Owner’s Manual

Important Information
• Please read carefully and thoroughly this manual before operating this unit.
• Contact a qualified service technician for installation, repair and maintenance of this unit.
• The appliance is not intended for use by young children or those who require supervision.
• Young children should be supervised to ensure that they do not play with the appliance.
FOR YOUR RECORDS

Write the model and serial numbers here:
Model #
Serial #

You can find them on a label on the side of each unit.

Dealer’s Name

Date Purchased

Staple your receipt to this page in the event you need it to prove date of purchase or for warranty issues.

READ THIS MANUAL

Inside you will find many helpful hints on how to use and maintain your air conditioner properly. Just a little preventive care on your part can save you a great deal of time and money over the life of your air conditioner.

You'll find many answers to common problems in the chart of troubleshooting tips. If you review our chart of Troubleshooting Tips first, you may not need to call for service at all.

PRECAUTION

- Contact the authorized service technician for repair or maintenance of this unit.
- Contact the installer for installation of this unit.
- The air conditioner is not intended for use by young children or invalids without supervision.
- Young children should be supervised to ensure that they do not play with the air conditioner.
- When the power cord is to be replaced, replacement work shall be performed by authorized personnel only using only genuine replacement parts.
- Installation work must be performed in accordance with the National Electric Code by qualified and authorized personnel only.
Safety Precautions

To prevent the injury of the user or other people and property damage, the following instructions must be followed.

- Incorrect operation due to ignoring instruction will cause harm or damage. The seriousness is classified by the following indications.

<table>
<thead>
<tr>
<th>WARNING</th>
<th>This symbol indicates the possibility of death or serious injury.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAUTION</td>
<td>This symbol indicates the possibility of injury or damage to properties only.</td>
</tr>
</tbody>
</table>

- The meanings of the symbols used in this manual are as shown below.

<table>
<thead>
<tr>
<th>Be sure not to do.</th>
<th>Be sure to follow the instruction.</th>
</tr>
</thead>
</table>

- **Installation**

**FOR ELECTRICAL WORK, CONTACT THE DEALER, SELLER, A QUALIFIED ELECTRICIAN, OR AN AUTHORIZED SERVICE CENTER.**

- There is risk of fire or electric shock.

**INSTALL THE PANEL AND THE COVER OF CONTROL BOX SECURELY.**

- There is risk of fire or electric shock.

**DO NOT INSTALL, REMOVE, OR RE-INSTALL THE UNIT BY YOURSELF (CUSTOMER).**

- There is risk of fire, electric shock, explosion or injury.

Be cautious when unpacking and installing the product.

- Shape edges could cause injury. Be especially careful of the sharp edges.

For installation, always contact the dealer or an Authorized Service Center.

- There is risk of fire, electric shock, explosion, or injury.

Do not install the product on a defective installation stand.

- It may cause injury, accident, or damage to the product.
Safety Precautions

Be sure the installation area does not deteriorate with age.

- If the base collapses, the air conditioner could fall with it, causing property damage, product failure, and personal injury.

Install the indoor unit on the wall where the height from the floors more than 8ft(2.4m)

- There are sharp moving parts that could cause personal injury.

Do not handle the pipe by yourself (Customer)

- High-Pressure refrigerant may cause personal injury.

Operation

Do not allow water to run into electric part.

- There is risk of fire, failure of the product, and/or electric shock.

Do not let the air conditioner run for a long time when the humidity is very high and a door or a window is left open.

- Moisture may condense and wet or damage furnishings.

Do not store or use flammable gas or combustibles near the air conditioner.

- There is risk of fire or product failure.

Do not use the product in a tightly closed space for a long time.

- Oxygen deficiency could occur.
- Some ventilation by opening window is necessary for the fresh air.

When flammable gas leaks, turn off the gas and open a window for ventilation before turning the product on. Do not use the telephone or turn switches on or off.

- There is risk of explosion or fire.

Turn off breaker to the unit if strange sounds odors or smoke comes from it.

- There is risk of fire, Product failure, and/or electric shock.
Stop operation and close any window in storm or hurricane before the hurricane arrives.

- There is risk of property damage, failure of product, or electric shock.

Do not open the inlet grill of the product during operation. (Do not touch the electrostatic filter, if the unit is so equipped.)

- There is risk of physical injury, electric shock, or product.

When the product is soaked (flooded or submerged), contact an Authorized Service Center.

- There is risk of electrical shock.

Ventilate the product from time to time when operating it together with a stove, etc.

- There is risk of fire or electrical shock.

Turn off breaker to the appliance before performing cleaning or maintenance.

- There is risk of electric shock.

When the product is not be used for a long time disconnect the power supply by turning off the breaker.

- There is risk of product damage or failure, or unintended operation.

Take care to ensure that nobody could step on or fall onto the outdoor unit.

- There could result in personal injury and product damage.

Do not insert hands or other objects through the air inlet or outlet while the air conditioner is on.

- There are sharp and moving parts that could cause personal injury.
## Installation

**CAUTION**

- Always check for gas (refrigerant) leakage after installation or repair of product.
- Do not install the product where the noise or hot air from the outdoor unit could offend neighbors.
- Use two or more people to lift and transport the air conditioner.
- Do not install the product where it will be exposed to sea wind (salt spray) directly.

- Low refrigerant levels may cause product failure.
- It may cause a problem for your neighbors.
- Avoid personal injury.
- It may cause corrosion in the product. Corrosion, particularly on the condenser and evaporator fins, could cause product malfunction or inefficient operation.

**Operation**

- Do not direct airflow at room occupants.
- Do not use the product for special purposes, such as preserving foods, works of art, etc. It is a consumer air conditioner, not a precision refrigeration system.
- Do not block the inlet or outlet of air flow.

- This could damage your health.
- There is risk of damage or loss of property.
- It may cause product failure.
Use a soft cloth to clean. Do not use harsh detergents, solvents, etc.
• There is risk of fire, electric shock or damage to the plastic parts of the product.

Do not touch the metal parts of the product when removing the air filter. They are very sharp!
• There is risk of personal injury.

Do not step on or put anything on the product. (outdoor unit)
• There is risk of personal injury and failure of product.

Always insert the filter securely. Clean the filter every two weeks or more often if necessary.
• A dirty filter reduces the efficiency of the air conditioner and could cause product malfunction or damage.

Do not drink the water drained from the unit.
• It is not sanitary and could cause serious health issues.

Use a firm stool or ladder when cleaning or maintaining the air conditioner.
• Be careful and avoid personal injury.

Replace all the batteries in the remote.
• There is risk of fire or explosion.

Disuse

Do not recharge or disassemble the batteries. Do not dispose of batteries in a fire.
• They may burn or explode.

If the liquid from the batteries gets onto your skin or clothes, wash it well with clean water. Do not use the remote if the batteries have leaked.
• The chemicals in batteries could cause burns or other health hazards.
Prior to operation

Preparing for operation

1. Contact an installation specialist for installation.
2. Connect the power cable between indoor unit and outdoor unit properly.
3. Use a dedicated circuit.

Usage

1. Being exposed to direct airflow for an extended period of time could be hazardous to your health. Do not expose occupants, pets, or plants to direct airflow for extended periods of time.
2. Do not use this air conditioner for non-specified special purposes (e.g. preserving precision devices, food, pets, plants, and art objects). Such usage could damage the items.

Cleaning and maintenance

1. Do not touch the metal parts of the unit when removing the filter. Injuries can occur when handling sharp metal edges.
2. Do not use water to clean inside the air conditioner. Exposure to water can destroy the insulation, leading to possible electric shock.
3. When cleaning the unit, first make sure that the power and breaker are turned off. There is a possibility of injury if the unit’s power is accidentally triggered on while cleaning inner parts of the unit.

Service

For repair and maintenance, contact your authorized service dealer.

Symbols Used in this Manual

⚠️ This symbol alerts you to the risk of electric shock.

⚠️ This symbol alerts you to hazards that could cause harm to the air conditioner.

NOTICE This symbol indicates special notes.
Remote Controller

1. Remove the battery cover by pulling it according to the arrow direction.

2. Insert new batteries making sure that the (+) and (-) of battery are installed correctly.

3. Reattach the cover by sliding it back into position.

**NOTICE** Use 2 AAA(1.5volt) batteries. Do not use rechargeable batteries.

Storage and Tips For Using the Remote Controller

- The remote control may be stored mounted on a wall.

- To operate the room air conditioner, aim the remote control at the signal receptor.
- The remote control will operate the air conditioner at a distance of up to 7m(23ft).
**Signal Receptor**

Receives the signals from the remote controller. (Signal receiving sound: two short beeps or one long beep.)

![Signal Receptor Image]

**Operation Indicating Lamps**

- **On/Off**: Lights up during the system operation.
- **Sleep Mode**: Lights up during Sleep Mode Auto operation.
- **Timer**: Lights up during Timer operation.
- **Defrost Mode**: Lights up during Defrost Mode or Hot Start operation (Heat pump model only)
- **Outdoor unit operation**: Lights up during outdoor unit operation (Cooling model only)

**Desire temperature**

For cooling, dehumidification, heating modes it displays Desired temperature indicator.

- **Cooling**: 18°C~30°C (64°F~86°F)
- **Dehumidification**: 18°C~30°C (64°F~86°F)
- **Heating**: 16~30°C (60°F~86°F)
- **AI**: Auto Operation
- **Po**: Jet Cool
- **Lo**: Test Mode
Remote Control Operation

Controls

1. START/STOP BUTTON
   Operation starts when this button is pressed and stops when the button is pressed again.

2. OPERATION MODE SELECTION BUTTON
   Used to select the operation mode.

3. ROOM TEMPERATURE SETTING BUTTONS
   Used to select the room temperature.

4. INDOOR FAN SPEED SELECTOR
   Used to select fan speed in four steps low, medium, high and CHAOS.

5. JET COOL
   Used to start or stop the speed cooling/heating. (speed cooling/heating operates super high fan speed.)

6. CHAOS SWING BUTTON
   Used to stop or start louver movement and set the desired up/down airflow direction.

7. ON/OFF TIMER BUTTONS
   Used to set the time of starting and stopping operation. (See page 18)

8. TIME SETTING BUTTONS
   Used to adjust the time. (See page 18)

9. TIMER SET/CANCEL BUTTON
   Used to set the timer when the desired time is obtained and to cancel the Timer operation. (See page 18)

10. SLEEP MODE AUTO BUTTON
    Used to set Sleep Mode Auto operation. (See page 18)

11. AIR CIRCULATION BUTTON
    Used to circulate the room air without cooling or heating. (See page 19)

12. ROOM TEMPERATURE CHECKING BUTTON
    Used to check the room temperature.

13. RESET BUTTON
    Used prior to resetting time.

14. 2nd F Button
    Used prior to using modes printed in blue at the bottom of buttons. (See page 17)

15. AUTO CLEAN
    Used to set Auto Clean mode.

16. ºC TO ºF SWITCHING BUTTON
    Used to switch temperature reading from Centigrade to Fahrenheit.
**Cooling Operation**

1. Press the Start/Stop button. The unit will respond with beep sound.

2. Open the door on the Remote Controller. To select **Cooling Operation**, press the Operation Mode Selection button. Each time the button is pressed, the operation mode is shifted in the direction of the arrow.

3. Set the temperature lower than the room temperature. The temperature can be set within a range of 18°C~30°C(64°F~86°F) in 1°C(2°F).

4. You can select the fan speed in four steps—low, medium, high, or CHAOS. Each time the button is pressed, the fan speed mode is shifted.

---

**Natural wind by the CHAOS logic**

- For more fresh feeling, press the Indoor Fan Speed Selector and set CHAOS mode. In this mode, the wind blows like natural breeze by automatically changing fan speed according to the CHAOS logic.
Auto Operation

1. Press the Start/Stop button. The unit will respond with beep sound.

2. Open the door on the Remote Controller. To select Auto Operation, press the Operation Mode Selection button. Each time the button is pressed, the operation mode is shifted in the direction of the arrow.

3. The temperature and fan speed are automatically set by the electronic controls based on the actual room temperature. If you want to change the set temperature, press the Room Temperature Setting buttons. The set temperature will be changed considering room temperature.

DURING AUTO OPERATION:
- You cannot switch the indoor fan speed. It has already been set by the Fuzzy rule.
- If the system is not operating as desired, manually switch to another mode. The system will not automatically switch from the cooling mode to the heating mode, or from heating to cooling, then you must set the mode and the desired temperature again.
- During Auto Operation, pressing the chaos swing button makes the horizontal louvers swing up and down automatically. If you want to stop auto-swing, press the chaos swing button again.
Healthy Dehumidification Operation

1. Press the Start/Stop button. The unit will respond with beep sound.

2. Open the door on the Remote Controller. To select Healthy Dehumidification Operation, press the Operation Mode Selection button. Each time the button is pressed, the operation mode is shifted in the direction of the arrow.

3. Set the fan speed. You can select the fan speed in four steps - low, medium, high, or CHAOS. Each time the button is pressed, the fan speed mode is shifted.

NATURAL WIND BY THE CHAOS LOGIC
- For more fresh feeling, press the Indoor Fan Speed Selector and set CHAOS mode. In this mode, the wind blows like natural breeze by automatically changing fan speed according to the CHAOS logic.

DURING HEALTHY DEHUMIDIFICATION OPERATION:
- If you select the dehumidification mode on the operation selection button, the A/C starts to run the dehumidification function, automatically setting the room temp. and air volume to the best condition for dehumidification based on the sensed room temp. In this case, the setting temp. is not displayed in the Remote Controller and you are not able to control the room temp. either.
- During the healthy dehumidification function, the air volume is automatically set according to the algorithm responding to the current room temp. and makes the room condition healthy and comfortable even in the high humidity season.
Heating Operation (Heat pump model only)

1. Press the Start/Stop button. The unit will respond with a beep sound.

2. Open the door on the Remote Controller. To select Heating Operation, press the Operation Mode Selection button. Each time the button is pressed, the operation mode is shifted in the direction of the arrow.

3. Set the temperature higher than the room temperature. The temperature can be set within a range of 16°C~30°C (60°F~86°F) in 1°C (2°F).

4. Set the fan speed again. You can select the fan speed in four steps—low, medium, high, or CHAOS. Each time the button is pressed, the fan speed mode is shifted.

NATURAL WIND BY THE CHAOS LOGIC
- For more fresh feeling than other fan speed, press the Indoor Fan Speed Selector and set to CHAOS mode. In this mode, the wind blows like natural breeze by automatically changing fan speed according to the CHAOS logic.
1. Press the Start/Stop button. The unit will respond with beep sound.

2. Press the Jet Cool button to operate the speed cooling/heating mode and the unit will operate in super high fan speed on cooling/heating mode for 30/60 minutes.

3. To cancel the Jet Cool mode, press the Jet Cool button or the fan button or the room temperature setting button again and the unit will operate in high fan speed in cooling/heating mode.

**NOTICE**
- Jet Cool function in heating mode is available on Artcool type only.
- During the JET COOL function at any moment, the A/C starts to blow the cool/heat air at extremely high speed for 30/60 minutes setting the room temp. automatically to 18°C/30°C(64°F/86°F). It is especially used to cool/heat the room temperature in the shortest time.
- In order to return to the normal cooling/heating mode from the Jet Cool mode, you just press either the operation mode selection button, air volume selection or temp. setting button or the JET COOL button again.
2nd F Operation

1. Press the Start/Stop button. The unit will respond with beep sound.

2. Open the door of the Remote Controller and press the 2nd F button to operate functions printed in blue at bottom of buttons. (Check the indication of 2nd function on Remote Controller display.) These buttons operate the timer setting as follows:

3. 2nd function goes off in a short time automatically or when the button is pressed again.

For more details, refer to functions next page.
### Additional features

#### Sleep Mode

1. Press the Sleep Mode Auto button to set the time you want the unit to turn off automatically.

2. The Timer is programmed in one-hour increments by pressing the Sleep Mode Auto button 1 to 7 times.
   - The sleep mode is available for 1 to 7 times.
   - To alter the time period in steps of 1 hour, press the Sleep Mode Button while aiming at air conditioner.

3. Make sure the Sleep Mode Auto LED lights up.

To cancel the Sleep Mode, press the sleep Mode Auto button several times until the star (🌟) disappears from the operation display.

**NOTICE** The Sleep Mode will be operated at low fan speed (cooling) or medium fan speed (heat pump only) for quiet sleeping.

IN COOLING MODE: The temperature will automatically rise by 1°C (2°F) over the next 30 minutes and by 2°C (4°F) in 1 hour for comfortable sleeping.

#### Setting the Time

1. Time can be set only when you have pressed the Reset button. If you have just replaced the batteries, the Reset button should be pressed to reset the time.

2. Press the Time Setting buttons until the desired time is set.

3. Press the Timer SET button.

**NOTICE** Check the indicator for A.M. and P.M.

#### Delay Start/Pre-Set Stop

1. Make sure the time is set correctly on the Remote Controller display.

2. Press the ON/OFF Timer buttons to turn Timer on or off.

3. Press the Time Setting buttons until the desired time is set.

4. Press the selected on/off setting by pressing the Timer SET button while aiming the Remote Controller at the signal receptor.

To cancel the setting the timer.

**NOTICE** Select one of the following four types of operation.

- **Delay OFF Timer**
- **Delay ON Timer**
- **Delay OFF and ON Timer**
- **Delay ON and OFF Timer**

To cancel the setting the timer, press the Timer Cancel button while aiming Remote Controller at the signal receptor.

(The timer lamp on the air conditioner and the display will go out.)

**NOTICE** with the unit running

Delay ON Timer

Delay OFF and ON Timer

Delay ON and OFF Timer
**Vertical Airflow Direction Control**

The up/down airflow (Vertical Airflow) can be adjusted by using the remote control.

Press the Start/Stop button to start the unit.
Open the door on the remote control.
Press Chaos Swing button and the louvers will swing up and down. Press the Chaos Swing button again to set the vertical louver at the desired airflow direction.

**NOTICE**

- If you press the CHAOS swing button, the horizontal airflow direction is changed automatically based on the CHAOS algorithm to distribute the air in the room evenly and at the same time to make the human body feel most comfortable, as if enjoying a natural breeze.
- Always use the remote control to adjust the up/down airflow direction. Manually moving the vertical airflow direction louver by hand could damage the air conditioner.
- When the unit is shut off, the up/down airflow direction louver will close the air outlet vent of the system.

**Air Circulation Mode**

Circulates the room air without cooling or heating.

1. Press the Start/Stop button, the unit will respond with a beep.
2. Open the door on the remote control. Press the Air Circulation button. Close the door on the remote control. Now each time that you press the Indoor Fan Speed Selector, the fan speed is shifted from low to CHAOS and back to low again.

**NOTICE**

- CHAOS Air economizes power consumption and prevents overcooling. The fan speed is automatically changed from high to low or vice versa, depending on the ambient temperature.
Auto clean

1. Whenever you press the AUTO CLEAN button, Auto Clean Function will be selected or cancelled.
2. Auto Clean function works before and after cooling or dehumidification mode. For details, refer to the below points.
3. When the unit is started after selecting Auto Clean, the Cool Start function operates and indoor Fan is started after 20 seconds.
4. When you press Start/Stop button to turn off the unit after the you have selected Auto Clean function, the air-conditioner circulates the indoor air in the Auto Clean mode with no more Cooling or Dehumidification operation. It lasts for 30 minutes.
5. If you press the AUTO CLEAN button again during the product operation, Auto Clean function will be cancelled.

NOTICE

- During Auto Clean function, moistures left in indoor units after Cooling Operation or Healthy Dehumidification Operation can be removed.
- During Auto Clean function, only Start/Stop button, Plasma button and AUTO CLEAN button are available.

Forced Operation

The operation will be started operation if the power button is pressed without remote controller.
If you want to stop operation, re-press the button.

</tbody>
</table>
Auto restart

In case the power comes on again after a power failure, the unit operates automatically to the previous operating conditions. So there is no need of activating this function by pressing any key or button. In the initial mode, the fan operates at a low speed and the compressor starts about 3 minutes later. As the compressor starts, the fan speed also resumes its previous setting mode.

In case of absence for a long time while power failure, turn off main power to avoid undesired Auto restart.

NOTICE

This feature is enabled by factory default setting, but you can disable it by pressing the ON/OFF button for 6 seconds. The unit will beep twice and the indicator lamp(2) will blink 4 times. To enable it, press the button again for 6 seconds. The unit will beep twice and the indicator lamp(1) will blink 4 times.

Helpful information

Fan speed and cooling capacity. The cooling/heating capacity indicated in the specification is the value when the fan speed is set to high, and the capacity will be lower at low or medium fan speed. High fan speed is recommended when you wish to cool/heat the room quickly.
CAUTION: Before performing any maintenance, turn off the main power to the system.

Indoor Unit

Grille, Case, and Remote Control

- Turn the system off before cleaning.
  
  To clean, wipe with a soft, dry cloth. Do not use bleach or abrasives.

NOTICE: Supply power must be disconnected before cleaning the indoor unit.

AIR FILTERS

The air filters behind the front grille should be checked and cleaned once in every 2 weeks or more often if necessary.

TRIPLE DEODORIZER filter

1. After removing the air filters, pull slightly forward to remove the TRIPLE DEODORIZING filter.

2. Dry in the sunlight for two hours.

3. Re-install the TRIPLE DEODORIZING filter to the original position.

- Never use any of the followings:
  - Water hotter than 40°C (104°F)
    Could cause deformation and/or discoloration.
  - Volatile substances
    Could damage the surfaces of the air conditioner.

1. Lift the front access panel and pull the filter tab slightly forward to remove the filter.

2. Clean the filter with a vacuum cleaner or warm, soapy water.
   - If dirt is conspicuous, wash with a solution of detergent in lukewarm water.
   - If hot water (40°C (104°F) or more) is used, it may be deformed.

3. After washing with water, dry well in the shade.

4. Re-install the air filter.
When the air conditioner is not going to be used for a long time.

When air conditioner is not going to be used for a long time.

1. Operate the air conditioner on Air circulation mode (Refer to page 19) for 2 to 3 hours.
   • This will dry out the internal mechanisms.

2. Turn off the circuit breaker, and disconnect the power cable.
   
   **CAUTION:** Turn off the circuit breaker when the air conditioner is not going to be used for a long time.
   
   Dirt may collect and may cause a fire.

3. Remove the batteries from the Remote Controller.

When the air conditioner is to be used again.

1. Clean the air filter and install it in the indoor unit.
   (Refer to page 22 for cleaning filters.)

2. Check that the air inlet and outlet of the indoor/outdoor unit are not blocked.

Operation Tips

<table>
<thead>
<tr>
<th>Do not overcool the room.</th>
<th>Keep blinds or curtains closed.</th>
<th>Keep the room temperature uniform.</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is not good for the health and wastes electricity.</td>
<td>Do not let direct sunshine enter the room when the air conditioner is in operation.</td>
<td>Adjust the vertical and horizontal airflow direction to ensure a uniform temperature in the room.</td>
</tr>
<tr>
<td>Make sure that the doors and windows are shut tight.</td>
<td>Clean the air filter regularly.</td>
<td>Ventilate the room occasionally.</td>
</tr>
<tr>
<td>Avoid opening doors and windows if possible to keep the cool air in the room.</td>
<td>Blockages in the air filter reduce the airflow and lower cooling and dehumidifying effects. Clean at least once every two weeks.</td>
<td>Since windows are kept closed, it is a good idea to open them and ventilate the room now and then.</td>
</tr>
</tbody>
</table>
### Troubleshooting

Check the following points before requesting repairs or service.... If the fault persists, please contact your dealer or service center.

<table>
<thead>
<tr>
<th>Case</th>
<th>Explanation</th>
<th>See page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The air conditioner does not operate.</td>
<td>• Check room temperature setting?</td>
<td>12, 15</td>
</tr>
<tr>
<td></td>
<td>• Check if circuit breaker is on?</td>
<td>-</td>
</tr>
<tr>
<td>The room has a peculiar odor.</td>
<td>• Check that this is not a damp smell exuded by the walls, carpet, furniture, or cloth items in the room.</td>
<td>-</td>
</tr>
<tr>
<td>It seems that condensation is leaking from the air conditioner.</td>
<td>• Check the drain hose is connected tight or if indoor unit is installed even.</td>
<td>-</td>
</tr>
</tbody>
</table>
| Air conditioner does not operate for about 3 minutes after turning on. | • This is the protector of the mechanism.  
• Wait about 3 minutes and operation will begin.  
• About 3 minutes delay is applied to protect compressor from frequency on/off. | - |
| Does not cool or heat effectively. | • Is the air filter dirty? See air filter cleaning instructions. | 22 |
|      | • Has the temperature been set correctly? | 12, 15 |
