit is to be stored for a period of time:
- Clean the entire unit before lengthy storage.
- Store in a clean dry area.
- Lightly oil external metal surfaces.

FUEL SYSTEM
Empty the fuel system before storage for 30 days or longer. Drain the gas tank, start the engine and let it run until the fuel lines and carburetor are empty. Use fresh fuel next season. Under FUELING ENGINE in the OPERATION section of this manual, see message labeled IMPORTANT regarding the use of gasohol in your engine.

17
TROUBLESHOOTING TABLE

**WARNING:** Always stop unit and disconnect spark plug before performing all of the recommended remedies below except remedies that require unit to be operating.

YOUR WARRANTY RIGHTS AND OBLIGATIONS: The U.S. Environmental Protection Agency/California Air Resources Board and Sears, Roebuck and Co., U.S.A., are pleased to explain the emissions control system warranty on your year 2007 and later small off-road engine. In California, all small off-road engines must be designed, built, and equipped to meet the State’s stringent anti-smog standards. Sears must warrant the emission control system on your small off-road engine for the periods of time listed below provided there has been no abuse, neglect, or improper maintenance of your small off-road engine. Your emission control system includes parts such as the carburetor, the ignition system and the fuel tank (California only). Where a warrantable condition exists, Sears will repair your small off-road engine at no cost to you. Expenses covered under warranty include diagnosis, parts and labor.

MANUFACTURER'S WARRANTY COVERAGE: If any emissions related part on your engine (as listed under Emissions Control Warranty Parts List) is defective or a defect in the materials or workmanship of the engine causes the failure of such an emission related part, the part will be repaired or replaced by Sears. OWNER'S WARRANTY RESPONSIBILITIES: As the small off-road engine owner, you are responsible for the performance of the required maintenance listed in your operator’s manual. Sears recommends that you retain all receipts covering maintenance on your small off-road engine, but Sears cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance. As the small off-road engine owner, you should be aware that Sears may deny you warranty coverage if your small off-road engine or a part of it has failed due to abuse, neglect, improper maintenance, unapproved modifications, or the use of parts not made or approved by the original equipment manufacturer. You are responsible for presenting your small off-road engine to a Sears authorized repair center as soon as a problem exists. Warranty repairs should be completed in a reasonable amount of time, not to exceed 30 days. If you have any questions regarding your warranty rights and responsibilities, you should contact your nearest authorized service center or call Sears at 1-800-469-4663.

WARRANTY COMMENCEMENT DATE: The warranty period begins on the date the small off-road engine is purchased. LENGTH OF COVERAGE: This warranty shall be for a period of two years from the initial date of purchase. WHAT IS COVERED: REPAIR OR REPLACEMENT OF PARTS. Repair or replacement of any warranted part will be performed at no charge to the owner at an approved Sears Service Center. If you have any questions regarding your warranty rights and responsibilities, you should contact your nearest authorized service center or call Sears at 1-800-469-4663. WARRANTY PERIOD: Any warranted part which is not scheduled for replacement as required maintenance, or which is scheduled only for regular inspection to the effect of “repair or replace as necessary” shall be warranted for 2 years. Any warranted part which is scheduled for replacement as required maintenance shall be warranted for the period of time up to the first scheduled replacement point for that part. DIAGNOSIS: The owner shall not be charged for diagnostic labor which leads to the determination that a warranted part is defective if the diagnostic work is performed at an approved Sears Service Center. CONSEQUENTIAL DAMAGES: Sears may be liable for damages to other engine components caused by the failure of a warranted part still under warranty. WHAT IS NOT COVERED: All failures caused by abuse, neglect, or improper maintenance are not covered. ADD-ON OR MODIFIED PARTS: The use of add-on or modified parts can be grounds for disallowing a warranty claim. Sears is not liable to cover failures of warranted parts caused by the use of add-on or modified parts. HOW TO FILE A CLAIM: If you have any questions regarding your warranty rights and responsibilities, you should contact your nearest authorized service center or call Sears at 1-800-469-4663. WHERE TO GET WARRANTY SERVICE: Warranty services or repairs shall be provided at all Sears Service Centers. Call 1-800-469-4663.
MAINTENANCE, REPLACEMENT AND REPAIR OF EMISSION RELATED PARTS: Any Sears approved replacement part used in the performance of any warranty maintenance or repair on emission related parts will be provided without charge to the owner if the part is under warranty.

EMISSION CONTROL WARRANTY PARTS LIST: Carburetor, Ignition System: Spark Plug (covered up to maintenance schedule), Ignition Module, Muffler including catalyst, Fuel Tank (California only). MAINTENANCE STATEMENT: The owner is responsible for the performance of all required maintenance as defined in the operator's manual.

The information on the product label indicates which standard your engine is certified. Example: (Year) EPA Phase 1 or Phase 2 and/or CALIFORNIA.

This engine is certified to be emissions compliant for the following use:

- Moderate (50 hours)
- Intermediate (125 hours)
- Extended (300 hours)
## WARNING

All repairs, adjustments and maintenance not described in the Operator's Manual must be performed by qualified service personnel.
